## ACKNOWLEDGEMENT

I would like to express my thanks to the Graduate School, Chiang Mai University, Thailand and Tetra Pak (Thailand) Ltd. for partially supported this research.

I would like to express my special thanks of gratitude and respect to my supervisor, Asst. Prof. Dr. Tri Indrarini Wirjantoro, who gave me an opportunity to do this project on the topic of properties of intermediate moisture papaya containing lactic acid bacterium, and supported me in doing different experimental sections with good suggestion that gave new knowledge and understanding. I was really thankful to her.

I wished to express my thanks to the staff at the Division of Food Science and Technology, Faculty of Agro-Industry, Chiang Mai University, Thailand for supporting some chemicals and equipment and also provided me knowledge, including methods and technique in the laboratory.

I would like to thanks my friends for stimulation, support and knowledge that they shared and explained to me during my research works, including sleepless nights. I appreciated for the opportunity to work together all the time and cherished all the fun that we had.

I would like to thank my family, especially my parents and my brothers for supporting me in a great deal during this research, for their helps and for encouraging me throughout my study and my general life.

Nisareefah Benyakart
