THIS THESIS HAS BEEN APPROVED TO BE A PARTIAL FULFILLMENT
OF THE REQUIREMENTS FOR THE DEGREE OF
DOCTOR OF PHILOSOPHY
IN BIOCHEMISTRY

Examination Committee:

Chitchamai Ovatlarnporn Chairman
(Asst. Prof. Dr. Chitchamai Ovatlarnporn)

P. Dejkrakraikul Member
(Prof. Dr. Pornngarm Dejkrakraikul)

Ratana Banjerdpongchai Member
(Assoc. Prof. Dr. Ratana Banjerdpongchai)

Supachai Yodkeeree Member
(Asst. Prof. Dr. Supachai Yodkeeree)

P. Pitchakarn Member
(Dr. Pornsiri Pitchakarn)

Advisory Committee:

P. Dejkrakraikul Advisor
(Prof. Dr. Pornngarm Dejkrakraikul)

Supachai Yodkeeree Co-advisor
(Asst. Prof. Dr. Supachai Yodkeeree)

P. Pitchakarn Co-advisor
(Dr. Pornsiri Pitchakarn)

ACKNOWLEDGEMENT

This thesis would not have been possible without the help and support of many individuals around me, with whom I am very grateful to share this journey.

First and foremost, I would like to express my special thanks to the Faculty of Medicine (Chiang Mai University, Thailand) for the kindly financial support for my Ph.D journey and Department of Biochemistry, Chiang Mai University for providing with a good environment and facilities to complete this thesis.

I would like to express my sincere gratitude to my supervisor and mentor, Professor Dr. Pornngarm Dejkriengkraikul, whose constant guidance and encouragement helped me to complete this project. Thank you for giving me this opportunity to work in your laboratory. I also want to thank my co-advisors, Assistant Professor Dr. Supachai Yodkeeree and Dr. Pornsiri Pitchakarn, whose supervision and immense knowledge on this subject helped me to develop an understanding of the many questions we were trying to answer through this work.

Also, I would like to express my thanks to all past and present members of our group for helping me to learn different laboratory techniques, supporting and encouraging me during those long, dark days and nights when experiments did not go according to plan. Special thanks to Dr. Wanisa Punfa, Mr. Sonthaya Umsumarng, Ms. Sariya Mapoung and Ms. Pattaman Wongsirisin for their advice and great help throughout the project. Thank you all for the endless cups of coffee and tea and the stimulating discussions regarding the project.

Many thanks to all participating patients for their cooperation in the study and I really appreciate their willingness. Without their contributions, this research work would not have been possible. We are grateful to the doctors and pathologists who helped recruit the subjects for our study.

Last, but not the least, I wish to put on record my great appreciation to my parents for their unconditional love, belief and encouragement throughout my life. I also thank my husband for his smiles, laughter and support in helping me to keep a balance between work and family life. I offer my regards to all of those who associated with any respect during the achievement of my thesis.
