Foreword Karen DeSalvo, MD, MPH, MSc xv

Preface xix

Section I. Introduction

1. **Introduction to Health Information Technology in a Policy and Regulatory Environment** 3
Susan McBride and Mari Tietze
2. **Advanced Practice Roles in Interprofessional Teams** 19
Carol J. Bickford and Mari Tietze
3. **Scientific and Theoretical Foundations for Driving Improvement** 41
Richard Booth, Susan McBride, and Mari Tietze
4. **National Healthcare Transformation and Information Technology** 75
David M. Bergman, Susan McBride, and Mari Tietze
5. **Consumer Engagement/Activation Enhanced by Technology** 95
Mari Tietze and Patricia Hinton Walker

Section II. Point-of-Care Technology

6. **Computers in Healthcare** 115
Susan McBride, Richard E. Gilder, and Deb McCullough
7. **Electronic Health Records and Point-of-Care Technology** 145
Mary Beth Mitchell and Susan McBride
8. **Systems Development Life Cycle for Achieving Meaningful Use** 177
Susan McBride and Susan K. Newbold
9. **Workflow Redesign in a Quality-Improvement Modality** 209
Susan McBride, Terri Schreiber, and John Terrell

10. **Evaluation Methods and Strategies for Electronic Health Records** 229
Susan McBride, Mary Beth Mitchell, and David DeAbreu
11. **Electronic Health Records and Health Information Exchanges
Providing Value and Results for Patients, Providers,
and Healthcare Systems** 249
Anne Kimbol, Susan McBride, Tony Gilman, and George R. Gooch
12. **National Standards for Health Information Technology** 273
Susan H. Fenton and Susan McBride
13. **Public Health Data to Support Healthy Communities in Health
Assessment Planning** 297
Lisa A. Campbell, Susan McBride, and Sue Pickens
14. **Privacy and Security in a Ubiquitous Health Information Technology
World** 333
Susan McBride, Helen Caton-Peters, and Kristin Jenkins
15. **Personal Health Records and Patient Portals** 355
Mari Tietze and Stephanie H. Hoelscher
16. **Telehealth and Mobile Health** 377
Mari Tietze and Georgia A. Brown
- Section III. Data Management**
17. **Strategic Thinking in Design and Deployment of Enterprise Data,
Reporting, and Analytics** 401
Trish Smith and Susan McBride
18. **Data Management and Analytics: The Foundations for Improvement** 425
Susan McBride and Mari Tietze
19. **Clinical Decision Support Systems** 455
Joni S. Padden, Susan McBride, Mari Tietze, Tanna Nelson, and Mike Eckhard
- Section IV. Patient Safety/Quality and Population Health**
20. **Health Information Technology and Implications for Patient Safety** 487
Mari Tietze and Susan McBride
21. **Quality-Improvement Strategies and Essential Tools** 519
Susan McBride, Mari Tietze, and John Terrell
22. **National Prevention Strategy, Population Health, and Health
Information Technology** 533
Andrea L. Lorden, Mari Tietze, and Susan McBride

23. **Electronic Clinical Quality Measures: Building an Infrastructure for Success** 557
Susan McBride, Kimberly M. Bodine, and Liz Johnson
24. **Developing Competencies in Nursing for an Electronic Age of Healthcare** 589
Laura Thomas, Susan McBride, Sharon Decker, Matthew Pierce, and Mari Tietze

Section V. New and Emerging Technologies

25. **Genomics and Implications for Health Information Technology** 611
Diane C. Seibert, Susan McBride, and Mary Madeline Rogge
26. **Nanotechnology, Nanorobotics, and Implications for Healthcare Interprofessional Teams** 639
Mari Tietze and Susan McBride
27. **“Big Data” and Advanced Analytics** 653
Susan McBride, Cynthia Powers, Richard E. Gilder, Wesley Rhodes, Annette Sobel, and Billy U. Philips, Jr.
28. **Social Media: Ongoing Evolution in Healthcare Delivery** 683
Lyndsay Foisey, Richard Booth, Susan McBride, and Mari Tietze
29. **Enhancing Cybersecurity in New and Emerging Health Informatics Environments** 703
Susan McBride, Annette Sobel, and Wesley Rhodes
30. **Interprofessional Application of Health Information Technology in Education** 725
Mari Tietze and Stacey Brown

Index 743

NURSING INFORMATICS for the Advanced Practice Nurse

Patient Safety, Quality, Outcomes, and Interprofessionalism

Susan McBride, PhD, RN-BC, CPHIMS, FAAN
Mari Tietze, PhD, RN-BC, FHIMSS

Second Edition

A "must have" text for all healthcare professionals practicing in the digital age of healthcare.

Nursing Informatics for the Advanced Practice Nurse, Second Edition, delivers a practical array of tools and information to show how advanced practice nurses can maximize patient safety, quality of care, and cost savings through the use of technology. Since the first edition of this text, health information technology has only expanded. With increased capability and complexity, the current technology landscape presents new challenges and opportunities for interprofessional teams. Nurses, who are already trained to use the analytic process to assess, analyze, and intervene, are in a unique position to use this same process to lead teams in addressing healthcare delivery challenges with data.

The only informatics text written specifically for advanced practice nurses, *Nursing Informatics for the Advanced Practice Nurse, Second Edition*, takes an expansive, open, and innovative approach to thinking about technology. Every chapter is highly practical, filled with case studies and exercises that demonstrate how the content presented relates to the contemporary healthcare environment. Where applicable, concepts are aligned with the six domains within the Quality and Safety Education in Nursing (QSEN) approach and are tied to national goals and initiatives. Featuring chapters written by physicians, epidemiologists, engineers, dietitians, and health services researchers, the format of this text reflects its core principle that it takes a team to fully realize the benefit of technology for patients and healthcare consumers.

What's New

- Several chapters present new material to support teams' optimization of electronic health records
- Updated national standards and initiatives
- Increased focus and new information on usability, interoperability and workflow redesign throughout, based on latest evidence
- Explores challenges and solutions of electronic clinical quality measures (eCQMs), a major initiative in healthcare informatics; Medicare and Medicaid Services use eCQMs to judge quality of care, and how dynamics change rapidly in today's environment

Key Features

- Presents national standards and healthcare initiatives
- Provides in-depth case studies for better understanding of informatics in practice
- Addresses the DNP Essentials, including II: Organization and system leadership for quality improvement and systems thinking, IV: Core Competency for Informatics, and Interprofessional Collaboration for Improving Patient and Population health outcomes
- Includes end-of-chapter exercises and questions for students
- Instructor's Guide and PowerPoint slides for instructors
- Aligned with QSEN graduate-level competencies
