

บรรณานุกรม

1. ประดิษฐ์ เทอดทูล. *ท่อความร้อน*. เชียงใหม่ : ภาควิชาวิศวกรรมเครื่องกล. คณะวิศวกรรมศาสตร์ มหาวิทยาลัยเชียงใหม่. 2536.
2. ประดิษฐ์ เทอดทูล. *การเดือด*. เชียงใหม่ : ภาควิชาวิศวกรรมเครื่องกล. คณะวิศวกรรมศาสตร์ มหาวิทยาลัยเชียงใหม่. 2544.
3. นำพร ปัญญาใหญ่. *ผลของจำนวนโค้งเลี้ยวและอัตราส่วนพื้นที่ที่มีผลต่อรูปแบบการไหลภายในท่อความร้อนแบบสันปลายปิดที่สภาวะวิกฤติ*. วิทยานิพนธ์วิศวกรรมศาสตรมหาบัณฑิต (วิศวกรรมเครื่องกล). มหาวิทยาลัยเชียงใหม่. 2547.
4. Akachi, H., Polasek, F., and Stulc, P., *Pulsating Heat Pipe*. Procs. of the 5th International Heat Pipe Symposium. Melbourne Australia., pp. 208-217, 1996.
5. Charoensawan, P., Terdtoon, P., Tantakom, P., Ingsuwan, P., and Groll, M., *Effect of Inclination Angle, Filling Ratios and Total Lengths on Heat Transfer Characteristics of a Closed-Loop Oscillating Heat Pipe*. Procs. of the 6th International Heat Pipe Symposium. Chiang Mai Thailand., pp. 422-430, 2000.
6. Charoensawan, P., Terdtoon, P., Tantakom, P., and Ingsuwan, P., *Effect of Evaporator Section Lengths, Number of Turns and Working Fluid on Internal Flow Patterns of a Vertical Closed-Loop Oscillating Heat Pipe*. Procs. of the 7th International Heat Pipe Symposium. Jeju Korea., pp. 360-367, 2003.
7. Dobson, R.T., and Graf, G., *Thermal Characterisation of an Ammonia-charged Pulsating Heat Pipe*. Procs. of the 7th International Heat Pipe Symposium. Jeju Korea., pp. 325-330, 2003.
8. Dunn, P., and Reay, D.A., *Heat Pipes*. 3rd Edition., Pergamon Press. Oxford England., 1982.
9. GI, K., Sato, F., and Maezawa, S., *Flow Visualization Experiment on Oscillating Heat Pipe*. Procs. of the 11th International Heat Pipe Conference, Tokyo Japan., pp. 373-377, 1999.

10. Kammuang-lue, N., Charoensawan, P., Ritthidech, S., Budhajan, K., and Terdtoon, P. ***Effect of Working Fluids on Heat Transfer Characteristics of Closed-Loop Pulsating Heat Pipe at Critical State.*** Procs. of the 1st International Seminar on Heat Pipe and Heat Recovery System. Kuala Lumpur Malaysia., pp. 96-102, 2004.
11. Kammuang-lue, N., ***Performance limit of closed-loop pulsating heat pipe.*** Thesis for Ph.D of Engineering in Mechanical Engineering. Chiang Mai University., 2008.
12. Katpradit, T., Kamonpet, P., Wongratanaphisan, T., and Terdtoon, P., ***Effect of Number of Turns and Working Fluids on Heat Transfer Characteristics of A Closed-End Oscillating Heat Pipe at Critical State.*** Procs. of the 7th International Heat Pipe Symposium. Jeju Korea., pp. 368-372, 2003.
13. Lee, W., Jung, H., Kim, J., and Soo Kim, J., ***Flow Visualization of Oscillating Capillary Tube Heat Pipe.*** Procs. of the 11th International Heat Pipe Conference. Musashinoshi Tokyo Japan., pp. 355-360, 1999.
14. Lee, W., Jung, H., Kim, J., and Soo Kim, J., ***Characteristics of Pressure Oscillation in Self-excited Oscillating Heat Pipe based on Experimental Study.*** Procs. of the 6th International Heat Pipe Symposium. Chiang Mai Thailand., pp. 394-403, 2000.
15. Lin, L., Ponnappan, R. and Leland, J., ***Experimental Investigation of Oscillating Heat Pipe.*** 35th Energy Conversion Engineering Conference and Exhibit. Vol. 2 ., pp. 827-834, 2000.
16. Maezawa, S., Gi, K.Y., Minamisawa, A., and Akachi, H., ***Thermal Performance of Capillary Tube Thermosyphon.*** Procs. of the IX International Heat Pipe Conference. Albuquerque USA. Vol. II., pp. 791-795, 1996.
17. Maezawa, S., ***Heat Pipe: Its Origin, Development and Present Situation.*** Procs. of the 6th International Heat Pipe Symposium. Chiang Mai Thailand., pp. 1-13, 2000.
18. Qu, W., and Ma, H.B., ***Theoretical Analysis of Startup of Pulsating Heat Pipe.*** International Journal of Heat and Mass Transfer ., pp. 1-8 , 2006

19. Ritidech, S., Terdtoon, P., Tantakom, P., Murakami, M., and Jompakdee, W., *Effect of Inclination Angles, Evaporator Section lengths and Working Fluid Properties on heat Transfer Characteristics of A Closed – End Oscillating Heat Pipe*. Procs. of the 6th International Heat Pipe Symposium. Chiang Mai Thailand., pp. 413-420, 2000.
20. Ritidech, S., Terdtoon, P., Murakami, M., Kamonpet, P., and Jompakdee, W., *Effect of Evaporator Section Lengths, Number of Turns and Working Fluid on Internal Flow Patterns of an Closed-End Oscillating Heat at Normal Operating Condition*. Procs. of the 7th International Heat Pipe Symposium. Jeju Korea., pp. 337-342, 2003.
21. Ritidech, S., Terdtoon, P., Murakami, M., Tantakom, P., and Jompakdee, W., *Correlation to predictheat transfer characteristics of a closed-end oscillating heat pipe at normaloperating condition*. Applied Thermal Engineering. Vol. 23., pp. 497-510, 2003.
22. Saponpongpiat. N., Sakulchangajatai. P., Saiseub, M. and Terdtoon,P.,*Time Response Model of OperationalMode of Closed Loop Oscillating Heat Pipe a t Normal Operating Heat pipe*. Procs. of the 8th International Heat Pipe Symposium. Kumamoto Japan., pp. 291-296, 2006.
23. Saponpongpiat. N., Sakulchangajatai. P., Kammuang – lue ,N., and Terdtoon,P., *Investigation of Starting Condition of Closed Loop Oscillating Heat Pipe* (2008) Heat Transfer Engineering.
24. Srihajong, N., Terdtoon,P., Kamonpet, P., Jompakdee, W., and Attabhanyo, R., *Internal Flow Patterns of a Closed-End Oscillating Heat Pipe at Normal Operating Condition: Effect of Internal Friction*. Procs. of the 7th International Heat Pipe Symposium. Jeju Korea., pp. 353-359, 2003.
