Table of Contents

Foreword	XIII	Prosthodontists: Who we are and what we do	XIX
Acknowledgments	XV	Literature	XX
Organization of the book and how to use it	XVI		

Chapter one

Past, present, and future of treatment planning _____ 1

The distant past	2	'Hyper-science' and the future	4
20th century to the present	3	References	7

Chapter two

Treatment planning management _____ 9

Some definitions and basic premises	10	<i>Costs in the face of disease</i>	14
Professionalism: four human factors	11	<i>Transparency and politeness</i>	14
<i>1. Proper communication and dialogue with the patient</i>	11	Informed consent	15
<i>2. Motivating patients</i>	11	<i>Consent</i>	15
<i>3. Patient management</i>	12	<i>Informed consent</i>	15
<i>4. Positive professional characteristics</i>	12	<i>We are not obliged to treat all patients</i>	15
Priorities	12	<i>In case of emergency</i>	16
The ideal treatment plan	12	<i>The use of the informed consent</i>	16
Compromise	13	<i>Essential aspects of the informed consent document</i>	16
Prosthodontic economics and patient treatment costs	14	<i>Digital technology and informed consent documents</i>	17
<i>Affordability of the treatment plan</i>	14	References	18
<i>The patient's occupation</i>	14		

Chapter three

Prosthodontic tools for treatment planning _____ 21

How prosthodontists can help their patients	22	Removable overdentures	24
Aims and requirements of all prostheses	22	Full-arch implant-retained fixed prostheses	25
Current main prosthodontic tools	22	Bioinformatics and the digital prosthodontics paradigm shift	25
Fixed restorations	22	Computerized chairside and laboratory technologies	25
Removable partial dentures	23		
Complete dentures	23		

Digital software treatment revolution 25	3D virtual articulators 26
In the clinic 26	Facially driven dentistry 26
Digital treatment planning 26	Computerized laboratory technologies 27
Cloud dentistry 26	Holographic prosthodontics 27
Computer-guided implant-positioning software and hardware 26	The day after tomorrow 27
	References 28

Chapter four

Data, findings, and dental semiotics **33**

Data 34	Simultaneous symptoms and signs 36
Findings 34	Main symptoms and signs in dental medicine 37
Symptoms 34	Semiotics and dental semiotics 43
Signs 36	References 45

Chapter five

The first visit – diagnostics **49**

Approaching and meeting the patient 50	Emergency examination 53
Professionalism 51	Screening examination 53
Attitude 51	Comprehensive examination 54
Kindness 51	The first professional appraisal 54
Empathy 52	The important basic information 54
Where we meet our patients for the first visit 52	Chief complaint 55
How to communicate with patients during the first visit 52	The histories 56
Professional office techniques to gather information 53	Clinical examinations 60
	Radiographic examinations 60
	References 64

Chapter six

Diagnosis and prognosis **69**

Diagnosis 70	New predictive technologies 71
Differential diagnosis 70	Prosthodontic prognoses 71
Prognosis 71	References 79

Chapter seven

Physical examination – Part I: extraoral examination **85**

Clinician qualities 86	Prepare the environment 87
Steps of the physical examination 86	Make the patient feel at ease 87

<i>Check the evaluation questionnaire with the patient</i> 88	Nerves 97
Physical examination checklist 88	<i>Neurologic examination</i> 97
Physical inspection of the body, auscultation, and odor examination 89	<i>Trigeminal nerve (sensory component of the nerve)</i> 98
<i>General appearance</i> 89	<i>Facial nerve (sensory and motor components of the nerve)</i> 99
<i>Body posture</i> 89	Muscles 100
<i>Movements and muscle coordination</i> 89	<i>Masticatory muscles</i> 102
<i>Nails, skin, and hair</i> 89	<i>Muscles of facial expression</i> 103
<i>Breathing patterns</i> 90	Temporomandibular joints 104
<i>Odors</i> 90	<i>Neurological examination</i> 104
<i>Speaking ability</i> 90	Lymphatic system 106
<i>Speech peculiarities</i> 91	<i>The lymph nodes and their importance</i> 106
<i>Understanding ability</i> 92	Salivary glands 114
<i>Vital statistics</i> 92	<i>How to palpate the salivary glands</i> 114
Head and neck inspection – examination 92	Thyroid gland 116
<i>Face</i> 92	<i>Shape</i> 116
<i>Eyes</i> 92	<i>Inspection</i> 116
<i>Ears</i> 95	<i>Palpation</i> 117
<i>Nose</i> 95	<i>Health status</i> 118
<i>Mouth</i> 95	<i>Function</i> 118
Head and neck inspection – palpation examination 96	<i>Clinical relevance</i> 118
<i>Static and dynamic possibilities</i> 96	<i>Absence</i> 118
<i>Palpation techniques</i> 96	References 119

Chapter eight

Physical examination – Part II: intraoral examination _____ 121

Intraoral examination procedure 122	<i>Anatomy</i> 132
Intraoral examination checklist 122	<i>Examination of the tongue</i> 133
Vestibular area 123	Floor of the mouth 135
<i>Lips</i> 123	Salivary glands 137
Vestibules 126	<i>Submandibular salivary glands</i> 137
<i>Cheeks</i> 126	<i>Sublingual salivary glands</i> 137
<i>Parotid (salivary) glands</i> 126	<i>Minor mucous salivary glands</i> 138
<i>Floor of the vestibules</i> 128	<i>Von Ebner's glands</i> 139
Oral cavity 128	<i>Clinical conditions of salivary glands</i> 139
<i>Palate</i> 128	Alveolar arches and teeth 140
Oropharynx and isthmus of fauces 129	Occlusion 140
<i>Pharyngeal tonsils</i> 131	<i>Radiographic examination</i> 141
Tongue 132	References 149

Chapter nine

Main clinical examination assessment questions _____ 153

Clinical extraoral examination	154	Case assessment occlusal evaluation	158
Clinical intraoral examination	156	Clinical oral and tooth assessment questions	159
Oral mucosa evaluation	156	References	161

Chapter ten

The type and structure of prosthodontic treatments _____ 163

Prosthodontic treatment algorithms	164	Classification of prosthodontic treatments	168
Treatment planning and predictable results	164	Class I: Prosthodontic treatments – full	
Clinical priorities	164	reconstructive rehabilitations	168
Presence of an infectious disease and its healing		Class II: Prosthodontic treatments –	
time	165	interdisciplinary improving rehabilitations	169
Need for additional clinical collaborators	165	Class III: Prosthodontic treatments –	
Consequentiality of procedures	165	interdisciplinary healing rehabilitations	169
Treatment planning of complex cases	165	Prosthodontic treatment phases and their	
Concept of the ‘initial phase’	166	algorithms	169
Concept of customization	166	Predictability, sequence of work, and consent	171
Expectations: a danger zone	166	Predictability	171
‘Not enough time’	167	‘Red line’ concept	171
Balance of time commitment	167	Emergencies and priorities	172
Posttreatment care commitment	167	References	172
The clinical result should not be equal to or worse			
than the problem itself	167		

Chapter eleven

Treatment planning analysis of complex rehabilitations

Phase I: Diagnostics, consultations, and emergencies _____ 173

Some preliminary remarks	174	Diagnostic digital dental technology	180
Treatment variations and alterations	174	Emergencies	181
Time for communication and		Preprosthetic emergencies, priority treatments, and	
explanations	174	initial disease control	181
Diagnostics	175	Preferential route medical priorities	181
Initial diagnostic screening questionnaire	175	Oral cancer control	182
Second updating questionnaire	175	Maxillofacial emergencies	183
Initial interview and first visit	176	Periodontal emergencies	183
Consultations with other specialists	178	Endodontic emergencies	184
Dental specialties and other areas of		Tooth extraction emergencies	184
consultation	179	Caries emergencies	184

Professional oral hygiene emergencies	184	References	185
Relining and rebasing of complete and partial dentures	185		

Chapter twelve

Treatment planning analysis of complex rehabilitations

Phase II: Prosthetic and restorative treatment 189

Some preliminary remarks	190	Long-term fixed provisionals	195
General factors that may affect the planned treatment sequence	190	Analog or digital provisionals?	195
Complications that may affect the planned treatment sequence	191	Implant placement	195
Orthodontic therapy	191	Implants are a sensitive rehabilitation to plan	197
Periodontal and oral surgery therapies	192	Implant postsurgery instructions for patients	198
Endodontic therapies	192	Maxillomandibular registration	199
Mutilated roots and teeth	193	Final impressions	199
Post and cores	193	Final prosthesis try-in and delivery	200
Provisional restorations	194	Relining and rebasing of RPDs and CDs	200
Planning the lifespan of provisionals	194	Bite guards	201
		References	206

Chapter thirteen

Treatment planning analysis of complex rehabilitations

Phase III: Posttreatment care and recalls 211

Planning for Phase III	212	Educating patients about personal oral hygiene	216
Periodic recalls for maintenance	213	Treatment planning fluoride	219
Patient compliance and special maintenance holding programs	213	Treatment planning prophylactic therapies	220
Basic prosthodontic maintenance checklists	214	Treatment planning the improvement of the patient's diet	221
Fixed prosthesis maintenance checklist	214	Making patients more aware of dangerous habits	222
Removable partial denture (RPD) maintenance checklist	214	References	223
Complete denture (CD) maintenance checklist	215		
Reinforcing oral hygiene at recall visits	216		

Chapter fourteen

Treatment planning for the elderly and those with challenging health conditions

227

Some medical statistics	228	Prosthodontic treatment planning for elderly and geriatric patients	230
Patient awareness and communication	229		

<i>Some basic statistics</i>	230	<i>Sedatives, anxiolytics, and antidepressants</i>	235
<i>Treating elderly people</i>	231	<i>Marijuana</i>	236
Prosthodontic treatment planning for patients		<i>Cocaine</i>	236
who are addicted to drugs	232	<i>MDMA and ecstasy</i>	236
Signs and symptoms of the most common		<i>Methamphetamines</i>	236
drugs	235	<i>Heroin</i>	237
<i>Prescription analgesics</i>	235	References	237

Chapter fifteen

How to write a prosthodontic treatment plan 241

I. How to write a prosthodontic treatment plan for your patient	242	<i>Phase I diagnostics – case narrative</i>	255
II. How to write a prosthodontic treatment plan for a professional case presentation	243	Case 4 Perioprosthodontic treatment	259
III. Main text and writing guidelines	243	<i>Phase I diagnostics – case narrative</i>	259
IV. Prosthodontic case presentation narratives	247	Case 5 Perioprosthodontic treatment	263
<i>Examples and scenarios</i>	247	<i>Phase I diagnostics – case narrative</i>	263
Case 1 Perioprosthodontic treatment	248	Case 6 Maxillary complete dentures and mandibular fixed/removable partial denture	266
<i>Phase I diagnostics – case narrative</i>	248	<i>Completed case narrative 1</i>	266
Case 2 Perioprosthodontic treatment	252	Case 7 Rehabilitation of complete dentures	277
<i>Phase I diagnostics – case narrative</i>	252	<i>Completed case narrative</i>	277
Case 3 Perioprosthodontic treatment	255	Case 8 Fixed and removable combined rehabilitation	282
		<i>Completed case narrative</i>	282
