Abstract in Thai	d
Abstract in English	f
List of Tables	k
List of Figures	l
Chapter 1 Introduction	1
1.1 Principle, Theory and Rational	1
1.2 Purpose of the study	6
1.3 Advantage of the study	6
1.4 The Scope of study and data collection	6
Chapter 2 Theoretical Background Literature Review	7
2.1 Theoretical Background	7
2.1.1 Absolute Advantage	7
2.1.2 Comparative Advantage	8
2.1.3 Heckscher-Ohlin	9
2.1.4 Theoretical Analysis of Gravity Model	30
2.2 Literature Review	13
Chapter 3 Methodology	23
3.1 Description of Variables and Data source	23
3.2 Gravity Model Specification	26
3.3 The expected result or Hypothesis	27
3.4 Econometric application with Gravity Model	29

3.4.1 Pooled Ordinary Least Squares (OLS)	30
3.4.2 Random Effects Model	30
3.4.3 Other Diagnostic Tests	31
3.5 Predicting the Cambodia's potential trade and performance	31
3.6 Summary of Methodology Framework	34
Chapter 4 Empirical Result	35
4.1 Characteristics of Cambodia's trading partners	35
4.2 Analysis the results in Pooled OLS and Random effects model	37
4.3 Various Diagnostic Tests	39
4.4 Result Feasible Generalized Least Square (FGLS)	41
4.5 Predicting the Cambodia's potential trade and performance	44
4.5.1 Mean predicted trade and mean actual trade	44
4.5.2 An analysis of trade performance by Relative differences Index (Rd %)	46
4.5.3 The trade performance of Cambodia with individual partners	47
4.5.4 Analyse the trade gain or lose by Absolute difference	51
Chapter 5 Conclusion and Policy Implication	544
5.1 Conclusion	544
5.2 Policy Implementation	55
5.2.1 Bilateral agreement and enforcement	56
5.2.2 Trade facilitation and logistics improvement policy	56
5.2.3 Increase financial cooperation between Cambodia and its trading partners	56
5.2.4 Increasing the quality of custom system	57
5.2.5 Establishing the commercial trading centers in partner countries	57
5.3 Areas for further research	58
References	59

Appendix	64
Appendix A Results of Pooled OLS Model	64
Appendix B Results of Random Effects Model	65
Appendix C Result of Breush Pagan Lagrange Multiplier Test	66
Appendix D Variance-inflating factor of independent variables	66
Appendix E Correlations between variables	67
Appendix F Modified Wald Test for Groupwise Heteroscedasticity	67
Appendix G Test for cross sectional independence	67
Appendix H Test for autocorrelation in panel data	68
Appendix I Result of Feasible Generalized Least Square (FGLS)	68
Curriculum Vitae	69

LIST OF TABLES

	Page
Table 1.1 Cambodia's trade with its major trading partners in ASEAN during 2002-2015, (Million USD)	5
Table 2.1 Example of absolute advantages	8
Table 2.2 Example of comparative advantage	9
Table 2.3 Summary of literature review	18
Table 3.1 The bilateral distance between Cambodia and it trading partners	24
Table 3.2 Variables summary (1990-2015)	25
Table 3.3 The expected sign of all independent variables	29
Table 4.1 Descriptive statistic of trading partners	36
Table 4.2 Mean of real GDP and per capita GDP of each trading partner	37
Table 4.3 Pooled OLS and Random Effects regression	39
Table 4.4 Feasible Generalized Least Square (FGLS) regression of $\ln(TTijt)$	43
Table 4.5 Cambodia Actual trade (A_Trade) and Predicted trade (P_Trade) (Million USD)	44
Table 4.6 Cambodia Actual trade (A_trade) and Predicted trade (P_Trade) with each partner (Million USD)	45
Table 4.7 Cambodia's overall trade performance by Relative difference index (Rd %)	47
Table 4.8 Trade Performance by Absolute Difference (Ad)	53

LIST OF FIGURES
