Abstract in Thai	e
Abstract	f
List of Tables	i
List of Figures	j
Chapter 1 Introduction	1
1.1. Rational	1
1.2. Research objectives	5
1.3. Research scope	5
1.4. Research location	6
1.5. Usefulness and application of the research	6
Chapter 2 Hydrothermal synthesis and characterization	7
2.1. Hydrothermal procedure	7
2.2. Material characterization	8
2.2.1. Crystal structure of TiO <sub>2</sub>	8
2.2.2. Energy band of TiO <sub>2</sub>	9
2.3. Charge recombination mechanism	12
2.4. Growth mechanisms of TiO <sub>2</sub> NRs	14
2.5. Effect of seed layer on TiO <sub>2</sub> nanorods	16
2.6. Application in Perovskite and dye solar cells	19
2.6.1 Perovskite solar cell (PSCs)	19
2.6.2 Dye-sensitized solar cell (DSSCs)	20
Chapter 3 Methodology	21
3.1. Preparation of seed layers	21
3.2. Hydrothermal Synthesis of TiO <sub>2</sub> NRs	22
Chapter 4 Results and discussions	25
4.1. Effect of Seed layer	25
4.1.1. Characterization of morphology by field emission scanning electron microscopy (FE-SEM)	25

4.1.2. Characterization of crystallinity by X-ray diffraction (XRD)	27
4.2. Effect of calcination at high temperature	29
4.2.1 Characterization of morphology by field emission scanning electron microscopy (FE-SEM)	29
4.2.2 Characterization of crystallinity by X-ray diffraction (XRD)	31
4.3. Effect of precursor concentration	32
4.3.1 Characterization of morphology by field emission scanning electron microscopy (FE-SEM)	32
4.3.2 Characterization of crystallinity by X-ray diffraction (XRD)	35
4.3.3 Optical Characterization by UV-vis spectroscopy (UV-VIS)	37
4.4. Effect of hydrothermal reaction time	40
4.4.1. Characterization of morphology by field emission scanning electron microscopy (FE-SEM)	40
4.4.2. Characterization of crystallinity by X-ray diffraction (XRD)	45
4.4.3 Structural characterization by transmission electron microscopic (TEM)	46
Chapter 5 Conclusion	53
5.1 Synthesis and characterization of well-aligned TiO <sub>2</sub> NRs	53
5.2. Suggestions and future perspectives	55
5.2.1 Suggestions	55
5.2.2 Future perspective	55
References	57
List of Publication	61
Curriculum vitae	62

## LIST OF TABLES

	Page
Table 3.1 Effect of TiO <sub>2</sub> seed layer on the growth of TiO <sub>2</sub> NRs	23
Table 3.2 Effect of calcination treatment at high temperature on morphology and size of TiO <sub>2</sub> NRs	24
Table 3.3 Hydrothermal synthesis of TiO <sub>2</sub> NRs at different hydrothermal times	24
Table 4.1 Average diameter and length of TiO <sub>2</sub> NRs at various TBO concentrations	33
Table 4.2 Band gap energy of TiO <sub>2</sub> depending on phase structure and approach.	38
Table 4.3. Average diameter and length of 0.7% TBO TiO <sub>2</sub> NRs at various times.	42
Table 4.4 Average diameter and length of 1.0 % TBO TiO <sub>2</sub> NRs at various times	42

## LIST OF FIGURES

	Page
Figure 1.1 Band diagram of perovskite solar cell	4
Figure 2.1 Molecular structures of $\text{TiO}_2$ (a) rutile and anatase (b)	9
Figure 2.2 The DOS and band structures of anatase (a) and rutile(b) $\text{TiO}_2$ with Fermi level shown by a dashed line	11
Figure 2.3 Recombination processes of photoexcited electrons and holes within indirect gap anatase and direct gap rutile (b)	13
Figure 2.4 Formation of the $\text{TiO}_6$ octahedra from protonation	15
Figure 2.5 (a) Face-sharing octahedra of anatase (b) and edge-sharing octahedra of rutile	16
Figure 2.6 FE-SEM and TEM images of the $\text{TiO}_2$ NRs. (a,c) and (b,d) are images of the $\text{TiO}_2/\text{FTO}$ and $\text{TiO}_2/\text{SLs}/\text{FTO}$	17
Figure 2.7 (a) UV-Vis transmittance spectra of the bare FTO, SLs/FTO, $\text{TiO}_2$ NRs/SLs/FTO and $\text{TiO}_2$ NRs/FTO grown by hydrothermal method using 1.0 mL of Ti precursor. (b) X-ray diffraction patterns of the $\text{TiO}_2$ NRs/SLs/FTO, $\text{TiO}_2$ NRs/FTO, and FTO	18
Figure 2.8 Diagram of the dye adsorption and electron transport of the $\text{TiO}_2$ NRs grown on bare and seeded-FTO	19
Figure 3.1 Phase diagram of seed layer preparation	22
Figure 3.2 Phase diagram of hydrothermal synthesis	23
Figure 4.1 Cross section FE-SEM images of (a) FTO (b) seed on FTO (c) 1.0% $\text{TiO}_2$ NRs on FTO (d) 1.0% $\text{TiO}_2$ NRs on seed layers. (e) Top view FE-SEM images of 1.0% TBO NRs on FTO (b) Top view FE-SEM images 1.0% TBO NRs on seed layers	26
Figure 4.2 XRD patterns of bare FTO and seed layers on FTO	27
Figure 4.3 XRD patterns of 1.0% TBO $\text{TiO}_2$ NRs on bare FTO and $\text{TiO}_2$ NRs on Seed/FTO	28

Figure 4.4	Cross section FE-SEM images of (a) non calcined 0.7% TBO TiO <sub>2</sub> NRs (b) calcined 0.7% TBO TiO <sub>2</sub> NRs, Top view FE-SEM images of (c) non calcined 0.7% TBO NRs (d) calcined 0.7% TBO NRs (e) non calcined 1.0 % TBO NRs (f) calcined 1.0% TBO NRs	31
Figure 4.5	XRD patterns of 0.7% TBO TiO <sub>2</sub> NRs that non calcined and calcined	31
Figure 4.6	XRD patterns of 0.7% TBO TiO <sub>2</sub> NRs that non calcined and calcined	31
Figure 4.7	Top view FE-SEM images of TiO <sub>2</sub> nanorods using titanium IVbutoxide (TBO) (a)0.3 %, (b)0.5 %, (c)1.0 %, (d) 1.5%	32
Figure 4.8	Cross-section view and top view FE-SEM images of TiO <sub>2</sub> nanorods using titanium IV butoxide (TBO) (a,b) 0.3%, (c,d) 0.5% (e, f) 0.7%, (g,h) 1.0 %	34
Figure 4.9	XRD pattern of synthesized TiO <sub>2</sub> NRs on TiO <sub>2</sub> seed layer prepared on FTO substrate (a) at various TBO precursors (0.3-1.0% TBO) against TiO <sub>2</sub> seed layer and (b) at 0.7 % TBO and 1.0 %TBO	36
Figure 4.10	(a) UV-VIS transmittance spectra of bare FTO and TiO <sub>2</sub> NRs grown seeded-FTO substrates at different TBO concentration (b) Relation between and of TiO <sub>2</sub> NRs with varying concentrations of TBO at 0.3% -1.0%.	37
Figure 4.11	Cross-section view and top view FE-SEM images of 0.7% TiO <sub>2</sub> NRs obtained by hydrothermal reaction at (a,b)1 h, (c,d) 1.5h and(d,f) 2 h	40
Figure 4.12	Cross-section view and top view FE-SEM images of 1.0% TiO <sub>2</sub> NRs obtained by hydrothermal reaction at (a,b)1 h, (c,d) 1.5h and(d,f) 2 h	41

Figure 4.13 Phase diagram of HCl role in rutile growth mechanism. where R is the component of Ti(IV)-butoxide named butyl- group with the general formula $C_4H_9$	44
Figure 4.14 XRD pattern of (a) 0.7% TBO $TiO_2$ NRs with reaction time 1 h, 1.5 h and 2 h (b) 1.0% TBO $TiO_2$ NRs with reaction time 1 h, 1.5 h and 2 h.	45
Figure 4.15 XRD pattern of 0.7% TBO $TiO_2$ NRs with reaction time 1 h and 4 h.	46
Figure 4.16 Image of 0.7% TBO $TiO_2$ NRs hydrothermal for 1.5 h (a) TEM (b) High resolution transmission electron microscope (HRTEM) of figure a (c) Selected area electron diffraction patterns (SAED) of (110) plane	48
Figure 4.17 Image of 1.5 h hydrothermal of 1.0% TBO $TiO_2$ NRs (a,d) TEM (b) High resolution transmission electron microscope (HRTEM) of a area (c) Selected area electron diffraction patterns (SAED) of a area (e) HRTEM of b area (f) SAED of b area	49
Figure 4.18 Dominant planes of rutile $TiO_2$ structure; (a) (110) plane in 3D space (b) (110) plane in [001] direction (c) (101) plane in 3D space (d) (101) plane in [010] direction (e) (002) plane in 3D space (f) (002) plane in [010] direction	51
Figure 4.19 Dominant planes of rutile $TiO_2$ structure; (a) (110) plane in [110] direction (b) orientation of (110) plane (c) (101) plane in [010] direction (d) orientation of (101) plane (e) (002) plane in [010] direction (f) orientation of (002) plane	52
