Abstract in Thai	e
Abstract in English	g
List of Tables	k
List of Figures	l
List of Abbreviations	m
Chapter 1 Introduction	1
1.1 Rationale	1
1.2 Purpose of the study	4
1.3 Hypotheses of the study	4
Chapter 2 Literature review	5
2.1 Gait assessment	5
2.2 Tri-axial accelerometer	7
2.3 The use of smartphones to measure gait	12
Chapter 3 Methods	16
3.1 Participants	16
3.2 Procedures	17
3.3 Data acquisition	19

3.4 Outcome measures	20
3.5 Equipment	21
3.6 Sample size calculation	21
3.7 Statistical Analysis	21
3.8 Data collection location	22
Chapter 4 Results	23
4.1 Participants characteristics	23
4.2 Concurrent validity of measurements	24
4.3 Gait parameters derived from the smartphone-based accelerometer and GAITRite across smartphone locations	29
Chapter 5 Discussion	31
Conclusions	33
References	34
Appendices	39
Appendix A General questionnaire	40
Appendix B Consent form	42
Appendix C Information sheet	43
Appendix D Certificate of ethical clearance	47
Curriculum vitae	49

## LIST OF TABLES

	Page
Table 4.1 Demographic characteristics of the participants	23
Table 4.2 The validity of the step length, step time, and gait velocity across smartphone locations	25
Table 4.3 Gait parameters derived from two equipment across smartphone locations	30

## LIST OF FIGURES

	Page
Figure 2.1 Examples of the raw accelerations measured at the level of the head, thoracic, and lumbar spine during walking at a preferred speed of 1.20 m/s	9
Figure 2.2 Vertical acceleration over one stride. The vertical acceleration pattern is repeated twice for each gait cycle with a similarity of specific events (indicated by arrows) between right and left steps	9
Figure 2.3 Bland-Altman plots of all averaged gait parameters across four walking trials at preferred walking speed. Solid line systematic bias; dashed lines limits of agreements	11
Figure 2.4 SmartGait system and its various hardware components and a participant wearing the SmartGait	13
Figure 2.5 Carrying a mobile phone in the pocket, belt, hand, or bag	15
Figure 3.1 Location of smartphone	18
Figure 3.2 Flow chart of the study procedures	19
Figure 4.1 Bland-Altman plots for step length, when using the smartphone-based accelerometer compared to GAITRite	26
Figure 4.2 Bland-Altman plots for step time, when using the smartphone-based accelerometer compared to GAITRite	27
Figure 4.3 Bland-Altman plots for gait velocity, when using the smartphone-based accelerometer compared to GAITRite	28

## LIST OF ABBREVIATIONS

yr	Year
m	Meter
s	Second
cm	Centimeter
mm	Millimeter
g	Gram
kg	Kilogram
BMI	Body Mass Index
SD	Standard Deviation
COM	Center of Mass
LOA	Limits of Agreement
