ACKNOWLEDGEMENT

First of all, I would like to thank my supervisor, Assistant Professor Thaneeya Chetiyankornkul, for my great opportunities of her supervision, valuable suggestion and all support she has given me throughout my master degree period. I would also like to thank my committee members Assistant Professor Surat Bualert, Associate Professor Putipong Bookkamana and Dr.Thanyarat Chuesaard for all kindly advice, helpful suggestion and valuable information both inside and outside my thesis.

Second, I would like to special thanks to Associate Professor Akira Toriba for his invaluable guidance, advice, encouragement and support, I have learned a lot during my research at Hygienic Chemistry laboratory, Institute of Medical, Pharmaceutical and Health Sciences, Kanazawa University, Japan without which this study would not have been possible.

Third, I am also grateful the National Research Council of Thailand (NRCT) for the financial support.

Fourth, I would also like to thank technical staffs for their equipment support from Research Institute of Health Science, Chiang Mai University

Finally, I would like to thank my parents, family, ES friends, who have supported and encouraged me until my success.

Wanlapa Outong
