Abstract vi

List of Tables xi

List of Figures xii

List of Abbreviation xiv

Chapter 1 Introduction 1

1.1 Problem Statement 1

1.2 Biomass Burning and its Impact (on environment and health) 3

1.2.1 Air pollution and its environmental impacts 4

1.2.2 Air Pollution and its health impact 5

1.3 Air Pollutants 7

1.3.1 Particulate matters 7

1.4 Literature Review 8

1.4.1 Chemical composition of $PM_{2.5}$ 8

1.4.2 Combustion chamber for biomass burning simulation 10

1.5 Research Objectives 16

Chapter 2 Experimental 17

2.1 Chemicals, Equipment and Instruments 17

2.1.1 Chemicals 17

2.1.2 Equipment/Apparatus 18

2.1.3 Instruments 18

2.2 Research Framework 19

2.3 Biomass Sampling and Biomass Burning Experiment 19

2.3.1 Biomass samples detail 21
2.3.2 Biomass sampling 21
2.3.3 Open burning simulation 22
2.4 Analysis of $PM_{2.5}$ and Ash Samples from BB 25
2.4.1 $PM_{2.5}$ sample extraction 25
2.4.2 Ash samples extraction 25
2.5 Analysis of $PM_{2.5}$ and Ash Samples by ICP-OES 26
2.5.1 Method validation 26
2.5.2 Elemental analytical framework 26
2.5.3 Accuracy of the analysis method 27
2.5.4 Standard preparation for standard calibration curve 28
2.5.5 Performance of the ICP-OES 28
2.6 Calculation of Emission Factor (EF) 30
2.6.1 EF of $PM_{2.5}$ from biomass burning 30
2.6.2 EFs of elements in $PM_{2.5}$ and ash emitted from BB 32
2.7 Data Analysis 32
Chapter 3 Results and Discussion 33
3.1 Performance of Analysis Method by ICP-OES 33
3.1.1 Accuracy of the method for elemental analysis 33
3.1.2 Performance of the ICP-OES 35
3.1.3 Standard calibration curves 38
3.2 Emission of $PM_{2.5}$ from Biomass Burning 40
3.2.1 Emission of $PM_{2.5}$ and its elemental composition from rice straw burning 42
3.2.2 Emission of $PM_{2.5}$ and its elemental composition from MR burning 45
3.2.3 Emission of $PM_{2.5}$ and its elemental composition from DDF burning 49
3.2.4 Emission of $PM_{2.5}$ and its elemental composition from MDF burning 52
3.2.5 Comparison of $PM_{2.5}$ and its elemental composition emitted from BB 54
3.3 Elemental Composition of Ash Samples from BB 60
3.3.1 Composition of ash sample from RS burning 60
3.3.2 Composition of ash sample from MR burning 62
3.3.3 Composition of ash sample from DDF burning 64

3.3.4 Composition of ash sample from MDF burning 66
3.3.5 Elemental composition of ash samples from BB 68

Chapter 4 Conclusion 73

References 75

Appendices 86

Appendex A 87
Appendex B 90
Appendex C 93

# LIST OF TABLES

Page

Table 1.1 Overview of closed and open system combustion chambers 15

Table 2.1 Information about biomass samples locations and code 20

Table 2.2 specification of selected acidic conditions for optimizing ash extraction condition 26

Table 3.1 Recoveries of elements obtained from spiked solution concentration and CRM 34

Table 3.2 Repeatability of instrument measured from mixed elements standard 36

Table 3.3 Limits of detection and quantification of ICP-OES for each element 37

Table 3.4 Linear equation of calibration curve with coefficient of determination 39

Table 3.5 EFs of $PM_{2.5}$ (mean ± SD) of biomass types by location 41

Table 3.6 Overall details about RS burning experiments 43

Table 3.7 EFs of elements (mean ± SD) of $PM_{2.5}$ emitted from RS burning 44

Table 3.8 Overall details about MR burning experiments 46

Table 3.9 EFs of elements (mean ± SD) of $PM_{2.5}$ emitted from MR burning 47

Table 3.10 Overall details about DDF burning experiment 49

Table 3.11 EFs of elements (mean ± SD) of $PM_{2.5}$ emitted from DDF burning 50

Table 3.12 Overall details about MDF burning experiments 52

Table 3.13 EFs of elements (mean ± SD) of $PM_{2.5}$ emitted from MDF burning 53

Table 3.14 EFs of $PM_{2.5}$ and its elemental composition (mean ± SD) 57

Table 3.15 EF of Elemental composition of ash remained from RS burning 61

Table 3.16 EF of Elemental composition of ash remained from MR burning 63

Table 3.17 EF of Elemental composition of ash remained from DDF burning 65

Table 3.18 EF of Elemental composition of ash remained from MDF burnin 67

Table 3.19 Comparing elements in composition of ash of various biomasses 71

## LIST OF FIGURES

Page

Figure 1.1 Particle deposition in the lunch based on their size, (Pražnikar & Pražnikar, 2012) 6

Figure 1.2 Size comparison for PM particles (https://www.epa.gov/pm-pollution/particulate-matter-pm-basics). 8

Figure 1.3 Diagram of stainless-steel chamber (Sillapapiromsuk, et al., 2012; Wiriya, *et al.*, 2016) 11

Figure 1.4 Schematic view of Self-designed combustion stove constructed by Zhang, et al., (2011) 12

Figure 1.5 Diagram of combustion chamber for BB and sampling of PM constructed by Amaral et al., (2014) 13

Figure 2.1Diagram of the research plan and processes 19

Figure 2.2 Biomass sampling grids (2m x 2m) (Chantara et al., 2017) 21

Figure 2.3 Sampling process of agricultural residues, (a) 2 m x 2 m grid for biomass sampling, and (b) rice straw sample (Chantara et al., 2017) 22

Figure 2.4 Open burning simulation, (a) dried biomass in burning tray, and (b) burning process 22

Figure 2.5 Diagram of Open-system combustion chamber (Chantara et al., 2017) 23

Figure 2.6 $PM_{2.5}$ sampling process during open burning simulation, (a) $PM_{2.5}$ samplers, and (b) Quarts fiber filter after sampling 24

Figure 2.7 Ash sampling after open burning, (a) ash remained in the burning tray of the chamber, and (b) Sieved and packed ash samples (Chantara et al., 2017) 24

Figure 2.8 (a) Microbalance, and (b) double layer Teflon digestive bomb 25

Figure 2.9 Flow chart of analytical method for elemental analysis by ICP-OES 27

Figure 3.1 Examples of linearity calibration curves for Al and K 38

Figure 3.2 Examples of standard calibration curves of Al and As 38

Figure 3.3 EF of $PM_{2.5}$ from burning of four biomass types 42

# LIST OF ABBREVIATION

| | |
|---|---|
| BB | Biomass Burning |
| CRM | Certified Reference Material |
| DDF | Dry Dipterocarps forest |
| DF | Dilution Factor |
| ECRL | Environmental Chemistry Research Laboratory |
| FP | Filter paper |
| g | Gram |
| GBD | Global Burden Disease |
| ICP-OES | Inductively coupled plasma optical emission spectroscopy |
| kg | Kilogram |
| ml | Milliliter |
| MR | Maize Residues |
| MDF | Mixed Deciduous forest |
| $PM_{2.5}$ | Particulate Matter (diameter less than 2.5 micrometer) |
| $PM_{10}$ | Particulate Matter (diameter less than 10 micrometer) |
| ppm | Part per million |
| ppt | Part per thousand |
| r | Correlation coefficient |
| $R^2$ | Coefficient of determination |
| RS | Rice straw |
| SEA | Southeast Asia |
| UNT | Upper Northern Thailand |
| US EPA | United States Environmental Protection Agency |
| WHO | World Health Organization |
| µg/ml | Microgram per milliliter |
