Contents

1	Medical Design	1
2	Describing Design	5
	As a Noun	5
	As a Verb	10
Part I	Intent	15
3	Design Outcomes in Health and Medicine	17
4	Design for Capacity	23
	Information Systems	25
	System Automation	29
	Efficiency Innovations	33
	Summarising Design for Capacity	36
5	Design for Knowledge	41
	Blueprints	43
	Awareness	46
	Visual Communication	49
	Summarising Design for Knowledge	53

6 Design for Enablement	57
Procedural Instruments	59
Diagnostics	65
Summarising Design for Enablement	70
7 Design for Empowerment	73
Promoting Ability	75
Confidence Instillers	80
Experiential Design	83
Summarising Design for Empowerment	90
Summarising Part I	91
 Part II Design	 97
8 The Process	99
Stage A: Consider	103
Stage B: Audit	105
Stage C: Intent	106
Stage D: Design/Scaffold	107
Stage E: Implement	108
Stage F: Evaluate	109
9 Utilising Design	111
Bravo: Redefining the Ageing Experience	112
Doula: Supporting Women with Gestational Diabetes Mellitus	120
Machines that Keep the Heart Pumping	126
10 Implementing Design in Health and Medicine	147
Frame Intent	148
Leverage Design	148
Plan Implementation	150
Final Thoughts	153
 Appendix: Case Study Summaries	 155
