ACKNOWLEDGEMENT

I would like to express my sincere thanks to my thesis advisor, Asst. Prof. Dr. Duangporn Pichpol for her invaluable suggestions and encouragement throughout the period of this research. I am most grateful for her teaching and advice on research methodologies and techniques performed in microbiology testing. Her close attention to my working life and my career path are very much appreciated. I would not have achieved this far and this thesis would not have been completed without all the support that I have always received from her.

I would like to extend my sincere thanks to the initiator of the double international program of Master of Public Health in One Health, Assoc. Prof. Dr. Lertrak Srikitjakarn, Dean of the Faculty of Veterinary Medicine, Asst. Prof. Dr. Khwanchai Kreausukon and my general advisor, Asst. Prof. Dr. Kannika Na Lampang for giving the opportunity for continuing education, coordination with overseas partner and providing full scholarship for pursuing the pioneer master program in One Health.

I most gratefully acknowledge my supervisor, Dr. Tongkorn Meeyam for her close attention on my education and my working life. Without her support and understanding, my thesis could not be completely accomplished. Furthermore, I also sincerely thank to the *Campylobacter jejuni* risk assessment team, Asst. Prof. Dr. Duangporn Pichpol, Dr. Tongkorn Meeyam, Dr. Warangkhan Chaisowwong, Asst. Prof. Dr. Fernando Sampedro, and Ms. Phakamas Ngamsanga for their research contribution.

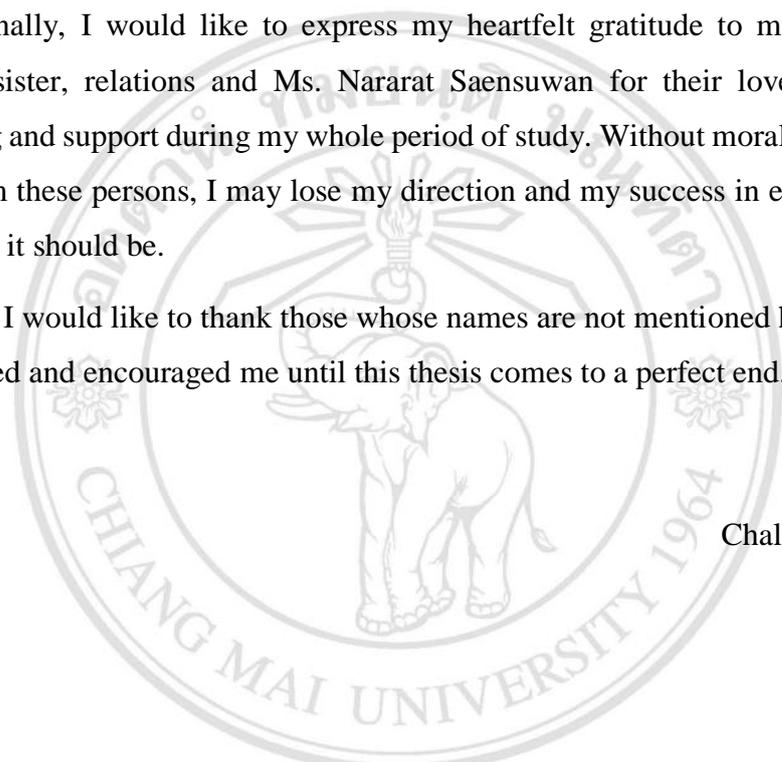

I am grateful for my co-advisor, Prof. Dr. Scott J. Wells, the School of Public Health adjunct professor, Prof. Dr. Will Hueston, the director of the Global One Health - CMU (iMPH), Asst. Prof. Dr. Katherine Waters, and Public Health Practice Coordinator, Kate Hanson from the University of Minnesota (UMN) Twin Cities for their kind supports on pursuing the Master of Public Health program, attending the public health master courses, and suggestions of the university education processes including coursework, field practice and thesis.

Special thanks go to the owners of backyard slaughterhouses, managers and workers of commercial slaughterhouses for their hospitality and kindness for giving information regard to their managements and consent to taking carcass samples. Besides, I would also like to extend my sincere thanks to all slaughterhouse managers, owners, quality control workers who attended the workshop on poultry meat safety for their collaboration and dedication of their off-hour for expressing valuable opinions.

Additionally, I would like to express my heartfelt gratitude to my family, my parents, my sister, relations and Ms. Nararat Saensuwan for their love, dedication, understanding and support during my whole period of study. Without morale support and guidance from these persons, I may lose my direction and my success in education may not smooth as it should be.

Finally, I would like to thank those whose names are not mentioned here, but have greatly inspired and encouraged me until this thesis comes to a perfect end.

Chalita Jainonthee
