ACKNOWLEDGEMENTS

The first of all and foremost, I wish to express my profound gratitude and thank to Assoc. Prof. Dr. Suttichai Premrudeepreechacharn, my advisor for his invaluable guidance, constructive suggestions and constant encouragement throughout this piece of work. His generous support, enthusiasm and understanding made this study a success and rewarding experience to me.

Special thanks to all members of this thesis committee: Dr. Kanchit Ngamsanroaj, Assoc. Prof. Dr. Yuttana Kumsuwan and Dr. Paramet Wirasanti, for all of their priceless advices, constructive guidance and assistances throughout this work.

My memorable appreciation would be extended to Dr. Suthep Lertsrimongkhon for offering the opportunity of my master degree study at Chiang Mai University; and Assoc. Prof. Yongyoot Jaiboon and his colleagues for serving as the counselors for my graduate course enrollments, lodging, and etc.

Also, I would like to thanks to staffs of Mae Moh Training Center of EGAT who always contributed kind cooperation in approach to this success.

In addition, heartfelt thanks are also extended to EDL and EGAT. I am deeply indebted to Technical and Academic Collaboration Project between EGAT - EDL, for granting me an invaluable opportunity by the way of a full scholarship, which paved the way to achieve my academic goal and complete this thesis and to Academic Collaboration Project between EGAT - CMU with generous support and constant encouragement me to go for post graduate studies.

Finally, no word can ever be expressed my thankfulness to my family and all friends for their helps it might not be possible for me to accomplish my work. To them, I delightfully dedicate this success.

Khamphouvin Sombounkhanh
