ACKNOWLEDGEMENT

I would first like to express my sincere gratitude to my advisor Assoc. Prof. Dr. Suchart Kothan, for his continuous support and patience while doing this research. His immense knowledge, the motivation he instilled, and the advice he provided me on both research and career matters was priceless. I would also like to thank my co-advisors Asst. Prof. Dr. Sirirat Chunchcharunee and Asst. Prof. Dr. Montree Tungjai, for their insightful comments and encouragement. Without their assistance and dedicated involvement, this thesis would have never been accomplished.

I would also like to acknowledge the Department of Radiologic Technology, Faculty of Associated Medical Sciences, Chiang Mai University, Chiang Mai, for providing scholarship funding and research facilities. Special thanks are in order for the cooperation and participation of the subjects that were used in this study, as well as the members and staffs of the AMS Clinical service center, Chiang Mai University for their continued support.

Most importantly, none of this could have happened without the unceasing encouragement that I received from my parents and, the continual support from my friends throughout my years of study and during the process of researching and writing this thesis.

I would also like to extend, my gratitude to everyone that I have failed to mention, who directly or indirectly, have assisted me in this venture.

Duanghathai Pasanta
