ACKNOWLEDGEMENTS

I would like to extend my appreciation to the faculty and staff at Faculty of Medicine, Chiang Mai University who have supported me over the past 6 years. I am especially grateful to my advisor, Asst. Prof. Dr. Nuanlaor Thawinchai, Asst. Prof. Montana Buntragulpoontawee, and Assoc. Prof. Dr. Wantana Siritaratiwat, for careful attention to detail and excellence in research has raised my standards of achievement to a new level.

I would like to thank the other examining committee: Prof. Areerat Suputtitada, Assoc. Prof. Siam Tongprasert, and Asst. Prof. Dr. Apichat Tantraworasin, for their encouragement, and valuable comments.

I acknowledge all the participants and their parents. I also acknowledge the directors, and staff at the Rajanagarindra Institute of Child Development, Chiang Mai Province, Srisangwanchiangmai School, Srisangwankhonkaen School, Special Education Center Region 7, Special Education Center Region 8, and Special Education Center Region 9, for their contributions.

The studies in this thesis were partially funded by The Graduate School, Chiang Mai University.

Permission for reproduction was attained from The Editorial Office of Journal of Child Neurology (chapter 4), The Editorial Office of Disability and Rehabilitation (chapter 4), and The Editorial Office of Journal of the Medical Association of Thailand (chapter 5).
