ACKNOWLEDGEMENT

This thesis was achieved with the encouragement, support, and cooperation of many people. I would like to take this opportunity to recognize some of the individuals who have guided and assisted me throughout my graduate education. I wish to express gratitude to my thesis advisor, Assoc.Prof.Dr. Wassanai Wattanutchariya for his kind supervision and invaluable guidance throughout the duration of this research study. I also would like to thank my academic advisor, Assoc. Prof. Dr. Nipon Theera-Umpon for their valuable advice during my graduate studies. And I would like to thanks, Assoc. Prof. Dr. Dheerawan Boonyawan for the expert advice and knowledge in plasma treatment technique. I also thank Ms. Kittiya Thunsiri and Mr. Surak Udomsom, the researchers of biomedical engineering laboratory for assistance and suggestions in the research plan. I wish to express my gratitude to Mr. Chanchai Umongno and Mr. Witsawa Thammawong from the Plasma and Beam Physics research facility who taught me the fabrication of an effective plasma jet experiment and plasma treatment set up.

I would like to thank my friends and kind colleagues at the Biomedical Engineering Center (BMEC), Faculty of Engineering, Chiang Mai University for kindly providing me with the laboratory facilities. I am grateful to the Design and Development of advanced manufacturing technology Research Unit (DDRU), the Department of Industrial Engineering, Faculty of Engineering, Chiang Mai University, Plasma and beam physics (PBP) research facility, Department of Physics and Materials, Faculty of Science, Chiang Mai University, and Faculty of Agro-industrial, Chiang Mai University for various suggestions and encouragement to me up until this point of my research. Finally, I most gratefully acknowledge and appreciate my parents for all their love, inspiration, support, and encouragement throughout the period of this thesis.

Jureeporn Jaifu
