Sustainable Food Drying Techniques in Developing Countries: Prospects and Challenges

Contents

1	Insights of Drying	1
1.1	Developing Countries and their Economic Status	2
1.2	Food Waste Scenario	5
1.3	Food Drying	7
1.3.1	Water Distribution in Fresh Food	8
1.3.2	Mass Transfer During Drying	10
1.3.3	Heat Transfer During Drying	13
1.3.4	Relation Between Process Parameters of Drying and Food Quality	15
	References	17
2	Conditions for Selecting Drying Techniques in Developing Countries	21
2.1	Quality Aspect of Drying	23
2.1.1	Physical Quality Attributes	23
2.1.2	Optical Properties	25
2.1.3	Sensory Properties	26
2.1.4	Biological Quality Attributes	26
2.1.5	Nutritional Quality Attributes	27
2.2	Energy and Time	27
2.3	Cost and Safety	31
2.4	Method of Proposing Drying Technology for Developing Countries	33
	References	36
3	Energy and Drying	41
3.1	Non-renewable Energy Usages Around the World	42
3.1.1	Coal	42
3.1.2	Oil	43
3.1.3	Natural Gas	44
3.2	Renewable Energy	48
3.3	Energy Required for Drying	52

3.4	Barriers in Renewable Energy Integration.....	55
	References.....	56
4	Practiced Drying Technologies in Developing Countries	63
4.1	Sun Drying.....	64
4.1.1	Basic Principle of Sun Dryer.....	65
4.2	Solar Drying.....	67
4.2.1	Typical Features of Solar Dryers.....	67
4.2.2	Basic Principles of Solar Dryer.....	70
4.3	Biomass Drying.....	70
4.3.1	Basic Principle of Biomass Dryer.....	72
4.4	STR Dryer.....	73
4.4.1	Basic Principle of STR Dryer.....	73
4.5	Reversible Air Dryer, SRA.....	75
4.5.1	Basic Principle of SRA Dryer.....	76
	References.....	79
5	Sustainable Drying Techniques for Developing Countries	81
5.1	Classification of Drying Technique.....	82
5.2	Improved Solar Drying.....	84
5.2.1	Phase Change Materials for Thermal Energy Storage in Improved Solar Drying.....	85
5.2.2	Overview of Different Types of Proposed Improved Solar Dryers.....	87
5.2.3	Comparison Among the Different Improved Solar Dryers.....	97
5.3	Geothermal Drying.....	98
5.3.1	Recommended Geothermal Dryer for Food Products.....	99
5.3.2	Comparison Among Different Geothermal Food Dryers.....	106
5.4	Hybrid Geothermal-Solar Drying.....	107
5.4.1	System Description.....	110
5.4.2	Feasibility Analysis.....	113
5.5	Heat Pump Drying.....	115
5.5.1	Working Principle.....	116
5.5.2	Mathematical Model.....	120
5.5.3	Recommended Heat Pump Dryers for Food Products.....	121
5.5.4	Performance Analysis.....	127
5.6	Desiccant Based Drying.....	128
5.6.1	Desiccant Drying Principle.....	128
5.6.2	Desiccant Based Food Drying System.....	129
5.6.3	Performance Analysis.....	130
5.7	Improved Biomass Drying.....	131

5.7.1	Recommended Improved Biomass Drying for Food Products	131
5.7.2	Comparison Among the Various Methods for Designing Improved Biomass Dryers	134
5.8	Drying Using Waste Heat.	135
5.8.1	Available Sources of Waste Heat	136
5.8.2	Proposed Hybrid Drying System	137
5.8.3	Mathematical Modelling	137
5.8.4	Feasibility Analysis	138
5.9	Hybrid Solar-Biomass Drying	142
5.10	Osmotic Dehydration	142
5.10.1	Osmotic Pressure	144
5.10.2	Mass Transfer Is Osmotic Drying	144
5.10.3	Osmotic Dehydration Techniques for Food Products	145
5.11	Pulsed Microwave Solar Dryer	146
5.11.1	Basic Principle of Pulsed Microwave Drying	148
5.11.2	Experimental Design and Fabrication	154
5.11.3	Feasibility Analysis	156
5.12	Drying Technique Selection.	157
	References.	159
6	Challenges in Implementing Proposed Sustainable Food Drying Techniques	169
6.1	Overall Challenges of Drying	170
6.1.1	Preparation of Food Samples	171
6.1.2	Environmental Cleanliness	171
6.1.3	Need for Specialized Equipment	171
6.1.4	Food Texture	172
6.1.5	Drying Time.	172
6.1.6	Energy Required for Drying	172
6.1.7	Nutrition Content	173
6.1.8	Taste of Food	173
6.2	Specific Challenges in Implementing Proposed Drying Techniques	173
6.2.1	Challenges in Implementing Improved Solar Drying Systems	174
6.2.2	Challenges in Implementing Geothermal Drying Systems	175
6.2.3	Challenges in Implementing Hybrid Geothermal Drying Systems	176
6.2.4	Challenges in Utilising Heat Pump Drying Systems.	178
6.2.5	Challenges in Applying Waste Heat Convective Drying (WHCD) Systems	178
6.2.6	Challenges in Applying Desiccant Drying Systems	179

6.2.7	Challenges in Applying Improved Biomass Drying Systems	180
6.2.8	Challenges in Applying Hybrid Solar-Biomass Drying Systems	182
6.2.9	Challenges in Applying PMSD Systems	182
6.2.10	Challenges in Applying Osmotic Dehydration Systems ...	183
	References	184
7	Conclusion	187
