CONTENTS

- 1 Principles of Assistive Technology, 1**
- 2 Technologies That Assist People Who Have Disabilities, 16**
- 3 Activity, Human, and Context, 31**
- 4 Global Perspective on Assistive Technology, 56**
- 5 Ethical Issues in Assistive Technology, 71**
- 6 Delivering Assistive Technology Services to the Client, 87**
- 7 User Input, 117**
- 8 Control Interfaces for Assistive Technologies, 137**
- 9 Input Accessibility for Mainstream Information and Communication Technologies, 169**
- 10 Enabling Function and Participation With Seating Technologies, 192**

- 11 Technologies That Enable Mobility, 224**
- 12 Technologies That Aid Transportation, 258**
- 13 Enabling Manipulation With Low-Technology Assistive Devices, 280**
- 14 Electronic Aids to Daily Living, 289**
- 15 Robotic Assistive Technologies That Aid Manipulation, 305**
- 16 Sensory Aids for Persons With Visual Impairments, 321**
- 17 Assistive Technologies for Cognitive Augmentation, 350**
- 18 Augmentative and Alternative Communication Systems, 393**

Glossary, 440

Index, 449

James Miller Polgar

What a privilege to contribute to this book. I have been a part of the field of assistive technology for over 30 years. I have been fortunate to work with many of the leading experts in the field, and I have been able to learn from them. I have also been able to contribute to the field in my own way. I have been a part of the development of many of the leading assistive technologies, and I have been able to see the impact of these technologies on the lives of people with disabilities. I have been able to see the progress that has been made in the field, and I have been able to see the challenges that remain. I have been able to see the need for continued research and development in the field, and I have been able to see the need for continued collaboration between researchers, developers, and users. I have been able to see the need for continued education and training in the field, and I have been able to see the need for continued advocacy for people with disabilities. I have been able to see the need for continued support for people with disabilities, and I have been able to see the need for continued funding for research and development in the field. I have been able to see the need for continued commitment to the field, and I have been able to see the need for continued dedication to the field. I have been able to see the need for continued passion for the field, and I have been able to see the need for continued hope for the field. I have been able to see the need for continued love for the field, and I have been able to see the need for continued faith in the field. I have been able to see the need for continued belief in the field, and I have been able to see the need for continued courage in the field. I have been able to see the need for continued strength in the field, and I have been able to see the need for continued resilience in the field. I have been able to see the need for continued perseverance in the field, and I have been able to see the need for continued determination in the field. I have been able to see the need for continued commitment to the field, and I have been able to see the need for continued dedication to the field. I have been able to see the need for continued passion for the field, and I have been able to see the need for continued hope for the field. I have been able to see the need for continued love for the field, and I have been able to see the need for continued faith in the field. I have been able to see the need for continued belief in the field, and I have been able to see the need for continued courage in the field. I have been able to see the need for continued strength in the field, and I have been able to see the need for continued resilience in the field. I have been able to see the need for continued perseverance in the field, and I have been able to see the need for continued determination in the field.
