Abstract vi

List of Tables ix

List of Figures xi

Chapter 1 Introduction 1

1.1 Research Objectives 3

1.2 Usefulness of the Research 3

Chapter 2 Literature Review 4

2.1 Basics in Astronomical Observation 4

2.2 Galaxies and Group of Galaxies 7

2.3 Galaxy Morphological Classification 8

2.4 Interactions 10

Chapter 3 Methodology 15

3.1 The Observations 15

3.2 Image Reduction Pipeline 17

3.3 Image Photometry 22

3.4 Hydrogen Alpha Equivalent Width 28

3.5 Galaxy Morphological Classification 33

Chapter 4 Results 35

4.1 Characteristics of the Targets 35

4.2 Color Indices and B_{25} Magnitude 35
4.3 Color Indices and *T-Type* 38
4.4 Color Indices and $EW(H\alpha)$ 41
4.5 $EW(H\alpha)$ and *T-Type* 42
4.6 Ongoing Star Formation in UGC07049 43
4.7 Tidal Interaction Approximation 45

Chapter 5 Conclusions 47
5.1 Future Works 48

Bibliography 49

Appendix A Imaging Data 52

Appendix B Publication & Conferences 55
B.1 APRIM 2014 55
B.2 SPC 2015 58

Curriculum Vitae 61

LIST OF TABLES

Page

Table 3.1 The sample of galaxies in NGC 4065 group with position and redshift 18
Table 3.2 Zero point and σ(ZP) in each filter 25
Table 3.3 B, V and R instrument magnitude 28
Table 3.4 The CR values and its errors for each pointing 31
Table 3.5 The Hubble sequence, De Vaucouleurs system and their equivalent *T-Type* number 34

Table 4.1 The parameters of the galaxies in NGC 4065 group 36
Table 4.2 Color Index Variations of the galaxies in NGC 4065 group in B, V and R_C filters 41

Table A.1 Sample images of the galaxies in NGC 4065 group in B, V, R_C and [SII] filters 52
Table A.2 Sample images of the galaxies in NGC 4065 group in B, V, R_C and [SII] filters (continue I) 53
Table A.3 Sample images of the galaxies in NGC 4065 group in B, V, R_C and [SII] filters (continue II) 54

LIST OF FIGURES

Page

Figure 1.1 The total intensity of HI emission. 2

Figure 2.1 Image of the NGC 4076 in B band with 16-bit monochrome level. 4
Figure 2.2 Transmission of B-, V-, R_C-, Red-continuum and [SII] filters. 5
Figure 2.3 The classification of the star type along Morgan-Keenan system. 7
Figure 2.4 Edwin Hubble's classification scheme of the elliptical galaxies and the spiral galaxies. 8

Figure 3.1 The area of NGC 4065 group overlaid with our ten observation points. 17
Figure 3.2 The parameters used in the "darkcombine" task to obtain the master dark frame. 19
Figure 3.3 One of the 11 dark frame images before using "darkcombine" and the master dark frame after using "darkcombine". 20
Figure 3.4 The count distribution of an individual dark frame and the master dark along the x-axis. 20
Figure 3.5 The parameters used in "flatcombine" task to obtain master flat frame in each filter. 21
Figure 3.6 One of the 11 flat frame image before using "flatcombine" and the image of the master flat frame after using "flatcombine". 21
Figure 3.7 The raw scientific imaging data before applying the image reduction process along with cleaned image. 22
Figure 3.8 The aperture photometry GUI from GAIA astronomical tool. 23
Figure 3.9 Comparison of the normalized throughput between the observation filter and the catalog filter. 26
Figure 3.10 The brightness profile of NGC 4070, one of our sample galaxies. 27
Figure 3.11 Transmissivity of [SII] narrowband filter. 32

Figure 3.12 The galaxy classification along the Hubble sequence. 34

Figure 4.1 Plot between color indices and absolute magnitude M_B. 37
Figure 4.2 The plot between color indices and absolute magnitude M_V 37
Figure 4.3 The plot between color indices and absolute magnitude M_R 38
Figure 4.4 The plot between $B-V$ color and $T\text{-}Type$. 39
Figure 4.5 The plot between $B-R$ color and $T\text{-}Type$. 40
Figure 4.6 The plot between $V-R$ color and $T\text{-}Type$. 40
Figure 4.7 The plot between $EW(\mathrm{H}\alpha)$ and $B-V$ color. 41
Figure 4.8 The plot between $EW(\mathrm{H}\alpha)$ and $B-R$ color. 42
Figure 4.9 The plot between $EW(\mathrm{H}\alpha)$ and $V-R$ color. 43
Figure 4.10 The plot between $EW(\mathrm{H}\alpha)$ and $T\text{-}Type$. 44
Figure 4.11 The image of UGC07049 in R band overlaid with the contours of HI density. 45
Figure 4.12 The mass-to-light ratio versus $B-R$ color index. 46
