Contents

Preface	ix
Prerequisites	1
P1 Exploring Mathematical Statements	3
P1.1 What is a mathematical statement?	3
P1.2 Basic set theory	5
P1.3 Quantifiers, both existential and universal	10
P1.4 Implication: the heart of a “provable” mathematical statement	12
P1.5 Negations	13
P1.6 Statements related to implication	17
P2 Proving Mathematical Statements	21
P2.1 Using definitions	21
P2.2 Proving a basic statement with an existential quantifier	22
P2.3 Proving a basic statement with a universal quantifier	23
P2.4 Proving an implication directly	24
P2.5 Proof by contrapositive	26
P2.6 Proof involving cases	27
P2.7 Proof by contradiction	28
P2.8 Proof by induction	29
P2.9 Proving that one of two (or one of several) conclusions is true	33
P3 Preliminary Content	35
P3.1 Relations and equivalence	35
P3.2 Functions	37
P3.3 Inequalities and epsilons	41

Main Content	43
1 Properties of $\mathbb{R}$	45
1.1 Preliminary work	46
1.2 Main Theorems	48
1.3 Follow-up work	56
2 Accumulation Points and Closed Sets	59
2.1 Preliminary work	59
2.2 Main Theorems	60
2.3 Follow-up work	62
3 Open Sets and Open Covers	65
3.1 Preliminary work	65
3.2 Main Theorems	67
3.3 Follow-up work	69
4 Sequences and Convergence	71
4.1 Preliminary work	71
4.2 Main Theorems	75
4.3 Follow-up work	78
5 Subsequences and Cauchy Sequences	83
5.1 Preliminary Work	83
5.2 Main Theorems	86
5.3 Follow-up Work	87
6 Functions, Limits, and Continuity	93
6.1 Preliminary Work	94
6.2 Main Theorems	96
6.3 Follow-up Work	98
7 Connected Sets and the Intermediate Value Theorem	101
7.1 Preliminary Work	101
7.2 Main Theorems	102
7.3 Follow-up Work	104

8 Compact Sets	109
8.1 Preliminary Work	109
8.2 Main Theorems	112
8.3 Follow-up Work	113
9 Uniform Continuity	115
9.1 Preliminary Work	115
9.2 Main Theorems	116
9.3 Follow-up Work	118
10 Introduction to the Derivative	119
10.1 Preliminary Work	119
10.2 Main Theorems	121
10.3 Follow-up Work	123
11 The Extreme and Mean Value Theorems	125
11.1 Preliminary Work	125
11.2 Main Theorems	126
11.3 Follow-up Work	128
12 The Definite Integral: Part I	133
12.1 Preliminary Work	134
12.2 Main Theorems	138
12.3 Follow-up Work	139
13 The Definite Integral: Part II	143
13.1 Preliminary Work	143
13.2 Main Theorems	145
13.3 Follow-up Work	148
14 The Fundamental Theorem(s) of Calculus	151
14.1 Preliminary Work	151
14.2 Main Theorems	152
14.3 Follow-up Work	156
15 Series	159
15.1 Preliminary work	160
15.2 Main Theorems	162
15.3 Follow-up work	170

Extended Explorations	175
E1 Function Approximation	177
E1.1 Taylor Polynomials and Taylor's Theorem	177
E1.2 Interpolation	180
E1.3 Divided Differences	184
E1.4 A Hybrid Approach	185
E2 Power Series	187
E2.1 Introduction to Power Series	187
E2.2 Differentiation of a Power Series	188
E2.3 Taylor Series	193
E3 Sequences and Series of Functions	199
E3.1 Pointwise Convergence	199
E3.2 Uniform Convergence and Uniformly Cauchy Sequences of Functions	200
E3.3 Consequences of Uniform Convergence	202
E4 Metric Spaces	207
E4.1 What is a Metric Space? Examples	207
E4.2 Metric Space Completeness	210
E4.3 Metric Space Compactness	213
E5 Iterated Functions and Fixed Point Theorems	219
E5.1 Iterative Maps and Fixed Points	219
E5.2 Contraction Mappings	223
E5.3 Newton's Method	225
Appendix	229
A Brief Summary of Ordered Field Properties	231
Bibliography	233
Index	235
