ACKNOWLEDGEMENTS

First of all, I would like to thank my advisor Asst. Prof. Dr. Tanida Srisuwan for her guidance and encouragement throughout this study. None of my success would have been possible without her brilliant support. I am grateful for being part of the Master program in Endodontics at Chiang Mai University and indebted for the knowledge that all teachers, Asst. Prof. Dr. Kassara Pattamapan, Dr. Saengusa Khemaleelakul, Asst. Prof. Dr. Phumisak Louwakul, Asst. Prof. Dr. Tanida Srisuwan, and Ass. Prof. Patchanee Chuveera, have generously shared with me.

I would also like to thank my research advisory committee members: Asst. Prof. Dr. Pairoj Linsuwanont, Prof. Dr. Siriporn Chattipakorn, Asst. Prof. Dr. Phumisak Laowakul, and Asst. Prof. Dr. Tanida Srisuwan, for their guidance in the study.

Importantly, I wish to thank Dr. Pattama Kittikuson and Dr. Penpitcha Wanachantararak, for their help and support in the laboratory-based techniques in cell biology, Dr. Thanapat Sastraruji for his help with statistical analysis. I also extend my appreciation to Dr. M. Kevin O Carroll for providing the great support in preparing the research manuscript and Aj. Waew, teacher at Buachan Academy, who gave me an inspiration to an efficient English writing.

More importantly, I wish to thank my mother for everything she has done for me. I also wish to thank my colleagues and friends for being supportive.

As well, I would thank the Dental Research Center, the Faculty of Dentistry, Chiang Mai University, Medical Science Research Equipment Center, the Faculty of Medicine, Chiang Mai University, Acteon Group Thailand Co., Ltd, and Dentsply Sirona Thailand Co., Ltd, for the provision of equipment and work space. This study was supported in part by grants from the faculty of Dentistry, Chiang Mai University.
