ACKNOWLEDGEMENT

To write a dissertation is not possible without the help and support of a great number of people. For this thesis my first gratitude must go to my head supervisor Prof. Dr. Songsak Sriboonchitta, director of Puay Ungphakorn Centre of Excellence in Econometrics, for his continuous support of my study and research, for his patience, motivation, and immense knowledge. His guidance helped me in all the time of research and writing of this thesis. He has shown a great interest and constantly been reading drafts and provided me with suggestions on how to make improvements. Besides my supervisor, I would like to express my special thanks of gratitude to Prof. Dr. Hung T. Nguyen who gave me so many helpful lectures. He also enlightened and inspired me in all the time. I could not have imagined having a better advisor and mentor for my study.

My sincere thanks also go to Asst. Prof. Dr. Napat Hanpornchai, Asst. Prof. Dr. Pathairat Pastpipatkul and Dr. Jianxu Liu for their insightful comments and encouragement, but also for the hard question which incited me to widen my research from various perspectives.

During the years at the Faculty of Economics, I have had the fortune of working with many stimulating people which has made the writing of the dissertation an enjoyable experience. I thank my fellow classmates in PhD room for the stimulating discussions, for the sleepless nights we were working together before deadlines, and for all the fun we have had during the study. In particular, I am grateful to Woraphon Yamaka for enlightening me the first glance of research.

Last but not the least, I owe more than thanks to my friends and my family. I always feel their support. In particular, I would like to express my gratitude to my wife for supporting me spiritually throughout writing this thesis and my life in general.

Kongliang Zhu
