ACKNOWLEDGEMENT

Foremost, I would like to express a great debt of gratitude to my advisor, Asst. Prof. Dr. Yuthana Phimolsiripol for his invaluable advice and unreserved support throughout my graduate study and research work. His patience and kindness always encourage me in many difficult times to go ahead with the project.

Similarly, I wish to express my sincere gratitude to my examining committees, Assoc. Prof. Dr. Narumol Matan and Dr. Pilairuk Intipunya for their expert comments and suggestions.

I also deeply acknowledge professors and staffs of Agro-Industry Faculty in general and of Food Science and Technology Division in particular for providing me a lot of useful knowledge, valuable hints and fruitful discussion at different stages of my work.

In addition, I am particularly grateful to all professors and technicians of plasma laboratory (TKRCC) for the warm reception and committed assistance for my experiments. Many thanks as well to all of my friends from the faculties including Agro-Industry, Engineering, Science and Agriculture for their kind help in any respects from the initial to the end of my study.

Lastly, I would like to express my deepest gratitude to my parents and family for their upbringing, endless support and marvelous love which significantly help me to finalize this thesis.

Phan Thi Kim Khanh
