Abstract in English	f
List of Tables	1
List of Figures	s
Chapter 1 Introduction	1
1.1 Principles and rationale	1
1.2 Objectives of the study	2
1.3 Education and application advantages	2
Chapter 2 Literatures Review	3
2.1 Longan	3
2.2 Enzymatic browning of fresh-cut fruits and vegetables	3
2.3 Osmotic dehydration	6
2.4 Application of osmotic dehydration in food processing	6
2.5 Factors affecting osmotic dehydration process	9
2.6 Drying technology	13
2.7 Dehydration kinetics	14
2.8 Packing and storage stability of osmo-dehydrated product	18
2.9 Prediction of shelf life	19
2.9.1 Zero order reaction	21
2.9.2 First order reaction	22
2.9.3 Arrhenius equation	24

CONTENTS (CONT.)

	Page
2.10 Sensory evaluation	25
Chapter 3 Materials and Methods	27
3.1 Phase 1: Formulation of the optimum osmotic solution for drying intermediate moisture longan	27
3.1.1 Formulation of the optimum osmotic solution for intermediate moisture longan	27
3.1.2 Study on osmotic dehydration conditions for production of intermediate moisture longan	27
3.2 Phase 2: Comparison of the effects of hot air drying and vacuum oven drying on the quality of intermediate moisture longan	28
3.3 Phase 3: Determination of the qualities of intermediate moisture longan product using fresh longan compare with frozen longan	28
3.4 Shelf – life evaluation of intermediate moisture longan	29
3.5 Physicochemical properties	29
3.6 Antioxidant capacity	30
3.7 Microbial analysis	31
3.8 Accelerated shelf life testing procedure and kinetics calculations	31
3.9 Sensory evaluation	32
3.10 Statistical analysis	33
Chapter 4 Results and Discussion	34
