Chapter 1 Introduction 1

1.1 The Rational of the Study 1
1.2 Objectives of the Study 7
1.3 Research Question 7
1.4 Anticipated Conclusion 8
1.5 Advantage of the Study 8
1.6 Definition 9

Chapter 2 Literature and Theorectical Review and Background of Study Area 10

2.1 Literature Review 10
2.1.1 WASH Assessment 10

ลิขสิทธิ์มหาวิทยาลัยเชียงใหม่

All rights reserved

2.1.2 Willingness to Pay for Piped Water System and Solid Waste Management 10
2.1.3 Mobile Phone 11
2.2 Theoretical Review 12
2.2.1 Stated Preference or Contingent Valuation 12
2.2.2 Constraint to Contingent Valuation 13
2.2.3 Regression Model 13
2.3 Background of the Study Area, Hlaing Tharya 13
2.3.1 Location 13
2.3.2 Residents 15

Chapter 3 Research Methodology 18

3.1 Explanatory Sequential Mixed Method 18
3.1.1 Quantitative Study 18
3.1.2 Qualitative Study 20
3.2 Population and Sampling 20
3.3 Method of Data Analysis 22

Chapter 4 Findings and Results 24

4.1 Diarrhea 26
4.2 WASH 29
4.2.1 Drinking Water 29
4.2.2 Water for General Use 33
4.2.3 Sanitation 39
4.2.4 Solid Waste 42
4.2.5 Hand Wash 47
4.3 Contingent Valuation 47
4.3.1 Willingness to Pay for Piped Water 53
4.3.2 Willingness to Pay for Disinfecting the Piped Water 54
4.3.3 Willingness to Pay for Solid Waste Disposal 55
4.4 Information Angle 57

4.5 Limitations 62

Chapter 5 Conclusion 63

5.1 Conclusion and Discussion 63
5.2 Policy Recommendation 65
5.3 Recommendation for future research 67

References 69

Appendix 74

Appendix A: Questionnaire of Household Survey 75
Appendix B: Binary Logistic Regression Results and Validity Test 84
Appendix C: Truncated Regression Result and Validity Test 89
