THE TRANS-NEPTUNIAN SOLAR SYSTEM

Edited by

DINA PRIALNIK

Department of Geosciences, Tel Aviv University, Tel Aviv, Israel

M. ANTONIETTA BARUCCI

LESIA, Paris Observatory, PSL, CNRS, Sorbonne University, University Paris-Diderot, Paris, France

LESLIE A. YOUNG

Southwest Research Institute, Boulder, CO, United States

Contents

Contributors xi

Preface xiii

1. Introduction: The Trans-Neptunian belt—Past, present, and future

Julio A. Fernández

- 1.1 The solar system beyond Neptune: The search for planet X 1
- 1.2 Early cosmogonic ideas 2
- 1.3 The Jupiter family comet connection 4
- 1.4 The naming controversy 6
- 1.5 The discovery 6
- 1.6 Dynamical structure and transfer mechanisms 7
- 1.7 Size distribution and massive TNOs 10
- 1.8 Is Pluto a planet? Discussion of its status and redefinition of planet 11
- 1.9 TNOs today: Current picture and new challenges 14
- 1.10 Concluding remarks 18
- Acknowledgments 19
- References 19
- Further reading 22

Part I. Dynamics and evolution

2. Kuiper belt: Formation and evolution

Alessandro Morbidelli, David Nesvorný

- 2.1 Introduction 25
- 2.2 Accretion of KBOs 26
- 2.3 Dynamical sculpting of the Kuiper belt 32
- 2.4 Relationships with other populations of small bodies 41
- 2.5 Collisional evolution 46
- 2.6 Conclusions 51
- References 53

3. Perspectives on the distribution of orbits of distant Trans-Neptunian objects

J.J. Kavelaars, Samantha M. Lawler, Michele T. Bannister, Cory Shankman

- 3.1 Biases in the detection of distant solar system objects 61
- 3.2 Potential mechanisms forming the orbits of high-pericenter TNOs 64
- 3.3 Diffusion and motion of large semimajor axes orbits 67
- 3.4 Dynamical effects expected to be imprinted on the distant Kuiper belt by the presence of an additional massive planet 69

- 3.5 Detectability of orbital effects 71
- 3.6 Summary and conclusions 73
 - Acknowledgments 74
 - References 74
- 4. Observational constraints on an undiscovered giant planet in our solar system
 - Chadwick A. Trujillo
 - 4.1 Introduction 79
 - 4.2 Observational evidence for the planet 81
 - 4.3 Survey methodology and observational bias 88
 - 4.4 Action of the giant planet 93
 - 4.5 Finding the planet 95
 - 4.6 Summary 98
 - Acknowledgments 98
 - References 98

Part II. Properties and structure

- 5. Surface composition of Trans-Neptunian objects
 - M. Antonietta Barucci, Frederic Merlin
 - 5.1 Introduction 109
 - 5.2 Techniques 110
 - 5.3 Surface modeling 115
 - 5.4 Surface composition 116
 - 5.5 Space weathering 118
 - 5.6 Discussion and conclusion 119
 - References 123
- 6. Volatile evolution and atmospheres of Trans-Neptunian objects
 - Leslie A. Young, Felipe Braga-Ribas, Robert E. Johnson
 - 6.1 Introduction 127
 - 6.2 Spectral evidence of N_2 , CO, and CH_4 on the surfaces of TNOs 128
 - 6.3 Volatile-supported atmospheres 131
 - 6.4 Expected volatile retention 134
 - 6.5 Variation of atmospheres over an orbit 137
 - 6.6 Detections of or limits on atmospheres by stellar occultation 140
 - 6.7 Future research 144
 - Acknowledgments 145
 - References 145
- 7. Trans-Neptunian objects and Centaurs at thermal wavelengths
 - Thomas Müller, Emmanuel Lellouch, Sonia Fornasier
 - 7.1 Introduction 153
 - 7.2 Thermal data for TNOs and Centaurs 154
 - 7.3 Radiometric techniques 155

- 7.4 Albedos, sizes, and densities 158
- 7.5 Thermal and emissivity properties 170
- 7.6 Outlook 174
 - Acknowledgments 175
 - References 175
- 8. Internal structure and cryovolcanism on Trans-Neptunian objects
 - Aur lie Guilbert-Lepoutre, Dina Prialnik, Robin M tayer
 - 8.1 Introduction 183
 - 8.2 Evolution of large- and mid-size TNOs 185
 - 8.3 Evolution of the Pluto-Charon system 188
 - 8.4 Constraining cryovolcanism and the internal structure of TNOs 191
 - 8.5 Where should we go from here? 195
 - References 195

Part III. Multiple systems

- 9. Trans-Neptunian binaries (2018)
 - Keith S. Noll, William M. Grundy, David Nesvorn y, Audrey Thirouin
 - 9.1 Overview 205
 - 9.2 Inventory 206
 - 9.3 Binary frequency 208
 - 9.4 Mutual orbits 210
 - 9.5 Properties derived from orbits 215
 - 9.6 Colors 219
 - 9.7 Formation scenarios 219
 - 9.8 Future observations and summary 220
 - Acknowledgments 221
 - References 221
 - Further reading 224
- 10. Trans-Neptunian binary formation and evolution
 - Adri n Brunini
 - 10.1 Introduction 225
 - 10.2 Dynamical mechanisms driving the orbital evolution of Trans-Neptunian binaries 228
 - 10.3 All together now 235
 - 10.4 Formation mechanisms 239
 - 10.5 Conclusions and perspectives 243
 - References 244
 - Further reading 247
- 11. The dynamics of rings around Centaurs and Trans-Neptunian objects
 - Bruno Sicardy, Stefan Renner, Rodrigo Leiva, Fran oise Roques, Maryame El Moutamid, Pablo Santos-Sanz, Josselin Desmars
 - 11.1 Introduction 249
 - 11.2 Rings around irregular bodies 250

- 11.3 Potential of a nonaxisymmetric body 253
- 11.4 Resonances around nonaxisymmetric bodies 254
- 11.5 Lindblad resonances 258
- 11.6 Beyond the first order 260
- 11.7 Rings and satellite formation 263
- 11.8 Conclusions 264
 - Appendix 265
 - Acknowledgments 266
 - References 266

12. The Pluto system after New Horizons

John R. Spencer, William M. Grundy, Francis Nimmo, Leslie A. Young

- 12.1 Knowledge of Pluto before New Horizons 271
- 12.2 The New Horizons encounter with Pluto 273
- 12.3 Pluto 275
- 12.4 Charon 282
- 12.5 Small satellites 283
- 12.6 System origin and evolution 284
- 12.7 Conclusions 285
 - References 285

Part IV. Relations with other populations

13. Pluto and Charon as templates for other large Trans-Neptunian objects

William M. Grundy

- 13.1 Introduction 291
- 13.2 Powering planetary activity 292
- 13.3 Pluto 292
- 13.4 Charon 299
- 13.5 Expectations for other large TNOs 302
 - Acknowledgments 302
 - References 303

14. From Centaurs to comets: 40 Years

Nuno Peixinho, Audrey Thirouin, Stephen C. Tegler, Romina P. Di Sisto, Audrey Delsanti, Aurélie Guilbert-Lepoutre, James G. Bauer

- 14.1 Introduction 307
- 14.2 Centaurs as progeny of TNOs 308
- 14.3 Centaurs as progenitors of Jupiter-family comets 309
- 14.4 Centaurs by themselves 309
- 14.5 Discussion 321
 - Acknowledgments 322
 - References 322

15. On the dynamics of comets in extrasolar planetary systems

Rudolf Dvorak, Birgit Loibnegger, Manfred Cuntz

- 15.1 Introduction 331
- 15.2 Extrasolar Oort clouds 332
- 15.3 Evidence of the existence of extrasolar comets 333
- 15.4 Three examples of the dynamics of extrasolar comets 335
- 15.5 Conclusion 346
 - Acknowledgments 349
 - References 349

16. Extrasolar Kuiper belts

Mark C. Wyatt

- 16.1 Introduction 351
- 16.2 Extrasolar Kuiper belt observations 352
- 16.3 An extrasolar perspective of the Kuiper belt 354
- 16.4 Extrasolar Kuiper belt properties (and comparison with solar system) 356
- 16.5 Conclusions 367
 - References 368

Part V. Prospects for the future

17. Plans for and initial results from the exploration of the Kuiper belt by New Horizons

S. Alan Stern, John R. Spencer, Anne Verbiscer, Heather E. Elliott, Simon P. Porter

- 17.1 New Horizons Kuiper belt mission background 379
- 17.2 Kuiper belt mission detailed objectives 380
- 17.3 Sample results to date 384
- 17.4 Anticipated future results 390
- 17.5 Future Kuiper belt exploration after New Horizons 392
 - Acknowledgments 393
 - References 393

18. Surface properties of large TNOs: Expanding the study to longer wavelengths with the James Webb Space Telescope

Noemí Pinilla-Alonso, John A. Stansberry, Bryan J. Holler

- 18.1 Introduction 395
- 18.2 Dwarf planets and candidate dwarf planets 396
- 18.3 Surface compositions of dwarf planets and candidate dwarf planets 397
- 18.4 Potential of the *James Webb Space Telescope* 400
- 18.5 Summary 410

Acknowledgments 410

References 410

19. Stellar occultations by Trans-Neptunian objects: From predictions to observations and prospects for the future

José L. Ortiz, Bruno Sicardy, Julio I.B. Camargo, Pablo Santos-Sanz, Felipe Braga-Ribas

19.1 Introduction 413

19.2 General results from stellar occultations thus far and lessons learned 415

19.3 The future of the predictions 422

19.4 The future of the observations 427

19.5 Aspects needed to improve the scientific output 429

Acknowledgments 434

References 434

Further reading 437

20. A darkness full of worlds: Prospects for discovery surveys in the outer solar system

Michele T. Bannister

20.1 Introduction 439

20.2 Discovery surveys 440

20.3 Current and future surveys 444

20.4 Conclusion 446

Acknowledgments 447

References 447

Epilogue 455
