ACKNOWLEDGEMENTS

The completion of this thesis would have been impossible without the help of many people, whom I would like to thank. I would like to express my sincere thanks to my advisor, Asst. Prof. Dr. Somporn Chantara, for her invaluable supervision and constant inspiration throughout this study. I would like to thank my co-advisor, Dr. Tippawan Prapamontol for her kind support and the members of Environment and Health Research Unit, Research Institute for Health Sciences (RIHES), Chiang Mai University for their support, and particularly Mr. Sawang Kawichai, for his help on PAHs analysis. I also thank Dr. Wan Wiriya for his guidance on the experimental aspects.

I gratefully acknowledge the Chiang Mai Ancestral Gods' Support Foundation for providing the space inside the shrines to be used as the study sites. I also thank the Environmental Chemistry Research Laboratory (ECRL), Chemistry Department and Environmental Science Program, Faculty of Science, Chiang Mai University, for providing research facilities. My thanks also go to the ECRL members for their great help and support throughout the study.

Scholarship from Center of Excellence on Environmental Health and Toxicology (EHT) during 2010-2013 (former the Center of Excellence on Environmental Health, Toxicology and Management of Chemicals; ETM) and financial support from National Research University (NRU), Chiang Mai University are gratefully acknowledged.

Finally, I would like to give my special thanks to my parents who have always loved me and have given me endless support and inspiration.

Susira Bootdee
