ACKNOWLEDGEMENT

I offer my most sincere thanks to my supervisor, Asst.Prof.Dr. Sompop Moonchai, for giving me useful guidance, suggestion and constant encouragement throughout this thesis.

My special appreciation is expressed to the examining committee Assoc.Prof.Dr. Grienggrai Rajchakit and Asst.Prof.Dr. Kanyuta Poochinapan for their valuable comments and generous assistance while completing my program.

I wish to thank all lecturers for their previous valuable lectures during my study at the Department of Mathematics at Chiang Mai University. I also thank all of my friends who always support and encouragement me in many ways.

I am particularly indebted to the Science Achievement Scholarship of Thailand (SAST) for financial support.

Finally, I must express my very profound gratitude to my parents and my sister for providing me with unfailing support and continuous encouragement throughout my years of study and through the process of researching and writing this thesis. This accomplishment would not have been possible without them. Thank you.
