Strategy and Game Theory

Practice Exercises with Answers

Contents

1	Dominance Solvable Games	1
	Introduction	1
	Exercise 1—From Extensive Form to Normal form Representation-I ^A	2
	Exercise 2—From Extensive Form to Normal Form Representation-II ^A	3
	Exercise 3—From Extensive Form to Normal Form Representation-III ^B	5
	Exercise 4—Representing Games in Its Extensive Form ^A	7
	Exercise 5—Prisoners' Dilemma Game ^A	8
	Exercise 6—Dominance Solvable Games ^A	9
	Exercise 7—Applying IDSDS (Iterated Deletion of Strictly Dominated Strategies) ^A	10
	Exercise 8—Applying IDSDS When Players Have Five Available Strategies ^A	12
	Exercise 9—Applying IDSDS in the Battle of the Sexes Game ^A	16
	Exercise 10—Applying IDSDS in Three-Player Games ^B	17
	Exercise 11—Finding Dominant Strategies in games with $I \geq 2$ players and with Continuous Strategy Spaces ^B	19
	Exercise 12—Equilibrium Predictions from IDSDS versus IDWDS ^B	21
2	Pure Strategy Nash Equilibrium and Simultaneous-Move Games with Complete Information	25
	Introduction	25
	Exercise 1—Prisoner's Dilemma ^A	26
	Exercise 2—Battle of the Sexes ^A	29
	Exercise 3—Pareto Coordination ^A	30
	Exercise 4—Cournot game of Quantity Competition ^A	31
	Exercise 5—Games with Positive Externalities ^B	34
	Exercise 6—Traveler's Dilemma ^B	37
	Exercise 7—Nash Equilibria with Three Players ^B	39
	Exercise 8—Simultaneous-Move Games with $n \geq 2$ Players ^B	43
	Exercise 9—Political Competition (Hoteling Model) ^B	46
	Exercise 10—Tournaments ^B	49

Exercise 11—Lobbying ^A	52
Exercise 12—Incentives and Punishment ^B	54
Exercise 13—Cournot mergers with Efficiency Gains ^B	56
3 Mixed Strategies, Strictly Competitive Games, and Correlated Equilibria	61
Introduction	61
Exercise 1—Game of Chicken ^A	62
Exercise 2—Lobbying Game ^A	67
Exercise 3—A Variation of the Lobbying Game ^B	71
Exercise 4—Mixed Strategy Equilibrium with $n > 2$ Players ^B	73
Exercise 5—Randomizing Over Three Available Actions ^B	75
Exercise 6—Pareto Coordination Game ^B	78
Exercise 7—Mixing Strategies in a Bargaining Game ^C	80
Exercise 8—Depicting the Convex Hull of Nash Equilibrium Payoffs ^C	83
Exercise 9—Correlated Equilibrium ^C	87
Exercise 10—Relationship Between Nash and Correlated Equilibrium Payoffs ^C	95
Exercise 11—Identifying Strictly Competitive Games ^A	97
Exercise 12—Maxmin Strategies ^C	101
4 Sequential-Move Games with Complete Information	107
Introduction	107
Exercise 1—Ultimatum Bargaining Game ^B	108
Exercise 2—Electoral competition ^A	111
Exercise 3—Electoral Competition with a Twist ^A	113
Exercise 4—Trust and Reciprocity (Gift-Exchange Game) ^B	115
Exercise 5—Stackelberg with Two Firms ^A	117
Exercise 6—First- and Second-Mover Advantage in Product Differentiation.	122
Exercise 7—Stackelberg Game with Three Firms Acting Sequentially ^A	125
Exercise 8—Two-Period Bilateral Bargaining Game ^A	127
Exercise 9—Alternating Bargaining with a Twist ^B	129
Exercise 10—Backward Induction in Wage Negotiations ^A	130
Exercise 11—Backward Induction-I ^B	132
Exercise 12—Backward Induction-II ^B	134
Exercise 13—Moral Hazard in the Workplace ^B	137
5 Applications to Industrial Organization.	145
Introduction	145
Exercise 1—Bertrand Model of Price Competition ^A	146
Exercise 2—Bertrand Competition with Asymmetric Costs ^B	151
Exercise 3—Duopoly Game with A Public Firm ^B	154
Exercise 4—Cournot Competition with Asymmetric Costs ^A	157

Exercise 5—Strategic Advertising and Product Differentiation^C 160

Exercise 6—Cournot Oligopoly^B 163

Exercise 7—Commitment in Prices or Quantities?^B 164

Exercise 8—Fixed Investment as a Pre-Commitment Strategy^B 167

Exercise 9—Entry Detering Investment^B 170

Exercise 10—Direct Sales or Using A Retailer?^C 174

Exercise 11—Profitable and Unprofitable Mergers^A 179

6 Repeated Games and Correlated Equilibria 183

Introduction 183

Exercise 1—Infinitely Repeated Prisoner’s Dilemma Game^A 184

Exercise 2—Collusion when firms compete in quantities^A 188

Exercise 3—Collusion when N firms compete in quantities^B 192

Exercise 4—Collusion when N firms compete in prices^C 195

Exercise 5—Repeated games with three available strategies
to each player in the stage game^A 197

Exercise 6—Infinite-Horizon Bargaining Game Between
Three Players^C 202

Exercise 7—Representing Feasible, Individually Rational Payoffs^C . . . 204

Exercise 8—Collusion and Imperfect Monitoring^C 208

7 Simultaneous-Move Games with Incomplete Information 217

Introduction 217

Exercise 1—Simple Poker Game^A 218

Exercise 2—Incomplete Information Game, Allowing
for More General Parameters^B 221

Exercise 3—More Information Might Hurt^B 225

Exercise 4—Incomplete Information in Duopoly Markets^A 230

Exercise 5—Starting a Fight Under Incomplete Information^C 233

8 Auctions 237

Introduction 237

Exercise 1—First Price Auction with N Bidders^B 238

Envelope Theorem Approach 239

Direct Approach 241

Exercise 2—Second Price Auction^A 244

Exercise 3—All-Pay Auction^B 246

Envelope Theorem Approach 247

Direct Approach 248

Exercise 4—All-Pay Auctions (Easier Version)^A 251

Exercise 5—Third-Price Auction^A 252

Exercise 6—FPA with Risk-Averse Bidders^B 253

9 Perfect Bayesian Equilibrium and Signaling Games. 257

Introduction 257

Exercise 1—Finding Separating and Pooling Equilibria^A 258

Exercise 2—Job-Market Signaling Game ^B	267
Exercise 3—Cheap Talk Game ^C	276
Exercise 4—Firm Competition Under Cost Uncertainty ^C	284
Exercise 5—Signaling Game with Three Possible Types and Three Messages ^C	289
Exercise 6—Second-Degree Price Discrimination ^B	294
Exercise 7—Applying the Cho and Kreps' (1987) Intuitive Criterion in the Far West ^B	298
10 More Advanced Signaling Games	303
Introduction	303
Exercise 1—Poker Game with Two Uninformed Players ^B	304
Exercise 2—Incomplete Information and Certificates ^B	308
Exercise 3—Entry Game with Two Uninformed Firms ^B	317
Exercise 4—Labor Market Signaling Game and Equilibrium Refinements ^B	319
Exercise 5—Entry Deterrence Through Price Wars ^A	324
Exercise 6—Entry Deterrence with a Sequence of Potential Entrants ^C	329
Erratum to: Strategy and Game Theory	E1
Index	339
