ACKNOWLEDGEMENT

This thesis would not have been successfully without the support of many people.

First, I would like to thank my supervisor, Assoc. Prof. Titipun Thongtem, for my great opportunities of her supervision, valuable suggestion and all support she has given me throughout my Master of Science degree period. I would also like to thank my committee members, Prof. Dr. Somchai Thongtem for all kindly advice, helpful suggestion and valuable information of my thesis. I would like to give my special thanks to Dr. Ponlayuth Sooksamiti for this helpful advice, comment and suggestion of my thesis. I have learned a lot during my study at Chiang Mai University.

Second, I would like to thank all helps and supports from officers and technical staffs of the Department of Chemistry and the Electron microscopy Research and Service Center, Faculty of Science, Chiang Mai University, Chiang Mai, Thailand.

Third, I am also grateful to the Thailand's Office of the Higher Education Commission for providing financial support through the National Research University (NRU) Project for Chiang Mai University (CMU), the Center for Innovation in Chemistry (PERCH-CIC), the Graduate School of CMU and Department of Chemistry, Faculty of Science, Chiang Mai University for the facilities, knowledge, services and a general supports.

Finally, I would like to thank my parents who have given a great cheer to me until my success.
