Part I The Molecules of Life

1 Introduction: Life Is Made of Molecules!	3
1.1 Selected Illustrative Example #1: The Molecular Origin of Life	4
1.1.1 The Replicator Hypothesis	5
1.1.2 The Metabolism Hypothesis	5
1.2 Selected Illustrative Example #2: Viruses—Molecular Machines Interfering with Life	10
1.3 Selected Illustrative Example #3: Molecules as Tools—Drug Discovery and Development	15
Selected Bibliography	21
Challenging Case 1.1: The Origin of Life and Panspermia	22
Source	22
Case Description	22
Questions	23
Biochemical Insights	24
Final Discussion	26
Challenging Case 1.2: Science in Fiction—Mighty Weakness vs. Micropower	27
Source	27
Case Description	27
Questions	28
Biochemical Insights	29
Final Discussion	31
Challenging Case 1.3: Mars—NASA's Laboratory for the Origin of Life ... On Earth!	32
Source	32
Case Description	32
Questions	34
Biochemical Insight	35
Final Discussion	35

2	The Chemistry and Physics of Life	37
2.1	The Basics of Chemistry in Cells and Tissues	43
2.1.1	Principal Biological Buffers	50
2.2	More than Only Chemistry: There Is Physics Too	52
	Selected Bibliography	61
	Challenging Case 2.1: Going Deep into Respiratory Acidosis	62
	Source	62
	Case Description	62
	Questions	64
	Biochemical Insights	65
	Final Discussion	68
	Challenging Case 2.2: Reindeer Know the Color of UV Light	70
	Source	70
	Case Description	70
	Questions	71
	Biochemical Insight	72
	Final Discussion: Examples of Missing and Misplaced Colors in Literature and Music	73
	Challenging Case 2.3: <i>Malacocephalus</i> —The Strange Case of the Radioactive Fish from the Deep Sea	75
	Source	75
	Case Description	75
	Questions	82
	Biochemical Insight	82
	Final Discussion	85
3	The Families of Biological Molecules	89
3.1	Lipids and the Organization of Their Supramolecular Assemblies	90
3.1.1	The Structure of Biological Membranes	98
3.1.2	The Structure of Lipoproteins	105
3.2	Saccharides and Their Polymers and Derivatives	110
3.2.1	From Monomers to Polymers: Polysaccharides	116
3.2.2	Molecular Conjugates of Mono- and Oligosaccharides	117
3.2.3	Molecular Conjugates of Oligosaccharides	123
3.2.4	Polymers of Saccharide Conjugates: Nucleic Acids	126
3.3	Amino Acids and Their Polymers: Peptides and Proteins	131
3.3.1	From Monomers to Polymers: Peptides and Proteins	136
3.3.2	Structure and Function in Proteins	144
3.3.3	Cooperative Interplay Between Tertiary-Level and Quaternary-Level Structure	149
3.3.4	Enzymes	155
	Selected Bibliography	164
	Challenging Case 3.1: Biochemistry in Dali's (he)art	165
	Source	165
	Case Description	165

Questions	168
Biochemical Insights	168
Final Discussion	169
Further Reading	169
Challenging Case 3.2: From Best with Proteins to Worst with DNA . .	170
Source	170
Case Description	170
Questions	174
Biochemical Insights	174
Final Discussion	175
Challenging Case 3.3: London Fatberg Analysis—Impact of Urban Obesity on the Metropolitan Vasculature	176
Source	176
Case Description	176
Questions	181
Biochemical Insights	182
Final Discussion	184

Part II The Interplay and Regulation of Metabolism

4 Introduction to Metabolism	189
4.1 Consecutive Reactions Without Enzymes	191
4.2 Consecutive Reactions with Enzymes	197
4.2.1 The Bases of Enzymatic Catalysis and Its Impact in Metabolism	200
Selected Bibliography	213
Challenging Case 4.1: The Dark Side of Caffeine	214
Source	214
Case Description	214
Questions	220
Biochemical Insight	221
Final Discussion: Facts and Fantasies About Energy Drinks	228
Challenging Case 4.2: Missing the Obvious ... Twice! The Devil Is in the Details, so Is Recognition by Peers	230
Sources	230
Description	230
Questions	235
Biochemical Insights	236
Final Discussion	243
Challenging Case 4.3: Building Models in Metabolism, Descriptive, Predictive ... Useful!	245
Source	245
Case Description	245
Questions	246
Biochemical Insight	247
Final Discussion	249

5	Regulation of Metabolisms	253
5.1	Levels of Regulation: Impact and Time Scale	258
5.2	Inhibition and Activation of Enzymes by Ligands	260
5.2.1	Nomenclature of Ligands	266
5.3	The Availability of Primary Precursors in a Metabolic Pathway	267
5.3.1	Transport of Metabolites and Effectors Across Membranes	268
5.4	Slower (But Efficient!) Mechanisms of Controlling Enzyme Action	273
5.5	Key Molecules in Energy Metabolism	278
	Selected Bibliography	282
	Challenging Case 5.1: Mushroom Poisons Starring on Stage and Science	283
	Source	283
	Case Description	283
	Questions	287
	Biochemical Insights	290
	Final Discussion	294
	Challenging Case 5.2: The Biochemistry of Zombies	296
	Source	296
	Case Description	296
	Questions	299
	Biochemical Insights	299
	Final Discussion	300
6	Energy Conservation in Metabolism: The Mechanisms of ATP Synthesis	301
6.1	ATP Synthesis by Substrate-Level Phosphorylation	302
6.1.1	A Historical Perspective of the Fermentation Process Discovery	303
6.1.2	An Overview of the ATP Synthesis by Substrate-Level Phosphorylation During Fermentation	306
6.1.3	Glucose Fermentation Reactions	309
6.2	ATP Synthesis Through Oxidative Phosphorylation	310
6.2.1	A Historical Perspective of the Understanding of Cellular Respiration	312
6.2.2	An Overview of Oxidative Phosphorylation Process	318
6.2.3	The Electron Transport System	320
6.2.4	The ATP Synthesis Through Oxidative Phosphorylation	329
6.2.5	Regulation of Oxidative Phosphorylation	332
	Selected Bibliography	337
	Challenging Case 6.1: The Tragic Matter in Energy Management	338
	Source	338
	Case Description	338
	Questions	340

Biochemical Insight	341
Final Discussion	342
Challenging Case 6.2: The Force Comes from Within	344
Source	344
Case Description	344
Questions	346
Biochemical Insights	349
Final Discussion	353
Challenging Case 6.3: A Curious Girl Has Fallen into a Mad World	354
Source	354
Case Description	354
Questions	356
Biochemical Insights	357
Final Discussion	360
7 Catabolism of the Major Biomolecules	363
7.1 An Overview of Catabolism	363
7.2 Citric Acid Cycle: The Central Pathway for the Oxidation of the Three Classes of Nutrient Molecules	367
7.2.1 Citric Acid Cycle Reactions	368
7.2.2 Citric Acid Cycle as a Dynamic Pathway	369
7.2.3 A Historical Overview of CAC Discovery	370
7.2.4 Regulation of Citric Acid Cycle	373
7.3 Catabolism of Carbohydrates	373
7.3.1 Carbohydrate Oxidation Reactions	374
7.3.2 Regulation of Pyruvate Conversion to Acetyl-CoA	376
7.4 Catabolism of Lipids	377
7.4.1 TAG Mobilization and Fatty Acid Transport in the Bloodstream	378
7.4.2 Activation of Fatty Acids	379
7.4.3 Fatty Acid Transport into Mitochondria	380
7.4.4 β -Oxidation: The Pathway for Fatty Acid Degradation	381
7.4.5 Regulation of Fatty Acid Oxidation	386
7.4.6 Fatty Acid Conversion to Ketone Bodies	387
7.5 Catabolism of Amino Acids	388
7.5.1 An Overview of the Amino Acid Catabolism	389
7.5.2 Amino Acid Metabolism in the Liver	390
7.5.3 Amino Acid Metabolism in Other Tissues	396
Selected Bibliography	398
Challenging Case 7.1: Into the Wilderness of Metabolic Deregulation	399
Source	399
Case Description	399
Questions	400
Biochemical Insights	401
Final Discussion	402

Challenging Case 7.2: A Mystic Man with an Aura of Flowers . . .	404
Source	404
Case Description	404
Questions	406
Biochemical Insights	407
Final Discussion	411
8 Metabolic Responses to Hyperglycemia: Regulation and Integration of Metabolism in the Absorptive State	413
8.1 Glucose Sensing by Cells	415
8.2 Biosynthesis of Glycogen	420
8.2.1 Formation of UDP-Glucose	422
8.2.2 Reactions for the Initiation of Glycogen Synthesis from UDP-Glucose	423
8.2.3 Reactions for the Elongation of Glycogen Chain	424
8.2.4 Regulation of Glycogen Synthesis	425
8.3 Biosynthesis of Lipids	431
8.3.1 Synthesis of Fatty Acids	432
8.3.2 Synthesis of Triacylglycerols	448
8.4 Hormonal Responses to Hyperglycemia: Role of Insulin	449
8.4.1 Discovery of Insulin	450
8.4.2 Mechanisms of Insulin Action	451
8.4.3 Effects of Insulin on Energy Metabolism	455
8.5 Metabolic Interplay in Response to Hyperglycemia	457
Selected Bibliography	458
Challenging Case 8.1: Beyond the Enigmatic Smile—The Occult Hyperlipidemia of Mona Lisa	459
Source	459
Case Description	459
Questions	461
Biochemical Insights	462
Final Discussion	465
Challenging Case 8.2: Dolores Bothered to Kill Her Dying Husband . .	467
Source	467
Case Description	467
Questions	468
Biochemical Insights	469
Final Discussion	473
9 Regulation and Integration of Metabolism During Hypoglycemia	477
9.1 Overview of Metabolism During Fasting: Exemplifying with Studies on Therapeutic Starvation	480
9.2 Glycogen Degradation in the Liver	484
9.2.1 Reactions of Glycogen Degradation	486
9.2.2 Regulation of Glycogen Degradation in the Liver	489

9.3	Gluconeogenesis	491
9.3.1	Gluconeogenesis Reactions	491
9.3.2	Precursors for the Synthesis of Glucose	495
9.3.3	Regulation of Gluconeogenesis	496
9.3.4	Dynamic Utilization of Gluconeogenesis Precursors	498
9.4	Hormonal Responses to Hypoglycemia	501
9.4.1	Glucagon: Mechanism of Action and Effects on Energy Metabolism	502
9.4.2	Glucocorticoids: Mechanism of Action and Effects on Energy Metabolism	507
	Selected Bibliography	511
	Challenging Case 9.1: Kenny Faced the Fa(s)t	512
	Source	512
	Case Description	512
	Questions	513
	Biochemical Insight	514
	Final Discussion	516
	Challenging Case 9.2: The Lychee Paradox: Deliciously Sugary, Dangerously Hypoglycemic	517
	Sources	517
	Description	517
	Questions	518
	Biochemical Insights	519
	Final Discussion	521
	Challenging Case 9.3: The Bizarre Death of Elaine Robinson	522
	Source	522
	Case Description	522
	Questions	523
	Biochemical Insight	524
	Final Discussion	525
10	Regulation and Integration of Metabolism During	
	Physical Activity	527
10.1	Muscle Contraction	528
10.1.1	Structural Organization of the Contractile Apparatus	528
10.1.2	Mechanism of Muscle Contraction	534
10.1.3	Regulation of Muscle Contraction	536
10.2	Different Metabolic Profiles of the Skeletal Muscle Fibers	538
10.3	Overview of ATP Synthesis in the Muscle Cells	540
10.4	Muscle Cell Metabolism During Physical Activity	542
10.4.1	Role of the Cellular Energy Charge in the Muscle Cell Metabolism	542
10.4.2	Metabolic Pathways for ATP Synthesis in the Skeletal Muscle	546
10.5	Hormonal Regulation During Physical Activity: Role of Adrenaline	553

10.5.1	Molecular Mechanisms of Adrenaline Action	554
10.5.2	Effects of Adrenaline on Energy Metabolism	556
	Selected Bibliography	559
	Challenging Case 10.1: Iron Muscles—Men of Steel	560
	Source	560
	Case Description	560
	Questions	564
	Biochemical Insights	565
	Final Discussion	569
	Challenging Case 10.2: Armstrong's Race to the Sun	571
	Sources	571
	Case Description	571
	Questions	573
	Biochemical Insights	574
	Final Discussion	580
	Challenging Case 10.3: K. V. Switzer's Run for Rights	582
	Source	582
	Case Description	582
	Questions	584
	Biochemical Insights	586
	Final Discussion	588
11	Control of Body Weight and the Modern Metabolic Diseases	591
11.1	Humoral Control of Food Ingestion	593
11.1.1	A Historical Perspective of the Role of Hypothalamus in Food Intake	594
11.1.2	Leptin: A Hormone Indicative of Adiposity	596
11.1.3	Intestinal Peptides: Triggers of Postprandial Satiety	600
11.1.4	Ghrelin: The Main Orexigenic Hormone	604
11.1.5	The Arcuate Nucleus and the Melanocortin System	606
11.2	Control of Energy Expenditure	608
11.2.1	Adaptive Thermogenesis	608
11.2.2	Role of Thyroid Hormones	612
11.3	Obesity and the Metabolic Syndrome	617
11.3.1	Chronic Inflammation and Insulin Resistance in Obesity	618
11.3.2	Origin of Inflammation in Obesity	620
	Selected Bibliography	623
	Challenging Case 11.1: The Capsules of (H)eating Beauty	624
	Source	624
	Case Description	624
	Questions	627
	Biochemical Insights	628
	Final Discussion	631

Challenging Case 11.2: Running to Eternity in Between Suet and Sweat	634
Sources	634
Case Description	634
Questions	636
Biochemical Insights	637
Final Discussion	640
Challenging Case 11.3: Malthus Meets Metabolism	641
Sources	641
Case Description	641
Questions	642
Biochemical Insights	643
Final Discussion	644
Credits	645
Index	647
