|--------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Preface.....                                                                                                                                                       | VII |
| Chapter 1 <b>Implementing Complex Fuzzy Analysis for Business Planning Systems</b> .....                                                                           | 1   |
| Danil Dintsis                                                                                                                                                      |     |
| Chapter 2 <b>Indoor Mobile Positioning Using Neural Networks and Fuzzy Logic Control</b> .....                                                                     | 19  |
| Anatoly D. Khomonenko, Sergey E. Adadurov, Alexandr V. Krasnovidow<br>and Pavel A. Novikov                                                                         |     |
| Chapter 3 <b>Design and Stability Analysis of Fuzzy-Based Adaptive Controller for<br/>Wastewater Treatment Plant</b> .....                                         | 42  |
| Mao Li                                                                                                                                                             |     |
| Chapter 4 <b>Non-Fragile Guaranteed Cost Control of Nonlinear Systems with Different<br/>State and Input Delays Based on T-S Fuzzy Local Bilinear Models</b> ..... | 60  |
| Junmin Li, Jinsha Li and Ruirui Duan                                                                                                                               |     |
| Chapter 5 <b>Stabilizing Fuzzy Control via Output Feedback</b> .....                                                                                               | 81  |
| Dušan Krokavec and Anna Filasová                                                                                                                                   |     |
| Chapter 6 <b>A Fuzzy Logic Approach for Separation Assurance and Collision Avoidance for<br/>Unmanned Aerial Systems</b> .....                                     | 104 |
| Brandon Cook, Tim Arnett and Kelly Cohen                                                                                                                           |     |
| Chapter 7 <b>A New Methodology for Tuning PID-Type Fuzzy Logic Controllers Scaling<br/>Factors Using Genetic Algorithm of a Discrete-Time System</b> .....         | 136 |
| Wafa Gritli, Hajer Gharsallaoui and Mohamed Benrejeb                                                                                                               |     |
| Chapter 8 <b>Fuzzy Interpolation Systems and Applications</b> .....                                                                                                | 151 |
| Longzhi Yang, Zheming Zuo, Fei Chao and Yanpeng Qu                                                                                                                 |     |
| Chapter 9 <b>EMG-Controlled Prosthetic Hand with Fuzzy Logic Classification Algorithm</b> .....                                                                    | 173 |
| Beyda Taşar and Arif Gülten                                                                                                                                        |     |
| Chapter 10 <b>ANFIS Definition of Focal Length for Zoom Lens via Fuzzy Logic Functions</b> .....                                                                   | 196 |
| Bahadır Ergün, Cumhur Sahin and Ugur Kaplan                                                                                                                        |     |
| Chapter 11 <b>Vibration Suppression Controller of Multi-Mass Resonance System<br/>Using Fuzzy Controller</b> .....                                                 | 220 |
| Hidehiro Ikeda                                                                                                                                                     |     |
