Chapter 1 Understanding Cell Fate and Computational Immunology 1

1.1 Introduction 1
1.2 Cell Fate 1
1.3 Computation and Stem Cell Biology and Cell Fate 4
1.4 Cell Cycle and Microenvironment in Cell Fate Determination 5
1.5 T and B Cell Fate Determination 5
1.5.1 T Cell Fate 5
1.5.2 B Cell Fate 6
1.6 Computational Prediction of Stem Cell Fates 7
1.7 Statistical Analysis and Application in Understanding of Stem Cell Fate 7
1.8 Deterministic and Stochastic Models of Cell Fate Choice 7
1.9 Decision Making and Disease 11
1.10 Statistical Analyses and Gene Regulatory Networks (GRNs) 11
1.10.1 Principal Components Analysis (PCA) 12
1.10.2 Partial Least Squares (PLS) Regression and GRNs 12
1.11 Discussions 12
References 12

Chapter 2 Next Generation Sequencing (NGS) and Computational Immunology 19

2.1 Introduction 19
2.2 NGS: A Glimpse through Available Technologies 20
2.3 NGS: Applications of Different Tools and Techniques 23
2.4 NGS and Tools of Data Analysis 24
2.5 NGS Applications 27
2.5.1 Applications in the Immune System 27
2.5.1.1 NGS in TCR Studies 27
2.5.1.2 NGS in BCR Studies 27
2.5.2 Cancer 28
2.5.3 NGS and Microbial Application 29
2.5.4 Infectious Diseases 29
2.5.5 NGS and Transplantation 29
2.5.6 Systemic Autoimmune Diseases 30
2.6 Single Cell Transcriptomics 30
2.7 ImmuneDB 31
2.8 ASAP—A Webserver for Immunoglobulin-Sequencing Analysis Pipeline 33
2.9 Discussions 33
References 34

Chapter 3 Computational Modeling and Biology of Disease 41

3.1 Introduction 41
3.2 Computation and Biology of Disease 41
3.2.1 Neurological Disorders 42
3.2.2 Respiratory Disorders 44
3.2.3 Cardiovascular Disorders 46
3.2.4 Diseases of the Bone 47
3.2.5 Kidney Diseases 48
3.2.6 Cancer 48
3.2.7 Immunological Disorders 49
3.2.8 Infectious Diseases 49
3.2.9 Metabolic Disorder 52
3.2.9.1 Databases 53
3.2.9.2 Human Microbiome and Computational Methods 53
3.3 Discussion 55
References 55

Chapter 4 Drug Designing and Computational Immunology 63

4.1 Introduction 63
4.2 Computer-Aided Drug Designing (CADD) 64
4.3 Structure-Based Computer-Aided Drug Design (SB-CADD) 69
4.4 Polypharmocology 70
4.5 Adverse Drug Reactions 70
4.6 Retrobiosynthesis 71
4.7 Applications in Diseases 71
4.7.1 Neurological Diseases 71
4.7.2 Targeting Biomolecules and Channelopathies 71
4.7.3 Targeting P450 71
4.7.4 Nanoparticle Drug Delivery Devices 72
4.7.5 Cancer 72
4.7.6 Cardiovascular 72
4.7.7 Antimicrobials 73
4.7.8 Drug Design and Immune System 73
4.7.9 Diabetes 73
4.7.10 Infectious Diseases 73
4.7.10.1 Influenza 73
4.7.10.2 Human Trypanosomiasis 74
4.7.10.3 HIV 74
4.7.10.4 Malaria 74
4.8 Small Molecules 74
4.9 Pocket-Based Drug Design 74
4.10 Drug Repositioning 74
4.11 Natural Compounds 75
4.12 Vaccination 75
4.13 Ligand-Based CADD (LB-CADD) 77
4.14 Discussion 77
References 77

Chapter 5 Computation and Identification of Biomarkers 85

5.1 Introduction 85
5.2 Biomarkers 85
5.3 Different Approaches to Biomarker Discovery 86
5.4 Computation and Identification of Biomarkers in Health 88
5.5 Computation and Identification of Biomarkers in Disease 89
5.5.1 Cancer 89
5.5.2 Inflammation Disorders 90
5.5.3 Inflammatory Bowel Disease (IBD) 90
5.5.4 HIV 91
5.5.5 Cardiovascular 91
5.5.6 Neurological 91
5.6 Discussion: Biomarkers in Detection of Clinical Outcomes 93
References 93

Chapter 6 Applications in Organ Transplantation 99

6.1 Introduction 99
6.2 Global Knowledge Base on Transplantation 99
6.3 Computer Simulations and Applications in Transplantation 99
6.4 Cardiac Transplants 101
6.5 Liver Transplantation 102
6.6 Kidney Transplantation 103
6.7 Lung Transplantation 105
6.8 Others 106
6.9 Immunosuppression 106
6.10 Discussion 106
References 106

Chapter 7 Application in Disease Detection and Therapy 109

7.1 Introduction 109
7.2 Computation and Disease Detection and Monitoring 109
7.3 Cancer 111
7.4 Surgery 113
7.5 Brain Disorders 114
7.6 Cardiac Disorders 114
7.7 Studies in Animal Models 115
7.7.1 Neural Disorders 115
7.7.2 Therapy Outcome in HIV 115
7.7.3 Asthma 115
7.7.4 Antibiotic Research 116
7.7.5 Immunization 116
7.8 Discussion 117
References 117

Chapter 8 Computational Methods and Applications in Understanding of the Invertebrate Immune System 121

8.1 Introduction 121
8.1.1 Immune Cells and Systems and Pathways in Different Organisms in the Invertebrate Phyla 121
8.1.1.1 Immune System in Sponges 121
8.1.1.2 Cnidaria 124
8.1.1.3 Platyhelminthes 126
8.1.1.4 Nematodes 127
8.1.1.5 Annelida 128
8.1.1.6 Arthropoda 130
8.1.1.7 Mollusca 132
8.1.2 Regeneration in Planaria 134
8.1.3 Invertebrate Immunity and Database 136
8.2 Discussion 137
References 138

Chapter 9 Computational Immunology and Studies from the Human Immune System 143

9.1 Introduction 143
9.2 Infectious Disease 143
9.3 Modeling of *H. pylori* Infection Responses 147
9.4 Computational Immunology and Immune Responses 148
9.5 Computational Immunology and Insights into Macrophage Function 149
9.6 Discussion 151
References 151
