## ACKNOWLEDGEMENTS

This study is dedicated to all who have supported me, encouraged me and have made a valuable contribution to my study. I would like to express my great gratitude to the Heinrich Boell Stiftung for supporting me the scholarship to my study. Without them I would not be able to have an opportunity to do a Master's Degree at Chiang Mai University. I would like to expand my appreciation to all my great professors who have generously shared their knowledge, expertise and intelligence. Firstly, I would like to express the deepest appreciation and sincere gratitude to Asst. Prof. Dr. Kwanchewan Buadaeng, my thesis advisor, for her full support, expert guidance, understanding and encouragement throughout my study and research. Without her guidance and persistent help this thesis would not have been possible. I am also indebted to Dr. Mukdawan Sakboon, my thesis co-advisor, for giving me ideas, comments and encouragement to enhance my research and move in the right direction. My sincere thanks also goes to Dr. Romyen Kosaikanont, my thesis committee, who provides me her insightful comments and encouragement.

I am also more than thankful to Shoklo Malaria Research Unit (SMRU) for their fully cooperation and tremendous support; and to all people who were willing to share their knowledge during the interviews in the field study. Also, I like to thank the participants who have willingly shared their precious time during the process of interviewing. Of course, this acknowledgement would not be complete without saying thanks to my parents and my family who supported me throughout my entire study and encouraged my activities.

Saw Keh Doe
