ACKNOWLEDGEMENT

I offer my most sincere gratitude to my supervisor, Prof. Dr. Suthep Suantai, who has supported me throughout my thesis with his patience and knowledge. His advice and encouragement enabled me to complete this thesis successfully.

This work contains a number of improvements based on comments and suggestions provided by Prof. Dr. Suthep Suantai, Asst. Prof. Dr. Prasit Cholamjiak and Asst. Prof. Dr. Phakdi Charoensawan. It is my pleasure to express my faithful thanks to them for their generous assistance.

Finally, I would like to express my special thanks to my family and friends in the Department of Mathematics at Chiang Mai University who always support and encourage me in many ways. Moreover, I would like to thank the graduate program at Chiang Mai University, the Development and Promotion for Science and Technology Talents Project (DPST) and Thailand research fund under the project RTA5780007 for financial support.
