## Part I

### Impact of COVID-19 on mental health

#### 1. COVID-19 and the impact on gambling, sex, and pornography use and addictions

*Anastasia Hronis and Patrick Dixon*

Introduction	3
The impact of COVID-19 on gambling behaviors and addiction	4
Gambling and gambling disorder	4
Vulnerability to gambling disorder	5
The impact of COVID-19 on gambling use and gambling disorder	7
The impact of COVID-19 on sexual behaviors and addictions	10
Sexual behaviors and sex addiction	10
The impact of COVID-19 on sexual behaviors and addictions	11
The impact of COVID-19 on pornography use and addiction	12
Pornography use and addiction	12
The impact of COVID-19 on pornography use and addiction	13
Conclusion	14
References	14

#### 2. Care leavers' experiences of COVID-19 in Uganda and Ghana: Implications for their mental health and psychosocial wellbeing

*Paul Bukuluki, Kwabena Frimpong-Manso, and Francis Kato*

Introduction	19
Methodology	21
Data analysis	23
Results	23
The effects of COVID-19	26
Employment and livelihood-related issues	26

Strained relationships and disrupted social support systems	27
Fear and anxiety	28
Coping mechanisms	29
Religion, faith, and prayer	29
Changing or holding on the known	30
Maintaining an optimistic position and accepting change	31
Connectedness to informal support systems	32
Discussion	32
Conclusion	34
References	34
 <b>3. The impact of COVID-19 on mental health of frontline health workers in Ghana and Uganda</b>	
<i>Simon Peter Katongole, Peter Yaro, and Paul Bukuluki</i>	
<b>Introduction</b>	37
<b>Methods</b>	40
<b>Results</b>	41
Mental health and psychosocial challenges faced by the frontline health workers	41
Emotional effects of COVID-19 to frontline health workers	41
Psychosocial factors affecting frontline health workers engaged in COVID-19 services provision	48
Behavioral mental health challenges faced by frontline health workers	51
The coping mechanisms to overcome mental health and psychosocial challenges among frontline health workers during COVID-19	52
Interpersonal problem solving mechanisms	53
Selection of the health workers to be part of the response team	53
Appropriate scheduling of duties	53
Developing mutual support among the response team members	54
Good healthcare system leadership	55
Interpersonal emotional building mechanisms	55
Morale boosting from workmates	56
Family support	57
The intrapersonal coping strategies employed by frontline health workers in COVID-19	57
Adherence to infection prevention control and standard operating procedures	57
Staying away from family when one has been exposed	58
The sense of calling to serve patients	58
Developed positive thinking	59
Feeling of making a special contribution to the pandemic	60
<b>Spirituality</b>	60
Believing that COVID-19 in the hospitals is less severe than earlier thought about	60
Bearing in mind that one has no underlying medical condition that would put them at risk	61

Adequate training and preparedness	61
Taking COVID-19 as an opportunity to learn	62
Discussion	62
Conclusion	64
References	65
 <b>4. The psychosocial effect of COVID-19 on urban refugees: Narratives from Congolese refugees living in Kampala</b>	
<i>Paul Bukuluki, Hadijah Mwenyango, Francis Kato, Agnes Kyamulabi, and Alex Bagabo</i>	
Introduction	69
Methodology	71
Design	71
Sample	71
Procedures	72
Results	73
Key findings: Psychosocial impact of COVID-19 on urban refugees	73
Fear of COVID-19	75
Anger/irritability	75
Financial distress	76
Anxiety	76
Sleep disorders	77
Social and physical isolation	78
Loss of social support	79
Social malfunction	80
Resilience and personal coping mechanisms	80
Discussion	81
Social role limitations and lost identity	82
Ruptured lives	83
Loss of personal control	83
Resilience and coping mechanisms	84
Do refugees need psychosocial support?	84
Conclusion	85
References	86
 <b>5. Psychological distress, social support, and psychological flexibility during COVID-19</b>	
<i>Richard Tindle and Ahmed A. Moustafa</i>	
Psychological distress during COVID-19	90
Social support	92
Psychological flexibility	94
Conclusions	96
References	97

**6. The impact of COVID-19 social restrictions on culture and psychosocial well-being: The Ghanaian experience**

*Alfred Dickson Dai-Kosi, Victoria Akuorkor Acquaye, Kingsley Kwadwo Asare Pereko, Paa-Kwesi Blankson, and Christian Ackom*

Introduction	103
COVID-19 lockdowns and restrictions	104
COVID-19 and sociocultural challenges of Ghanaians	105
Influence of restrictions and lockdowns on individuals	107
Conceptualization of health problems and COVID-19 compliance	109
Conclusion	113
References	113

**7. "Alone, but not lonely": The impact of COVID-19 on older persons and the role of technology in staying connected**

*Ceylan Okan, Gabrielle Weidemann, and Phoebe E. Bailey*

Introduction	117
Chapter overview	117
Loneliness in older age and mental health implications	118
Loneliness and mental health impacts during the coronavirus pandemic	120
Alternative ways to socialize? Online communication and social media use by older adults	123
Older adults and online communication during the coronavirus pandemic	126
Conclusion	127
References	127

**8. Social isolation as a laboratory model of depression**

*Gunes Unal*

Introduction: Social isolation as a laboratory model of depression	133
Sociality and the meaning of isolation	134
Defining social isolation	136
Self-imposed/voluntary vs. enforced isolation	137
The behavioral effects of social isolation	138
The physiological effects of social isolation	140
Conclusion: The uniquely human aspect of social isolation	142
References	143

## 9. Increased hallucinations in patients with Alzheimer's disease during the Covid-19 lockdown: A presentation of two cases

*Mohamad El Haj and Frank Larøi*

The two cases	154
Hallucination assessment and results	155
Discussion	155
References	157

## 10. Eating disorders during a coronavirus pandemic

*Samantha Hayes and Evelyn Smith*

Introduction	159
Eating disorders	160
Clinical implications	165
Conclusion	169
References	169

## 11. Obsessive-compulsive disorder during and after Covid-19 pandemic

*Anıl Şafak Kaçar*

Introduction	171
Obsessive-compulsive disorder	171
How to decide excessive behavior during the Covid-19 pandemic?	174
Effect of Covid-19 pandemic on OCD patients	175
Expected increase in OCD prevalence	179
Conclusions	181
Acknowledgments	182
References	182

## Part II

### Recent topics on impact of COVID-19 on health

## 12. The role of nutrition in respiratory disease and COVID-19 management

*Kingsley Kwadwo Asare Pereko, Enock Dugbatey Mensah, Victoria Akuorkor Acquaye, Christiana Nsiah-Asamoah, Flora Chadare, Freda Dzifa Intiful, Jacob Setorglo, Nancy Innocentia Ebu, and Alfred Dickson Dai-Kosi*

Introduction	187
Background	188
Nutrition and immunity	188
Nutrition infection cycle	192

Nutrition and infectivity	193
Nutrition and disease recovery	194
<b>Nutrition and respiratory illness</b>	195
Nutrition and respiratory infectivity	195
Nutrition and immunity against respiratory illness	196
Nutrition and recovery from respiratory illness	198
<b>Nutrition and COVID-19</b>	199
Contemporary evidence on nutrition and COVID-19	199
Nutrition and immune development in COVID-19	200
Nutrition and COVID-19 infectivity	200
Nutrition and recoveries from COVID-19	201
Nutrition for optimal mental health during COVID-19	202
Nutrition in management of COVID-19	204
<b>Conclusion</b>	205
<b>References</b>	206
<b>13. Physical activity as a counteracting measure to mitigate the harmful effects of COVID-19 lockdowns: Special focus on healthy children, adolescents, adults, elderly, athletes, and people with Down syndrome</b>	
<i>Monoem Haddad, Zied Abbès, Amine Ghram, Germina Cosma, and Karim Chamari,</i>	
<b>Introduction</b>	215
<b>Preventing COVID-19 spread</b>	217
<b>Consequences of COVID-19 on health</b>	217
<b>Sedentary behavior, bed rest, and physical inactivity during COVID-19 lockdown</b>	218
<b>Why are physical activity and sports important for health?</b>	219
Physical activity and sports in healthy adults	219
Physical activity and sports in elderly	220
Physical activity and sports in children and adolescents	222
Physical activity and sports in athletes	223
Physical activity in individuals with Down syndrome	224
<b>Conclusion</b>	226
<b>References</b>	227
<b>14. Parenting through the COVID-19 pandemic</b>	
<i>Natalie M.V. Morrison and Ben. W. Morrison</i>	
<b>Introduction</b>	235
<b>The changing landscape of parenting</b>	236
<b>Relational models of the parent-child dynamic</b>	238
<b>COVID-19 parental stressors</b>	240
Health anxiety	241
Role collision and navigation	242
Financial burden	246

Sleep deprivation	246
Family separation	247
<b>Parental burnout</b>	247
Family violence	249
<b>Parental coping through COVID-19</b>	250
<b>Parent-led posttraumatic growth</b>	253
<b>Conclusion</b>	254
<b>References</b>	255
<b>15. Compliance with health-protective behaviors in relation to COVID-19: The roles of health-related misinformation, perceived vulnerability, and personality traits</b>	
<i>Zahir Vally</i>	
<b>Introduction</b>	263
<b>Health-related misinformation</b>	265
The propagation of health-related misinformation on social media	266
Factors associated with the sharing of COVID-19 misinformation	267
Evidence of the association between belief in conspiracy theories and COVID-19 health-protective behaviors	269
<b>Perceived risk and health-protective behaviors</b>	271
<b>The role of personality traits in the adoption of health-protective behaviors</b>	273
<b>Summary and conclusion</b>	275
<b>References</b>	276
<b>16. Social media use, experiences of social connectedness and wellbeing during COVID-19</b>	
<i>Jacqui Taylor-Jackson, Imogen Abba, Alessandra Baradel, Jeremy Lay, Jasmin Herewini, and Amber Taylor</i>	
<b>Literature review</b>	283
Social connectedness and psychological wellbeing	285
Social media and social connectedness	285
Social media and negative impacts on psychological wellbeing	287
Methodological limitations of research relating to social media use and wellbeing	287
<b>Rationale</b>	288
<b>Method</b>	288
<b>Results</b>	289
Quantitative data analysis	289
Qualitative data analysis	289
<b>Discussion</b>	295
<b>Conclusions and further research</b>	297
<b>References</b>	297

## 17. Cognitive behavior therapy for COVID-19 related distress

*Karen Moses and Bethany M. Wootton*

COVID-19 and distress	301
Assessment of COVID-19 related distress	302
Cognitive behavior therapy for COVID-19 related distress	304
Individualized case formulation	304
Psychoeducation	305
Situation selection	305
Cognitive restructuring	305
In vivo exposure	306
Imaginal exposure	307
Eliminating safety behaviors	308
Structured problem solving	308
Physiological arousal and stress reduction	309
Activity scheduling	309
Sleep hygiene	310
Crisis support	310
Remote CBT	311
Conclusion	312
