ACKNOWLEDGEMENT

I would like to express my special thanks of gratitude to my advisor, Asst. Prof. Dr. Thanongsak Chaiyaso, Division of Biotechnology, School of Agro-Industry, Faculty of Agro-Industry, Chiang Mai University, for his kindness, invaluable advice, generous support and consistent encouragement throughout my research, and for also educating me to develop my scientific thinking and problem solving skills. This research was accomplished with his kindness understanding and assistance.

Similarly, I also would like to thank my co-advisor, Asst. Prof. Dr. Charin Techapun, Division of Biotechnology, School of Agro-Industry, Faculty of Agro-Industry, Chiang Mai University for valuable comments and suggestions, Dr. Punyawatt Pintathong, School of Cosmetic Science, Mae Fah Luang University, for his helpful suggestions, and also the external chairperson, Dr. Churairat Moukamnerd, Division of Biotechnology, Faculty of Agro-Industry, Chiang Mai University, for her helpful suggestions to an external member. Moreover, I would like to express my gratitude to all staff members in the Division of Biotechnology, Faculty of Agro-Industry, Chiang Mai University, for their teaching and guidance.

This work has been financially supported by the Thesis Grant for Master Degree Student FY2014, Tetra Pak (Thailand) Ltd., Thailand, Faculty of Agro-Industry and the Graduate School, Chiang Mai University, FY2016 Thesis Grant for Master Degree Student, The National Research Council of Thailand (NRCT), Thailand, Japan Student Services Organization (JASSO) Student Exchange Support Program (Scholarship for Short-Term Study in Japan) and Japan Science and Technology Agency, Japan-Asia Youth Exchange program in Science, Japan.

Finally, I would like to express my deepest gratitude to my family, especially my parents for their love and encouragement to overcome every difficulty and understanding during the period of this study.

Wimada Srisuwan
