UNDERSTANDING DEVELOPMENT & LEARNING

Implications *for* Teaching

OXFORD

CONTENTS

List of Figures	ix
List of Tables	xi
Preface	xii
About the Authors	xiv
Acknowledgments	xv
Guided Tour	xvi

1 WHAT IS LEARNING?

Introduction	1
Defining teaching	3
Defining learning	4
A brief history of 'learning' and 'teaching' in Western schools	6
Theories of 'learning', past and present	8
Conclusion	10
	25

2 THE LINKS BETWEEN HUMAN DEVELOPMENT AND LEARNING

Introduction	29
Basic issues in human development	31
Domains of human development	34
Conclusion	38
	60

3 UNDERSTANDING BRAIN DEVELOPMENT

Introduction	64
The developing brain—the early years	66
Structures of the brain	67
The developing brain and adolescence	78
Conclusion	81
	85

4

LEARNING, THINKING AND INTELLIGENCE

90

Introduction	92
Measuring intelligence	94
Notions of multiple intelligences	99
The neuroscience of intelligence	107
Controversies over intelligence	112
Conclusion	114

5

LANGUAGE DEVELOPMENT AND LEARNING

120

Introduction	122
Language development in children	125
Traditional theories of language development	127
Language and the brain	132
Maturation and biological sex differences	139
Enhancing language development	142
Conclusion	146

6

MEMORY AND LEARNING

153

Introduction	155
The neurobiology of memory	156
Systems and stages of memory	161
What hinders memory and why we forget	170
Enhancing memory: educational and pedagogical considerations	172
Conclusion	177

7

MOTIVATION AND LEARNING

182

Introduction	184
The neurobiology of motivation	185
The psychology of motivation	189

	Understanding contemporary learners	203
	Motivation in school: affective and effective considerations	205
	Conclusion	210
8	INCLUSIVE LEARNING	215
	Introduction	217
	Those who can, do	219
	Different brains, different learners	221
	Reaching the hard-to-reach student	234
	Extending the exceptional learner	237
	Conclusion	239
9	SOCIOCULTURAL FACTORS OF LEARNING	244
	Introduction	247
	Some background	249
	Vygotsky	249
	Sociocultural theory of cognitive development	250
	Bronfenbrenner	255
	Ecological systems theory	255
	Bio-ecological model	260
	Gender, socio-economic background and culture in the classroom	263
	Conclusion	277
10	NURTURING LEARNING	283
	Introduction	285
	The perils of standards and testing	286
	Homework: a necessary evil?	290
	Enrichment does not mean more!	293
	Stress and learning do not mix	296
	Rising to the challenges	300

4	The creative arts and learning	302
5	The brain, movement and learning	304
6	Conclusion	309
7	Measuring intelligence	314
8	Glossary	317
9	References	317
10	Index	346
11	Controversies over intelligence	346
12	Conclusion	346
13	Reaching the hard-to-teach student	346
14	Extending the exceptional learner	346
15	Conclusion	346
16	Language development in children	346
17	Traditional theories of language development	346
18	Language and the brain	346
19	Maturation and biological sex differences	346
20	Enhancing language development	346
21	Conclusion	346
22	Sociocultural theory of cognitive development	346
23	Brofenbrenner	346
24	Ecological systems theory	346
25	Bio-ecological model	346
26	Gender, socio-economic background and culture in the classroom	346
27	Conclusion	346
28	What hinders memory and why we forget	346
29	Enhancing memory: educational and pedagogical considerations	346
30	Conclusion	346
31	Introduction	346
32	The perils of standards and testing	346
33	Homework: a necessary evil?	346
34	Enrichment does not mean more!	346
35	Stress and learning do not mix	346
36	Rising to the challenges	346
