CHAPTER 1 Plant growth promotion by rhizosphere dwelling microbes.....1 Elizabeth Lewis Roberts

1.1 Introduction.....	1
1.2 Plant growth promoting rhizobacteria (PGPR).....	2
1.2.1 Pseudomonads	3
1.2.2 <i>Bacillus</i> and <i>Paenibacillus</i>	8
1.2.3 <i>Streptomyces</i>	9
1.3 Plant growth-promoting fungi (PGPF)	9
1.3.1 <i>Piriformospora</i>	9
1.3.2 <i>Trichoderma</i>	10
1.3.3 <i>Fusarium</i>	10
1.3.4 <i>Penicillium</i>	11
1.4 Plant growth-promoting protozoa.....	11
1.5 Conclusions.....	12
References.....	13

CHAPTER 2 Indigenous nitrogen fixing microbes engineer rhizosphere and enhance nutrient availability and plant growth.....19

Sapna Negi, Pankaj Kumar, Jitendra Kumar, Ajay Singh,
and Ramesh Chandra Dubey

2.1 Introduction.....	19
2.2 Nitrogen-fixing microbes.....	21
2.3 Mechanism of biological nitrogen fixation.....	22
2.3.1 Symbiotic nitrogen fixation	23
2.3.2 Nonsymbiotic nitrogen fixation.....	25
2.4 Rhizosphere engineering by N ₂ -fixing microbes.....	26
2.5 Role of nitrogen-fixing microbes in plant growth enhancement and nutrient uptake	28
2.6 Nitrogen-fixing microbes as biofertilizer for sustainable agriculture.....	30
2.7 Conclusions.....	34
References.....	35

CHAPTER 3	Rhizospheric bacteria as soil health engineer promoting plant growth	45
	Pratibha Vyas, Amrita Kumari Rana, and Manpreet Kaur	
3.1	Introduction	45
3.2	Mechanisms involved in plant growth promotion by rhizobacteria	46
3.2.1	Availability of soil phosphorus and phosphate solubilization	47
3.2.2	Phytohormone production	49
3.2.3	1-Aminocyclopropane-1-carboxylate (ACC)-deaminase activity	49
3.2.4	Production of siderophores	53
3.2.5	Production of antifungal metabolites	54
3.3	Stress tolerance in PGPR	55
3.4	Rhizosphere competence of PGPR	55
3.5	Effect of PGPR on plant growth	56
	References	57
CHAPTER 4	Role of <i>Bacillus</i> species in soil fertility with reference to rhizosphere engineering	65
	Chennappa Gurikar, N.A. Nanje Gowda, K.N. Hanumantharaju, and B.P. Netravati	
4.1	Introduction	65
4.2	Characters and diversity of <i>Bacillus</i> species	66
4.3	Bioefficacy of <i>B. subtilis</i>	67
4.4	Induction of systemic resistance (ISR) by <i>B. subtilis</i> isolates for growth promotion	67
4.5	Peroxidase activity	69
4.6	Polyphenol oxidase activity	70
4.7	Phenylalanine ammonia-lyase activity	70
4.8	Formulation, shelf-life, and compatibility of <i>B. subtilis</i> with fungicides	71
4.9	Conclusions	72
	Acknowledgment	72
	References	72
CHAPTER 5	<i>Rhizobium</i> as soil health engineer	77
	Vivek Chandra Verma, Somen Acharya, Rajeev Kumar, B.C. Verma, Archana Singh, and Vivek Kumar Tiwari	
5.1	Introduction	77
5.2	Classification and history of <i>Rhizobium</i>	79
5.3	Importance of <i>Rhizobium</i> in governing soil health and crop productivity	80
5.3.1	Soil physical condition and reactions	80
5.3.2	Nitrogen enrichment	83
5.3.3	BNF mechanism	83

5.3.4	Siderophore as chelating agent	85
5.3.5	Rhizobium as biocontrol agent	85
5.3.6	Removal of heavy metals and other pollutants	87
5.3.7	Needs for rhizobial inoculates	88
5.3.8	In hill agrosystem	89
5.4	Factors affecting the <i>Rhizobium</i> in soil	89
5.4.1	Mineral nutrition	89
5.4.2	Abiotic and biotic factors	89
5.5	Conclusion	90
	References	90
CHAPTER 6	<i>Azotobacter</i>—A potential symbiotic rhizosphere engineer	97
	Chennappa Gurikar, M.Y. Sreenivasa, N.A. Nanje Gowda, and A.C. Lokesh	
6.1	Introduction	97
6.2	<i>Azotobacter</i> —A beneficial bacterium	99
6.3	PGPR activities of <i>Azotobacter</i>	100
6.3.1	Vitamins and amino acids	101
6.3.2	Plant growth hormones (IAA, GA)	101
6.3.3	Phosphate solubilization	102
6.3.4	Anti-mycotic compounds	102
6.3.5	HCN and siderophore production	102
6.3.6	Nitrogen fixation	103
6.4	Impact of pesticides on soil ecosystem	103
6.5	Effect of pesticides on <i>Azotobacter</i>	104
6.6	Biodegradation of pesticides	104
6.7	Benefits of <i>Azotobacter</i> in agriculture	106
6.8	Conclusions	107
	Acknowledgment	107
	References	107
CHAPTER 7	Application of cyanobacteria in soil health and rhizospheric engineering	113
	Ankita Sharma, Shardulya Shukla, and Sachin Kumar	
7.1	Introduction	113
7.2	Cyanobacteria in the improvement of soil health	114
7.2.1	Biofertilizers	116
7.2.2	Cyanobacteria as biocontrol agents	118
7.2.3	Cyanobacteria: Bioremediation of waste material and reclamation of wasteland	119
7.2.4	Cyanobacteria in carbon dioxide sequestration and reduction of climatic changes	121

7.3	Cyanobacteria in rhizospheric engineering	122
7.4	Conclusions.....	123
	References.....	124
CHAPTER 8	Bacterial inoculants for rhizosphere engineering: Applications, current aspects, and challenges.....	129
	Jupinder Kaur and Vishnu	
8.1	Introduction.....	130
8.2	Microbes associated with plants	130
8.2.1	Above-ground microbiome.....	131
8.2.2	Below-ground microbiome	132
8.3	Rhizosphere engineering	133
8.4	Why microbial inoculants?	133
8.5	Microbial inoculants	133
8.6	Types of microbial inoculants.....	134
8.7	Bacterial biofertilizers	134
8.7.1	Nitrogen-fixing bacteria.....	134
8.7.2	Phosphate solubilizing microorganisms	137
8.7.3	Plant growth-promoting rhizobacteria.....	138
8.7.4	Consortium or composite inoculants	139
8.8	Applications of microbial inoculants.....	140
8.8.1	Phytohormones	140
8.8.2	ACC deaminase activity	140
8.8.3	Siderophore production	141
8.8.4	Microbial antagonism	141
8.9	Challenges in bacterial inoculant application	141
8.9.1	Technological constraints	141
8.9.2	Financial constraints	143
8.9.3	Physical and environmental constraints.....	143
8.10	Solutions to constraints.....	144
8.10.1	Use of native strains.....	144
8.10.2	Choice of carrier material	145
8.10.3	Screening mechanisms.....	146
8.10.4	Marketing.....	146
8.11	Conclusions.....	147
	References.....	147
CHAPTER 9	Microbial inoculants in agriculture and its effects on plant microbiome.....	151
	Lidiane Figueiredo dos Santos and Fabio Lopes Olivares	
9.1	Introduction.....	151
9.2	Plant microbiomes	155

9.3 Bioinoculants in agriculture.....	156
9.4 Direct effect of bioinoculant on plants	157
9.5 Effect of bioinoculants on the structure of the bacteriome with benefits for plants	160
9.6 How does the bioinoculants change the structure of the bacteriome?.....	162
9.7 Conclusion and future perspectives	164
References.....	164

CHAPTER 10 Arbuscular mycorrhiza—A health engineer for abiotic stress alleviation.....171

Kumutha Karunanantham, Srimathi Priya Lakshminarayanan,
Anitha Krishnaswamy Ganesamurthi, Krishnamoorthy Ramasamy,
and Vinu Radha Rajamony

10.1 Introduction.....	172
10.2 Role of AM fungi in plant growth promotion.....	172
10.2.1 Mycorrhizosphere	172
10.3 Salinity stress.....	173
10.3.1 The present scenario	173
10.3.2 Mechanism of salinity tolerance by mycorrhizal plants	174
10.3.3 Plant growth.....	177
10.3.4 Soil aggregation and stability	177
10.4 Drought stress	178
10.4.1 Manifold protection of AM fungi against drought	178
10.4.2 Role of AM fungi in drought tolerance.....	178
10.4.3 Mechanism of drought tolerance by mycorrhizal plants	180
10.5 Heavy metal (HM) stress	184
10.5.1 AM fungi in overcoming HM toxicity.....	185
10.5.2 Mycorrhizoremediation-AM-mediated phytoremediation	187
10.5.3 Success of AM fungi-plant association in reducing heavy metal toxicity	190
10.6 Conclusions.....	190
References.....	191

CHAPTER 11 Potassium solubilizing microorganisms as soil health engineers: An insight into molecular mechanism199

Devendra Jain, Heena Saheewala, Suman Sanadhaya, Arunabh Joshi,
Ali Asger Bhojiya, Abhishek Kumar Verma, and Santosh Ranjan Mohanty

11.1 Introduction.....	199
11.2 Need of potassium solubilizing bacteria in K nutrition	201
11.3 Mechanism of potassium solubilization and mobilization	201
11.4 Characterization of potassium solubilizing bacteria.....	203
11.4.1 Morphological characterization	203

11.4.2 Biochemical characterization.....	204
11.4.3 Molecular characterization	205
11.5 Determination of PGPR attributes of KSB strains.....	205
11.6 Hydrolytic enzymes	206
11.7 Molecular mechanisms of KSB in solubilizing K	207
11.8 Biology of potassium transporter genes in potassium solubilizing microorganisms.....	209
11.9 Conclusions and future perspectives.....	209
References.....	209
 CHAPTER 12 Zinc solubilizing rhizobacteria as soil health engineer managing zinc deficiency in plants	215
Shohini Chakraborty, Mamun Mandal, Arka Pratim Chakraborty, and Sukanta Majumdar	
12.1 Introduction.....	215
12.2 Present status of soil fertility	217
12.3 Possible causes of Zn scarcity in crop plants.....	218
12.4 Possible Zn-deficient plant symptoms and effect of Zn deficiency on plant metabolism.....	219
12.5 Importance of Zn micronutrient in the plant system	220
12.6 Chemical fertilizer: Dilemma between necessity and sustainability	220
12.7 ZSB: The alternative way	221
12.8 Diversity of ZSB associated with plant	222
12.9 Mechanism of Zn solubilization by ZSB.....	224
12.9.1 Chelating mechanism of Zn.....	224
12.9.2 Production of organic acid and proton extrusion.....	224
12.9.3 Amendment in root architecture	225
12.9.4 Effects of ZSB on Zn-transporters.....	226
12.10 Genetics of Zn solubilization and uptake	227
12.11 Prospect of ZSB in nanofertilizer	228
12.12 Conclusions.....	229
References.....	230
 CHAPTER 13 Rhizosphere engineering through pesticides-degrading beneficial bacteria	239
Murugan Athiappan, S. Dinesh Kumar, S. Umamaheswari, and M. Rajaprabu	
13.1 Introduction.....	239
13.2 Pesticides	240
13.2.1 Chemical classes of pesticides.....	241
13.3 Beneficial bacteria	241
13.3.1 Phytomicrobiome.....	243

13.4	Effect of pesticides on beneficial bacteria	244
13.5	Adverse effect of pesticides on humans.....	247
13.6	Mechanism of microbial degradation of pesticide.....	247
13.6.1	Pesticide degradation based on microbial enzymes.....	248
13.7	Engineering the rhizobia.....	251
13.8	Conclusions.....	252
	References.....	252
CHAPTER 14	Enzymes in rhizosphere engineering.....	259
	Areeb Inamdar, Vishal Sangawe, and Nitin Adhapure	
14.1	Introduction.....	259
14.2	Soil indicators—A measurable parameter	260
14.2.1	Types of soil indicators	260
14.3	Rhizozymes.....	261
14.3.1	Dehydrogenase	261
14.3.2	Glucosidases and galactosidases	262
14.3.3	Cellulase	263
14.3.4	Xylanase	263
14.3.5	Invertase.....	263
14.3.6	Urease	264
14.3.7	Arylsulfatase	264
14.3.8	Phosphatase.....	264
14.4	Rhizozyme—Categorization based on location.....	265
14.4.1	Factors affecting soil enzyme	266
14.4.2	Functions of rhizozymes.....	268
14.5	Microbiome of rhizosphere.....	268
14.6	Conclusions.....	269
	References.....	269
CHAPTER 15	Actinobacterial enzymes—An approach for engineering the rhizosphere microorganisms as plant growth promoters	273
	Nagarajan Siddharthan, Murthy Sangeetha, Neethu Asokan, Ramasamy Balagurunathan, and Natarajan Hemalatha	
15.1	Introduction.....	273
15.2	Actinobacteria—Enzyme reservoirs	275
15.3	PGPR and actinobacterial communities in rhizosphere.....	277
15.4	Rhizosphere enzymes and its importance.....	280
15.5	Rhizosphere—Actinobacteria and carbon sequestration	281
15.6	Rhizosphere engineering	283
15.7	Conclusions.....	284
	Acknowledgments	284
	References.....	284

CHAPTER 16	Reactive oxygen species and oxidative stress in higher plants, and role of rhizosphere in soil remediation	293
	Ravindra Kale and Ajay Irmale	
16.1	Introduction	293
16.2	Abiotic stresses	295
16.2.1	Drought	295
16.2.2	Temperature	296
16.2.3	Salinity	297
16.2.4	Metal toxicity	297
16.2.5	High light	297
16.3	ROS formation under high light	298
16.3.1	ROS by excitation energy transfer	299
16.3.2	ROS by electron transport	301
16.4	Conclusions	302
	References	302
CHAPTER 17	Nanotechnology for rhizosphere engineering	307
	Iqra Laraib, Muhammad Ahmad, Asma Rehman, and Asma Imran	
17.1	Introduction	307
17.1.1	Synthesis of nanomaterials	308
17.1.2	Classification of nanomaterials	309
17.1.3	Applications of nanomaterials	309
17.2	Rhizosphere engineering	310
17.3	Applications of nanotechnology for rhizosphere engineering	310
17.3.1	Smart delivery system for precision farming	312
17.4	NPs for soil microbial community functioning and stress alleviation	318
17.5	Nanosensors for precision agriculture	319
17.6	Nanomaterials for rhizosphere remediation	320
17.7	Nanotechnology for plant modification	321
17.8	Nanotechnology for drought recovery and water conservation in rhizosphere	321
17.9	Nanotechnology for improving heat tolerance in plants	322
17.10	Conclusions	322
	References	323
CHAPTER 18	Rhizospheric health management through nanofertilizers	329
	Vishal Sangawe, Areeb Inamdar, and Nitin Adhapure	
18.1	Introduction	330
18.2	Nanofertilizers	332
18.2.1	Zeolite nanofertilizer for sustainable agriculture	334
18.2.2	Zinc/zinc oxide nanoparticles in fertilizers	334
18.2.3	Iron oxide nanoparticles in fertilizers	334

18.2.4	Copper and copper oxide nanoparticles in fertilizers	335
18.2.5	Titanium dioxide nanoparticles in fertilizer.....	335
18.2.6	Cerium oxide nanoparticles in fertilizers	335
18.2.7	Novel metal nanoparticles.....	336
18.2.8	Selenium nanoparticles in fertilizers.....	337
18.2.9	Carbon-based nanomaterials in fertilizers	337
18.2.10	Silicon dioxide nanoparticles in fertilizers	338
18.3	Demerits of nanoparticles for rhizosphere.....	341
18.3.1	Metal nanoparticles interaction.....	341
18.3.2	Silver nanoparticles.....	342
18.3.3	Gold nanoparticles	342
18.3.4	Iron and iron oxides nanoparticles.....	342
18.3.5	Zinc, zinc oxide nanoparticles	343
18.3.6	Titanium oxide nanoparticles.....	343
18.3.7	Copper and copper oxides nanoparticles	344
18.3.8	Cerium nanoparticles	344
18.3.9	Aluminum oxide nanoparticles	344
18.4	Conclusions.....	345
	References.....	345
CHAPTER 19	Quorum sensing in rhizosphere engineering.....	355
	Ranjan Ghosh and Narayan Chandra Mandal	
19.1	Introduction.....	355
19.2	Plant rhizosphere as a hot spot for microbial activity.....	356
19.3	Plant growth-promoting rhizobacteria	357
19.4	Bacterial quorum sensing	359
19.5	Quorum sensing in plant growth-promoting rhizobacteria.....	361
19.5.1	Involvement of QS systems in nitrogen fixation process.....	363
19.5.2	Involvement of QS system in phosphate solubilization by rhizobacteria	364
19.5.3	Involvement of QS system in phytohormone production	365
19.5.4	Involvement of QS system in siderophore production.....	366
19.5.5	Involvement of QS system in ACC deaminase activity of rhizobacteria	367
19.5.6	Involvement of QS in root colonization by rhizobacteria.....	367
19.5.7	Involvement of QS systems in biological control activity of rhizobacteria	368
19.5.8	Quorum sensing in the induction of plant systemic resistance.....	369
19.6	Prospects for using QS mechanisms to improve plant growth and development.....	371
19.7	Conclusions.....	373
	References.....	373

CHAPTER 20	Quorum sensing in rhizosphere microbiome: Minding some serious business	383
	Kayeen Vadakkan	
20.1	Introduction	383
20.2	AHL-mediated intraspecies interaction in Gram-negative bacteria	385
20.3	Autoinducing peptides-mediated intraspecies interaction in Gram-positive bacteria	385
20.4	Bacterial quorum-sensing systems in rhizosphere	386
20.4.1	TraI/TraR signaling system in <i>Agrobacterium tumefaciens</i>	386
20.4.2	ExpI/ExpR-CarI/CarR-coupled quorum-sensing system in <i>Erwania carotovora</i>	387
20.4.3	LasI/LasR-RhlI/RhlR serial overlapping system in <i>Pseudomonas aeruginosa</i>	388
20.4.4	PlcR-PapR quorum-sensing system in <i>Bacillus cereus</i>	389
20.4.5	ComP/ComA quorum-sensing system in <i>Bacillus subtilis</i>	389
20.5	Conclusions	391
	Acknowledgments	392
	References	392
CHAPTER 21	Metagenomics for rhizosphere engineering	395
	Sughra Hakim, Muhammad Shoib Nawaz, Muhammad Jawad Siddique, Mahnoor Hayat, Umaira Gulzar, and Asma Imran	
21.1	Introduction	395
21.2	Key components of rhizosphere	396
21.3	Need for rhizosphere engineering	397
21.4	Metagenomics as a tool for rhizosphere engineering	397
21.5	Experimental strategies in metagenomics	398
21.5.1	Metagenomic DNA extraction	398
21.5.2	Construction and sequencing of metagenome DNA library	399
21.5.3	Metagenomic data analysis	399
21.6	Rhizosphere prospective of metagenomics	403
21.6.1	Characterization of unculturable microbes	403
21.6.2	Revealing the structure and function of core plant microbiome	406
21.6.3	Elucidation of nutrient recycling	407
21.6.4	Description of novel genes and gene products	407
21.6.5	Manipulating the rhizosphere signaling network	408
21.6.6	Plants disease amelioration	409
21.6.7	Pollutant degradation	410
21.6.8	Induction of abiotic stress tolerance	410
21.7	Challenges in rhizosphere engineering	411
21.8	Conclusions	411
	References	412

CHAPTER 22 Rhizosphere engineering for crop improvement.....	417
Abha Singh, Shilpi Kiran, Satyajit Saurabh, and Sonali Kumari	
22.1 Introduction.....	418
22.2 Plant-microbe interaction.....	419
22.2.1 Beneficial plant-microbe interaction	420
22.2.2 Harmful plant-microbe interaction	422
22.3 Understanding the science behind plant-microbe interaction.....	423
22.3.1 Factors governing composition of rhizospheric microbiome	423
22.3.2 The interplay between root exudates and the microbial community	423
22.3.3 Profiling of plant microbiome.....	423
22.4 Approaches for rhizosphere engineering	425
22.4.1 Use of wild PGPM formulation	425
22.4.2 Genetic modification in PGPM and/or its host plant	425
22.5 Modern tools for plant engineering	426
22.5.1 RNA interference	426
22.5.2 Genome editing	427
22.6 Conclusions and future prospect.....	435
References.....	435
CHAPTER 23 Bacterial induced alleviation of cadmium and arsenic toxicity stress in plants: Mechanisms and future prospects.....	445
Hassan Etesami and Anoop Kumar Srivastava	
23.1 Introduction.....	445
23.2 Plant-associated PGPB	448
23.3 Cd and As resistance mechanisms in PGPB	449
23.4 Mechanisms of decreased accumulation of Cd and As in plant tissues by PGPB	452
23.5 Mechanisms of palliation of Cd and As toxicity in plants by PGPB	457
23.6 Conclusions and future prospects	459
Acknowledgment	460
