ACKNOWLEDGEMENT

First and foremost I offer my most sincere gratitude to my supervisor, Prof. Dr. Suthep Suantai, who supported me throughout my thesis with his patience and knowledge. His advice and encouragement enabled me to complete this thesis successfully.

This work contains a number of improvement based on comment and suggestion provided by Prof. Dr. Suthep Suantai, Asst. Prof. Dr. Prasit Cholamjiak, Asst. Prof. Dr. Bantha Panyanak. It is my pleasure to express my sincere thanks to them for their generous assistance.

I am particularly indebted to The Institute for the Promotion of Teaching Science and Technology (IPST) and the graduate school, Chiang Mai University for financial support which has supported my research and the chance for my presentation at the Annual Meeting in Mathematics 2016 and Annual Pure and Applied Mathematics Conference 2016 held at Department of Mathematics and Computer Science, Faculty of Science, Chulalongkorn University, Bangkok, Thailand.

I would like to thank to the staffs at Department of Mathematics and Phayaopitayakhom School for their helping and providing facilities during my study.

Lastly, I offer my regards and blessings to my parents and all of my friends who have been a constant source of support emotion, moral and this thesis would certainly not have existed without them.

Suttiwat Wongyai
