PART 1 Basic Concepts of Pathophysiology

UNIT 1 The Cell

1 Cellular Biology, 1

Kathryn L. McCance

- Prokaryotes and Eukaryotes, 1
- Cellular Functions, 1
- Structure and Function of Cellular Components, 2
 - Nucleus, 3
 - Cytoplasmic Organelles, 3
 - Plasma Membranes, 4
 - Cellular Receptors, 10
- Cell-to-Cell Adhesions, 11
 - Extracellular Matrix and Basement Membrane, 12
 - Specialized Cell Junctions, 12
- Cellular Communication and Signal Transduction, 13
- Cellular Metabolism, 17
 - Role of Adenosine Triphosphate, 17
 - Food and Production of Cellular Energy, 17
 - Oxidative Phosphorylation, 18
- Membrane Transport: Cellular Intake and Output, 18
 - Electrolytes as Solutes, 20
 - Transport by Vesicle Formation, 23
 - Movement of Electrical Impulses: Membrane Potentials, 26
- Cellular Reproduction: The Cell Cycle, 27
 - Phases of Mitosis and Cytokinesis, 27
 - Control of Cell Division and Cell Growth: Mitogens, Growth Factors, and Survival Factors, 28
 - DNA Damage Response: Blocks Cell Division, 28
- Tissues, 28
 - Tissue Formation and Differentiation, 29

2 Genes and Genetic Diseases, 40

Lynn B. Jorde

- DNA, RNA, and Proteins: Heredity at the Molecular Level, 40
 - Definitions, 40
 - From Genes to Proteins, 41
- Chromosomes, 44
 - Chromosome Aberrations and Associated Diseases, 44
- Elements of Formal Genetics, 51
 - Phenotype and Genotype, 51
 - Dominance and Recessiveness, 51
- Transmission of Genetic Diseases, 51
 - Autosomal Dominant Inheritance, 52
 - Autosomal Recessive Inheritance, 54
 - X-Linked Inheritance, 56
- Linkage Analysis and Gene Mapping, 58
 - Classic Pedigree Analysis, 58
 - Complete Human Gene Map: Prospects and Benefits, 58
- Multifactorial Inheritance, 59

3 Epigenetics and Disease, 64

Diane P. Genereux

- Epigenetic Mechanisms, 64
 - DNA Methylation, 64
 - Histone Modifications, 64

Epigenetics and Human Development, 65

Epigenetics in Genomic Imprinting, 66

Prader-Willi and Angelman Syndromes, 66

Beckwith-Wiedemann Syndrome, 67

Russell-Silver Syndrome, 67

Environmental Impacts on Epigenetic

Information, 67

Epigenetics and Nutrition, 67

Epigenetics and Maternal Care, 68

Twin Studies Provide Insights on Epigenetic

Modification, 68

Molecular Approaches to Understand Epigenetic Disease, 68

Epigenetics and Cancer, 69

DNA Methylation and Cancer, 69

Epigenetic Screening for Cancer, 70

Emerging Strategies for the Treatment of Epigenetic Disease, 70

Future Directions, 71

4 Altered Cellular and Tissue Biology, 73

Kathryn L. McCance, Lois E. Brennehan

Cellular Adaptation, 74

Atrophy, 74

Hypertrophy, 75

Hyperplasia, 75

Dysplasia: Not a True Adaptive Change, 76

Metaplasia, 76

Cellular Injury, 77

General Mechanisms of Cell Injury, 77

Ischemic and Hypoxic Injury, 77

Ischemia-Reperfusion Injury, 78

Free Radicals and Reactive Oxygen Species—Oxidative Stress, 79

Chemical or Toxic Injury, 82

Unintentional and Intentional Injuries, 90

Infectious Injury, 93

Immunologic and Inflammatory Injury, 94

Manifestations of Cellular Injury, 94

Cellular Manifestations: Accumulations, 94

Water, 95

Lipids and Carbohydrates, 95

Glycogen, 96

Proteins, 96

Pigments, 97

Calcium, 97

Urate, 99

Systemic Manifestations of Cellular Injury, 99

Cellular Death, 99

Necrosis, 100

Apoptosis, 102

Autophagy, 103

Aging and Altered Cellular and Tissue

Biology, 104

Normal Life Span and Life Expectancy, 105

Frailty, 105

Somatic Death, 106

5 Fluids and Electrolytes, Acids and Bases, 111*Lois E. Brenneman, Sue E. Huether*

- Distribution of Body Fluids and Electrolytes, 111**
 - Water Movement Between Plasma and Interstitial Fluid, 112*
 - Water Movement Between ICF and ECF, 113*
- Alterations in Water Movement, 113**
 - Edema, 113*
- Sodium, Chloride, and Water Balance, 115**
- Alterations in Sodium, Chloride, and Water Balance, 117**
 - Isotonic Fluid Alterations, 118*
 - Hypertonic Fluid Alterations, 118*
 - Hypotonic Fluid Alterations, 119*
- Alterations in Potassium and Other Electrolytes, 120**
 - Potassium, 120*
 - Other Electrolytes—Calcium, Phosphate, and Magnesium, 123*
- Acid–Base Balance, 123**
 - Hydrogen Ion and pH, 123*
 - Buffer Systems, 125*
 - Acid–Base Imbalances, 127*
- PEDIATRIC CONSIDERATIONS: Distribution of Body Fluids, 130**
- GERIATRIC CONSIDERATIONS: Distribution of Body Fluids, 130**

UNIT 2 Mechanisms of Self-Defense**6 Innate Immunity: Inflammation and Wound Healing, 133***Valentina L. Brashers, Lois E. Brenneman*

- Human Defense Mechanisms, 133**
- Innate Immunity, 133**
 - First Line of Defense: Physical and Biochemical Barriers and the Human Microbiome, 133*
 - Second Line of Defense: Inflammation, 135*
 - Cellular Components of Inflammation, 139*
- Acute and Chronic Inflammation, 146**
 - Local Manifestations of Acute Inflammation, 146*
 - Systemic Manifestations of Acute Inflammation, 146*
 - Chronic Inflammation, 147*
- Wound Healing, 147**
 - Phase I: Hemostasis (Coagulation), 149*
 - Phase II: Inflammation, 149*
 - Phase III: Proliferation and New Tissue Formation, 149*
 - Phase IV: Remodeling and Maturation, 150*
 - Dysfunctional Wound Healing, 150*

PEDIATRIC CONSIDERATIONS: Age-Related Factors Affecting Innate Immunity in the Newborn Child, 152

GERIATRIC CONSIDERATIONS: Age-Related Factors Affecting Innate Immunity in the Elderly, 153

7 Adaptive Immunity, 156*Valentina L. Brashers, Kathryn L. McCance*

- Overview of Adaptive Immunity, 156**
- Antigens and Immunogens, 157**
- Immune Response: Collaboration of B Cells and T Cells, 157**
 - Generation of Clonal Diversity, 157*
 - Clonal Selection, 161*

Humoral Immunity (Antibodies), 163

- Classes of Antibodies, 163*
- Antigen–Antibody Binding, 166*
- Function of Antibodies, 166*

Cell-Mediated Immunity, 168

- T-Lymphocyte Function, 169*

PEDIATRIC CONSIDERATIONS: Age-Related Factors Affecting Mechanisms of Self-Defense in the Newborn Child, 171

GERIATRIC CONSIDERATIONS: Age-Related Factors Affecting Mechanisms of Self-Defense in the Elderly, 171

8 Alterations in Immunity, 174*Valentina L. Brashers, Sue E. Huether*

- Hypersensitivity Reactions, 174**
- Immunologic Mechanisms of Hypersensitivity Reactions, 174**
 - Mechanisms of Hypersensitivity Reactions, 175*
 - Allergy, 181*
 - Autoimmunity, 182*
 - Alloimmunity, 183*
- Deficiencies in Immunity, 186**
 - Initial Clinical Presentation, 186*
 - Primary (Congenital) Immune Deficiencies, 186*
 - Secondary (Acquired) Immune Deficiencies, 188*

9 Infection, 196*Valentina L. Brashers, Sue E. Huether*

- Microorganisms and Humans: a Dynamic Relationship, 196**
 - The Process of Infection, 196*
 - Stages of Infection, 198*
- Infectious Disease, 199**
 - Bacterial Infection, 199*
 - Viral Infection, 201*
 - Fungal Infection, 204*
 - Parasitic Infection, 204*
- Antibiotic/Antimicrobial Resistance, 206**
- Vaccines and Protection Against Infection, 207**
 - Active Immunization, 207*
 - Passive Immunotherapy, 208*

10 Stress and Disease, 210*Lorey K. Takahashi, Kathryn L. McCance*

- Background and General Concepts of Stress, 210**
 - Traditional Overview of Stress, 210*
 - Modern Overview of Stress: Allostasis and Allostatic Overload, 211*
- The Stress Systems, 211**
 - Regulation of the Hypothalamic–Pituitary–Adrenal Axis, 213*
 - The Autonomic Nervous System, 216*
 - Role of the Immune System, 217*
- Chronic Stress at an Early Age Increases the Risk of Developing Long-Lasting Pathophysiologic Alterations Linked to Poor Health and to Disease, 218**
- Negative Effects of Stress on Telomere Length, Aging, and Disease, 221**
- Coping and Intervention Strategies, 221**
 - Staying on the Good Side of the Stress Spectrum, 221*
 - Effects of Exercise, 223*
 - Mindfulness Therapy, 223*

UNIT 3 Cellular Proliferation: Cancer**11 Cancer Biology, 227***Kathryn L. McCance, Neal S. Rote*

Cancer Terminology and Characteristics, 227
Tumor Classification and Nomenclature, 227

The Biology of Cancer Cells, 228

Sustained Proliferative Signaling, 232

Evading Growth Suppressors, 235

Genomic Instability, 238

Enabling Replication Immortality, 238

Cellular Adaptations, 239

Reprogramming Energy Metabolism, 239

Resistance to Destruction, 241

Activating Invasion and Metastasis, 244

Clinical Manifestations of Cancer, 247

Paraneoplastic Syndromes, 247

Molecular Mechanisms of Cachexia, 247

Diagnosis and Staging of Cancer, 249

Histologic Staging, 249

Classification of Tumors: Immunohistochemical and Genetic Analysis, 252

Treatment of Cancer, 252

Classic Approaches, 252

12 Cancer Epidemiology, 258*Kathryn L. McCance, Lois E. Brenneman*

Genetics, Epigenetics, and Tissue, 258

Incidence and Mortality Trends, 264

In Utero and Early Life Conditions, 264

Environmental-Lifestyle Factors, 265

Tobacco Use, 265

Diet, 267

Nutrition, Obesity, Alcohol Consumption, and Physical Activity: Impacts on Cancer, 267

Air Pollution, 274

Ionizing Radiation, 276

Ultraviolet Radiation, 280

Electromagnetic Radiation, 282

Infection, Sexual and Reproductive Behavior, 282

Other Viruses and Microorganisms, 283

Chemical and Occupational Hazards as Carcinogens, 283

13 Cancer in Children and Adolescents, 291*Lauri A. Linder*

Incidence, Etiology, and Types of Childhood Cancer, 291

Etiology, 292

Genetic and Genomic Factors, 293

Environmental Factors, 295

Prognosis, 296

PART 2 Body Systems and Diseases**UNIT 4 The Neurologic System****14 Structure and Function of the Neurologic System, 298***Sue E. Huether*

Overview and Organization of the Nervous System, 298

Cells of the Nervous System, 298

Neurons, 299

Neuroglia, 300

Nerve Injury and Regeneration, 300

The Nerve Impulse, 301

Synapses, 302

Neurotransmitters, 302

Central Nervous System, 303

Brain, 303

Spinal Cord, 308

Motor Pathways, 311

Sensory Pathways, 311

Protective Structures, 311

Blood Supply, 314

Blood Supply to the Brain, 314

Blood-Brain Barrier, 315

Blood Supply to the Spinal Cord, 315

Peripheral Nervous System, 317

Autonomic Nervous System, 318

Anatomy of the Sympathetic Nervous System, 319

Anatomy of the Parasympathetic Nervous System, 321

Neurotransmitters and Neuroreceptors, 322

Functions of the Autonomic Nervous System, 322

GERIATRIC CONSIDERATIONS: Aging and the Nervous System, 324

15 Pain, Temperature, Sleep, and Sensory Function, 327*George W. Rodway, Sue E. Huether*

Pain, 327

Neuroanatomy of Pain, 327

Pain Modulation, 329

Clinical Descriptions of Pain, 330

Temperature Regulation, 333

Control of Body Temperature, 333

Temperature Regulation in Infants and Elderly Persons, 333

Pathogenesis of Fever, 333

Benefits of Fever, 334

Disorders of Temperature Regulation, 335

Sleep, 335

Sleep Disorders, 336

The Special Senses, 338

Vision, 338

Hearing, 342

GERIATRIC CONSIDERATIONS: Aging & Changes in Hearing, 344

Olfaction and Taste, 344

GERIATRIC CONSIDERATIONS: Aging & Changes in Olfaction and Taste, 345

Somatosensory Function, 345

Touch, 345

Proprioception, 346

16 Alterations in Cognitive Systems, Cerebral Hemodynamics, and Motor Function, 351*Barbara J. Boss, Sue E. Huether*

Alterations in Cognitive Systems, 351

Alterations in Arousal, 351

Alterations in Awareness, 357

Data-Processing Deficits, 359

Seizure Disorders, 365

Alterations in Cerebral Hemodynamics, 367

Increased Intracranial Pressure, 367

Cerebral Edema, 369

Hydrocephalus, 369

- Alterations in Neuromotor Function, 370
 - Alterations in Muscle Tone, 370
 - Alterations in Muscle Movement, 372
 - Upper and Lower Motor Neuron Syndromes, 375
 - Motor Neuron Diseases, 377
 - Amyotrophic Lateral Sclerosis, 377
- Alterations in Complex Motor Performance, 378
 - Disorders of Posture (Stance), 378
 - Disorders of Gait, 379
 - Disorders of Expression, 379

Extrapyramidal Motor Syndromes, 379

17 Disorders of the Central and Peripheral Nervous Systems and Neuromuscular Junction, 384

Barbara J. Boss, Sue E. Huether

Central Nervous System Disorders, 384

- Traumatic Brain and Spinal Cord Injury, 384
- Degenerative Disorders of the Spine, 392
- Cerebrovascular Disorders, 395
- Primary Headache Syndromes, 400
- Infection and Inflammation of the Central Nervous System, 401
- Demyelinating Disorders, 403

Peripheral Nervous System and Neuromuscular Junction Disorders, 405

- Peripheral Nervous System Disorders, 405
- Neuromuscular Junction Disorders, 405

Tumors of the Central Nervous System, 406

- Brain Tumors, 406
- Spinal Cord Tumors, 409

18 Alterations of Neurologic Function in Children, 414

Russell J. Butterfield, Sue E. Huether

Development of the Nervous System in Children, 414

Structural Malformations, 415

- Defects of Neural Tube Closure, 416
- Craniosynostosis, 417
- Malformations of Brain Development, 419

Alterations in Function: Encephalopathies, 420

- Static (Nonprogressive) Encephalopathies, 420
- Inherited Metabolic Disorders of the Central Nervous System, 421
- Intoxications of the Central Nervous System, 422
- Infections of the Central Nervous System, 422

Cerebrovascular Disease in Children, 423

- Perinatal Stroke, 423
- Childhood Stroke, 423
- Epilepsy and Seizure Disorders in Children, 423

Childhood Tumors, 423

- Brain Tumors, 423
- Embryonal Tumors, 423

UNIT 5 The Endocrine System

19 Mechanisms of Hormonal Regulation, 429

Valentina L. Brashers, Sue E. Huether

Mechanisms of Hormonal Regulation, 429

- Regulation of Hormone Release, 429
- Hormone Transport, 430
- Hormone Receptors, 430

Structure and Function of the Endocrine Glands, 433

- Hypothalamic–Pituitary System, 433
- Pineal Gland, 437
- Thyroid and Parathyroid Glands, 437

Endocrine Pancreas, 439

Adrenal Glands, 441

GERIATRIC CONSIDERATIONS: Aging and Its Effects on Specific Endocrine Glands, 444

20 Alterations of Hormonal Regulation, 447

Valentina L. Brashers, Sue E. Huether

Mechanisms of Hormonal Alterations, 447

Alterations of the Hypothalamic–Pituitary System, 447

- Diseases of the Posterior Pituitary, 447
- Diseases of the Anterior Pituitary, 449

Alterations of Thyroid Function, 452

- Thyrotoxicosis/Hyperthyroidism, 452
- Hypothyroidism, 454
- Thyroid Carcinoma, 455

Alterations of Parathyroid Function, 456

- Hyperparathyroidism, 456
- Hypoparathyroidism, 456

Dysfunction of the Endocrine Pancreas: Diabetes Mellitus, 457

- Types of Diabetes Mellitus, 457
- Acute Complications of Diabetes Mellitus, 461
- Chronic Complications of Diabetes Mellitus, 464

Alterations of Adrenal Function, 467

- Disorders of the Adrenal Cortex, 467
- Tumors of the Adrenal Medulla, 470

21 Obesity, Starvation, and Anorexia of Aging, 474

Sue E. Huether

Adipose Tissue, 474

- Adipose Tissue as an Endocrine Organ, 475
- Regulation of Food Intake and Energy Balance, 475

Obesity, 476

Starvation, 480

Anorexia of Aging, 480

UNIT 6 The Hematologic System

22 Structure and Function of the Hematologic System, 484

Sue E. Huether

Components of the Hematologic System, 484

- Composition of Blood, 484
- Lymphoid Organs, 488

Development of Blood Cells, 490

- Bone Marrow, 490
- Cellular Differentiation, 490
- Hematopoiesis, 491

Mechanisms of Hemostasis, 496

- Function of Blood Vessels, 496
- Function of Platelets, 497
- Function of Clotting Factors, 498
- Control of Hemostatic Mechanisms, 498
- Retraction and Lysis of Blood Clots, 498

Pediatrics and Blood, 499

Aging and Blood, 499

23 Alterations of Hematologic Function, 505

Kathryn L. McCance

Anemia, 505

- Classification and General Characteristics, 505
- Anemias of Blood Loss, 507
- Anemias of Diminished Erythropoiesis, 507
- Myeloproliferative Red Cell Disorders, 514
- Polycythemia Vera, 514
- Iron Overload, 516

- Alterations of Leukocyte Function, 517
 - Quantitative Alterations of Leukocytes, 517
- Alterations of Lymphoid Function, 527
 - Lymphadenopathy, 527
 - Malignant Lymphomas, 527
 - Plasma Cell Malignancy, 531
- Alterations of Splenic Function, 534
- Hemorrhagic Disorders and Alterations of Platelets and Coagulation, 535
 - Disorders of Platelets, 536
 - Alterations of Platelet Function, 539
 - Disorders of Coagulation, 539
- 24 Alterations of Hematologic Function in Children, 548**
 - Lauri A. Linder, Kathryn L. McCance
 - Disorders of Erythrocytes, 548
 - Acquired Disorders, 548
 - Inherited Disorders, 551
 - Disorders of Coagulation and Platelets, 557
 - Inherited Hemorrhagic Disease, 557
 - Antibody-Mediated Hemorrhagic Disease, 557
 - Neoplastic Disorders, 558
 - Leukemia, 558
 - Lymphomas, 559

UNIT 7 The Cardiovascular and Lymphatic Systems

- 25 Structure and Function of the Cardiovascular and Lymphatic Systems, 563**
 - Kathryn L. McCance
 - Circulatory System, 563
 - Heart, 563
 - Structures That Direct Circulation Through the Heart, 564
 - Structures That Support Cardiac Metabolism:
 - Coronary Circulation, 567
 - Structures That Control Heart Action, 568
 - Factors Affecting Cardiac Output, 574
 - Systemic Circulation, 577
 - Structure of Blood Vessels, 577
 - Factors Affecting Blood Flow, 577
 - Regulation of Blood Pressure, 581
 - The Lymphatic System, 585
- 26 Alterations of Cardiovascular Function, 591**
 - Valentina L. Brashers
 - Diseases of the Veins, 591
 - Varicose Veins and Chronic Venous Insufficiency, 591
 - Thrombus Formation in Veins, 591
 - Superior Vena Cava Syndrome, 592
 - Diseases of the Arteries, 592
 - Hypertension, 592
 - Orthostatic (Postural) Hypotension, 596
 - Aneurysm, 596
 - Thrombus Formation, 597
 - Embolism, 598
 - Peripheral Vascular Disease, 598
 - Atherosclerosis, 599
 - Peripheral Artery Disease, 601
 - Coronary Artery Disease, Myocardial Ischemia, and Acute Coronary Syndromes, 602

- Disorders of the Heart Wall, 611
 - Disorders of the Pericardium, 611
 - Disorders of the Myocardium: the Cardiomyopathies, 613
 - Disorders of the Endocardium, 614
- Manifestations of Heart Disease, 620
 - Heart Failure, 620
 - Dysrhythmias, 623
- Shock, 624
 - Impairment of Cellular Metabolism, 624
 - Clinical Manifestations of Shock, 627
 - Treatment for Shock, 628
 - Types of Shock, 628
 - Multiple Organ Dysfunction Syndrome, 632
- 27 Alterations of Cardiovascular Function in Children, 639**
 - Nancy Pike, Jennifer Peterson
 - Congenital Heart Disease, 639
 - Defects With Increased Pulmonary Blood Flow, 640
 - Obstructive Defects, 643
 - Defects With Decreased Pulmonary Blood Flow, 645
 - Mixing Defects, 646
 - Heart Failure, 649
 - Acquired Cardiovascular Disorders, 650
 - Kawasaki Disease, 650
 - Systemic Hypertension, 650

UNIT 8 The Pulmonary System

- 28 Structure and Function of the Pulmonary System, 655**
 - Valentina L. Brashers
 - Structures of the Pulmonary System, 655
 - Conducting Airways, 655
 - Gas-Exchange Airways, 656
 - Pulmonary and Bronchial Circulation, 657
 - Control of the Pulmonary Circulation, 659
 - Chest Wall and Pleura, 659
 - Function of the Pulmonary System, 660
 - Ventilation, 660
 - Neurochemical Control of Ventilation, 660
 - Mechanics of Breathing, 662
 - Gas Transport, 664
 - GERIATRIC CONSIDERATIONS: Aging and the Pulmonary System, 668
- 29 Alterations of Pulmonary Function, 670**
 - Valentina L. Brashers, Sue E. Huether
 - Clinical Manifestations of Pulmonary Alterations, 670
 - Signs and Symptoms of Pulmonary Disease, 670
 - Pain, 672
 - Conditions Caused by Pulmonary Disease or Injury, 672
 - Disorders of the Chest Wall and Pleura, 674
 - Pleural Abnormalities, 674
 - Pulmonary Disorders, 676
 - Restrictive Lung Diseases, 676
 - Obstructive Lung Diseases, 680
 - Respiratory Tract Infections, 686
 - Pulmonary Vascular Disease, 689
 - Malignancies of the Respiratory Tract, 690

30 Alterations of Pulmonary Function in Children, 697*Valentina L. Brashers*

- Disorders of the Upper Airways, 697**
 - Infections of the Upper Airways, 697*
 - Aspiration of Foreign Bodies, 699*
 - Obstructive Sleep Apnea, 700*
- Disorders of the Lower Airways, 700**
 - Surfactant Deficiency Disorder (Respiratory Distress Syndrome of the Newborn), 700*
 - Bronchopulmonary Dysplasia, 702*
 - Respiratory Tract Infections, 703*
 - Pneumonia, 704*
 - Aspiration Pneumonitis, 706*
 - Asthma, 706*
 - Acute Respiratory Distress Syndrome, 707*
 - Cystic Fibrosis, 707*
- Sudden Infant Death Syndrome, 709**

UNIT 9 The Renal and Urologic Systems**31 Structure and Function of the Renal and Urologic Systems, 712***Sue E. Huether*

- Structures of the Renal System, 712**
 - Structures of the Kidney, 712*
 - Urinary Structures, 716*
- Renal Blood Flow and Glomerular Filtration, 717**
 - Autoregulation of Intrarenal Blood Flow, 717*
 - Neural Regulation of Renal Blood Flow, 717*
 - Hormones and Other Factors Regulating Renal Blood Flow, 717*
- Kidney Function, 719**
 - Nephron Function, 719*
 - Hormones and Nephron Function, 722*
 - Renal Hormones, 722*
- Tests of Renal Function, 723**
 - Renal Clearance, 723*
 - Urinalysis, 724*

PEDIATRIC CONSIDERATIONS: Pediatrics & Renal Function, 725**GERIATRIC CONSIDERATIONS: Aging & Renal Function, 725****32 Alterations of Renal and Urinary Tract Function, 728***Sue E. Huether*

- Urinary Tract Obstruction, 728**
 - Upper Urinary Tract Obstruction, 728*
 - Lower Urinary Tract Obstruction, 730*
 - Tumors, 733*
- Urinary Tract Infection, 734**
 - Causes of Urinary Tract Infection, 734*
 - Types of Urinary Tract Infection, 734*
- Glomerular Disorders, 737**
 - Glomerulonephritis, 737*
 - Nephrotic and Nephritic Syndromes, 740*
- Acute Kidney Injury, 742**
 - Classification of Kidney Dysfunction, 742*
 - Acute Kidney Injury, 742*
- Chronic Kidney Disease, 744**
 - Creatinine and Urea Clearance, 746*
 - Fluid and Electrolyte Balance, 746*
 - Calcium, Phosphate, and Bone, 746*
 - Protein, Carbohydrate, and Fat Metabolism, 746*

- Cardiovascular System, 746*
- Pulmonary System, 746*
- Hematologic System, 748*
- Immune System, 748*
- Neurologic System, 748*
- Gastrointestinal System, 748*
- Endocrine and Reproductive Systems, 748*
- Integumentary System, 748*

33 Alterations of Renal and Urinary Tract Function in Children, 751*Patricia Ring, Sue E. Huether*

- Structural Abnormalities, 751**
 - Hypoplastic/Dysplastic Kidneys, 751*
 - Polycystic Kidney Disease, 751*
 - Renal Agenesis, 752*
 - Ureteropelvic Junction Obstruction, 752*
 - Hypospadias, 753*
 - Epispadias and Exstrophy of the Bladder, 753*
 - Bladder Outlet Obstruction, 754*
- Glomerular Disorders, 754**
 - Glomerulonephritis, 754*
 - Immunoglobulin A Nephropathy, 754*
 - Nephrotic Syndrome, 754*
 - Hemolytic Uremic Syndrome, 755*
- Nephroblastoma, 755**
- Bladder Disorders, 756**
 - Urinary Tract Infections, 756*
 - Vesicoureteral Reflux, 757*
- Urinary Incontinence, 757**

UNIT 10 The Reproductive Systems**34 Structure and Function of the Reproductive Systems, 760***George W. Rodway, Sue E. Huether*

- Development of the Reproductive Systems, 760**
 - Sexual Differentiation in Utero, 760*
 - Puberty and Reproductive Maturation, 761*
- The Female Reproductive System, 762**
 - External Genitalia, 763*
 - Internal Genitalia, 764*
 - Female Sex Hormones, 767*
 - Menstrual (Ovarian) Cycle, 768*
- Structure and Function of the Breast, 770**
 - Female Breast, 770*
 - Male Breast, 772*
- The Male Reproductive System, 772**
 - External Genitalia, 772*
 - Internal Genitalia, 774*
 - Spermatogenesis, 775*
 - Male Sex and Reproductive Hormones, 775*
- Aging and Reproductive Function, 776**
 - Aging and the Female Reproductive System, 776*
 - Aging and the Male Reproductive System, 777*

35 Alterations of the Female Reproductive System, 780*Kathryn L. McCance*

- Abnormalities of the Female Reproductive Tract, 780**
- Alterations of Sexual Maturation, 781**
 - Delayed or Absent Puberty, 781*
 - Precocious Puberty, 782*
- Disorders of the Female Reproductive System, 783**
 - Hormonal and Menstrual Alterations, 783*
