## ACKNOWLEDGEMENT

First, I give thanks to Lord Buddha and Lord Krishna to bless me with an opportunity to study in a vibrant country – Thailand - and for providing me with an ability, strength, and desire to study on the other side of Asia in a different country.

I would like to sincerely acknowledge all the concerned government departments of my beloved country, Pakistan - in general - for nominating me to study abroad. I would like to acknowledge the Health Department of the Government of Sindh in particular - who provided me deputation with full salary in order to be free from the financial burden of caring for my family and by enabling me to study at an advanced level. Thereby, I have had a chance to contribute to the improvement of the health sector, in general, in my country - and the field of nursing, in particular.

I express my appreciation of the generosity of the organizers of the Thailand International Development Cooperation Agency (TICA) for selecting me for this prestigious award under their Thai International Postgraduate Program (TIPP). This program has enabled me to develop the skills related to my field. It has provided me with a fully funded Master's Fellowship, covering the following: tuition; accommodation; living allowance; health insurance; airfare; thesis expenses; and book allowances. Besides, I am deeply grateful to the members of the selection committee at the Faculty of Nursing, Chiang Mai University, Thailand, who selected me to study for the Master of Science in Nursing Science degree program.

I am deeply indebted to my major advisor, Assistant Professor Dr. Thitinut Akkadechanunt, because my thesis would not have been possible without her moral support; encouragement; inspiring guidance; timely suggestions; and constructive feedback. Besides, I want to express my appreciation to my co-advisor, Assistant Professor Dr. Somjai Sirakamon, for meaningful suggestions and sincere help. Without their efforts, my successful completion of this study would not have been possible.

I would like to express my gratitude to Honorable Dean and Professor Dr. Wipada Kunaviktikul. She provided me with unwavering encouragement; emotional support; and inspiring guidance. This occurred not only while I was studying in her Master's-level courses. She also provided me with a golden opportunity to develop my thesis abstract, selected to present at an international nursing conference - "Optimizing Healthcare Quality: Teamwork in Education, Research, and Practice," held on the 22nd-24th of June in 2016 at Empress Convention Centre & Hotel in Chiang Mai, Thailand.

I also forward my sincere appreciation to the members of my thesis examining committee for their invaluable guidelines and suggestions. I would especially like to acknowledge Assistant Professor Dr. Usanee Jintrawet, Chairperson of the Master's degree program in Nursing Science. I would like to acknowledge Lecturer Dr. Orn-Anong Wichaikhum, my academic advisor; and all my other teachers, including the faculty and staff of FON, CMU, for their substantial support and friendly help. I will always be grateful to my class fellows - Caleb, Fanta, Mei, and Ling - who gave me company and made my study and stay in Thailand successful.

I am deeply grateful to all the Chief Executive Officers and Nursing Superintendents at the Jinnah Postgraduate Medical Centre in Karachi; the Civil Hospital in Karachi; and the Abbasi Shaheed Hospital in Karachi for giving permission to collect data for my thesis. Furthermore, I would like to extend my gratitude to all concerned coordinators -especially Dayaram and Ashok Kumar Moolchandani - and all the subjects who participated in this study and provided me with their generous support.

Most of all, my whole-hearted gratefulness goes to my loving wife - Mrs. Kemi Bai - for her cordial support during numerous crises and countless aspects of my study process. I am also thankful to my loving sons - Dileep and Vinod – and to my loving daughters - Sheila, Poonam, Jotika, and Harshika - for their incredible sacrifice and support. Last but not least, I wish to give thanks to all the other people, and express my apologies that I could not mention each of you personally for contributing to this study.

Lachman Das Malhi
