ACKNOWLEDGEMENT

This work is dedicated to my family who has always been my inspiration.

I would like to express my greatest gratitude to the International Petroleum Geophysics Program of Chiang Mai University, especially to PTT Exploration and Production Public Company Limited for giving me the opportunity and the scholarship to pursue my graduate studies.

I would like to extend my gratitude to Dr. Christopher K. Morley, Program Director, taught me a lot about structural geology. He is an exceptional scientist as well as lecturer.

My sincerest appreciation also extends to the staffs of the Petroleum Geophysics Program, especially to my advisors, Dr. Diako Hariri and Associate Prof. Dr. Pisanu Wongpornchai, for the invaluable guidance and supervision throughout the course of the graduate study and the project undertaking.

I also want to show my great thank for my favorite retired geophysicist, Dr. Bob Kieckhefer, helps me throughout my independent study. He is very friendly and enthusiastic. Another person who always supports me in the class from the beginning to the end is my beautiful classmate Ms. Kimberly A. Iao, hopefully she will be success in the future.

Finally, I would also like to thank VIETNAM PETROLEUM INSTITUTE – Exploration and Production Centre for allowing me to use their data, CGG and Schlumberger Company that provided softwares for my study and special thanks to Mrs. Pham Thi Hong and Mr. Phung Van Phong, former students in Chulalongkorn University, for their generous assistance and support.

Nguyen Duy Quang
