## ACKNOWLEDGEMENTS

I would like to express my honest appreciation to all people who have contributed to the delightful success of this thesis.

Firstly, I have to convey my profound gratitude to Asst. Prof. Dr. Anucha Promwungkwa, my advisor. He always helps, takes care and provides invaluable guidance. Specially thanks to all members of this thesis committee: Dr. Kanchit Ngamsanroj, Assoc. Prof. Dr. Suttichai Premrudeepreechacharn, and Assoc. Prof. Yongyoot Jaiboon, and Dr. Suthep Lertsrimongkhon for all of their priceless advices and constant assistances.

My memorable appreciation would be extended to all committee of technical and academic collaboration project between EGAT-EDL that gave the opportunity of my master degree study at Chiang Mai University and his colleagues for serving as the counselors for my graduate course enrollments, lodging, and etc. Furthermore, I am pleased to thank to Dr. Kanchit Ngamsanroj for the invaluable guidance and constant encouragement during conducting the thesis. Similarly, I would like to thankful to Mr. Somkiat Sephaisan and his official staffs of Mae Moh Training Center of EGAT who always contribute kind cooperation in approach to this success.

In addition, heartfelt thanks are also extended to Electricity Generating Authority of Thailand (EGAT) and Electricité Du Laos (EDL). I deeply indebted to technical and academic collaboration project between EGAT-EDL for granting me an invaluable opportunity by the way of full scholarship, which paved the way to achieve the academic goal completely and to academic collaboration project between EGAT-CMU (Chiang Mai University) with generous support and constant encouragement me to go the postgraduate studies.

Finally, I expressed thankfulness to my family and all friends for everything that helped until accomplish my works.

Niko Bangsulin
