Preface to the Second Edition xiii
About the Companion Website xvii

I MATLAB Programming 1

1 Getting Started 3
1.1 Running the MATLAB IDE . . . 3
Manipulating windows . . . 5
1.2 MATLAB variables . . . 5
Variable assignment statements . . . 6
Variable names . . . 7
Variable workspace . . . 8
1.3 Numbers and functions . . . 8
1.4 Documentation . . . 9
1.5 Writing simple MATLAB scripts . . . 10
Block structure . . . 11
Appropriate variable names . . . 11
Useful comments . . . 11
Units . . . 11
Formatting for clarity . . . 12
Basic display command . . . 12
1.6 A few words about errors and debugging . . . 12
Error messages are your friends . . . 13
Sketch a plan on paper first . . . 13
Start small and add slowly . . . 13
1.7 Using the debugger . . . 13
Looking ahead . . . 14
Programming Problems . . . 14

2 Vectors and Strings 19
2.1 Vector basics . . . 20
2.2 Operations on vectors . . . 21
Multiplication by a scalar . . . 21
Addition with a scalar . . . 21
Element-by-element operation with two vectors . . . 21
Functions of vectors . . . 22
Length of vectors . . . 22
Subarrays . . . 23
Concatenating vectors . . . 23
2.3 Special vector functions . . . 23
Statistical Functions . . . 24
2.4 Using `rand` and `randi` . . . 25

2.5 String basics 25
2.6 String operations 27
2.7 Character vectors 29
2.8 Getting information from the user 30
Looking ahead 31
Programming Problems 31

3 Plotting **35**
3.1 The `plot` command 35
Axis scaling 38
Plot labeling 39
3.2 Tabulating and plotting a simple function 39
3.3 Bar graphs and histograms 43
Histograms 45
3.4 Drawing several plots on one graph 45
Multiple plots with a single `plot` command 46
Combining multiple plots with a `hold` command 48
Thickening plotted curves 49
3.5 Adding lines and text 50
3.6 Changing object properties 52
Looking ahead 54
Programming Problems 55

4 Matrices **57**
4.1 Entering and manipulating matrices 57
Size of a matrix 59
Matrix transpose 60
4.2 Operations on matrices 60
Arithmetic operations with a scalar 60
Addition and subtraction of two matrices of the same size 61
Functions of matrices 61
Matrix multiplication 62
The identity matrix 62
The inverse of a matrix 63
The determinant of a matrix 64
Matrix–vector multiplication 64
4.3 Solving linear systems: the backslash operator 65
Extended example: solving circuit problems 65
Wire segments 66
Wire junctions 66
Voltage sources 66
Resistors 67
Ground 67
4.4 Special matrix functions 71
Looking ahead 72
Programming Problems 72

5 Control Flow Commands **75**
5.1 Conditional execution: the `if` statement 75
5.2 Logical expressions 79
5.3 Logical variables 80
5.4 `for` loops 81
Good programming practice 84

5.5 `while` loops 84
5.6 Other control flow commands 86
Switch-case statement 86
Break statement 86
Programming Problems 87

6 Animation **93**
6.1 Basic animation 94
6.2 Animating function plots 98
6.3 Kinematics of motion 101
One-dimensional motion: constant speed 101
Motion with constant acceleration 104
Time-marching dynamics: nonconstant force 106
6.4 Looking ahead 108
Programming Problems 108

7 Writing Your Own MATLAB Functions **114**
7.1 MATLAB function files 115
Declaring MATLAB functions 115
7.2 Function inputs and outputs 116
7.3 Local workspaces 117
7.4 Multiple outputs 117
7.5 Function files 117
7.6 Other functional forms 118
Subfunctions 118
Nested functions 122
Anonymous functions 122
7.7 Optional arguments for functions 123
7.8 Looking forward 124
Programming Problems 125

8 More MATLAB Data Classes and Structures **132**
8.1 Cell arrays 132
8.2 Structures 133
8.3 Complex numbers 134
8.4 Function handles 135
8.5 Tables 135
8.6 Other data classes and data structures 136
Programming Problems 137

II Building GUI Tools **139**

9 Building GUI Tools with App Designer **141**
9.1 The App Designer interface 142
9.2 Getting started: HelloTool 144
9.3 Components communicating: SliderTool 148
9.4 Transforming a MATLAB program into a GUI tool: DampedEfieldTool 150
Step 0: Write and debug the program 151
Step 1: Plan the GUI 152
Step 2: Create the GUI in App Designer 153

Step 3: Connect program inputs and outputs to the GUI components 155
Step 4: Add callbacks to invoke the primary model function 157
9.5 Test and improve 157
Many ways to do things 159
Key points from this chapter 159
Programming Problems 160

10 More GUI Techniques **168**
10.1 Sharing data between callbacks 169
10.2 More GUI components 170
Text and Numeric Edit Fields 170
Drop Down 171
Check Box 171
Label 172
List Box 172
Radio Button Group 173
Image 173
Communicating user choices 173
Tab Group 174
Menu bar 174
Toolbar 176
Text Area 176
The uses of invisibility 176
10.3 Popups 176
Progress dialogue 176
Waitbar 178
Input dialogue 178
Confirm dialogue 179
10.4 Responding to keyboard input 181
10.5 Mouse events and object dragging 181

III Advanced Topics **187**

11 More Graphics **189**
11.1 Logarithmic plots 189
11.2 Plotting functions on two axes 192
11.3 Plotting surfaces 194
11.4 Plotting vector fields 199
11.5 Working with images 200
Importing and manipulating bit-mapped images 200
Placing images on surface objects 207
11.6 Rotating composite objects in three dimensions 209

12 More Mathematics **213**
12.1 Derivatives 214
Derivatives of mathematical functions expressed as MATLAB functions 214
Derivatives of tabulated functions 215
12.2 Integration 218
Integrating tabulated functions 218

Integrating mathematical functions expressed as MATLAB functions 221
12.3 Zeros of a function of one variable 225
12.4 Function minimization 227
Finding a minimum of a function of one variable 227
Multidimensional minimization 229
Fitting to an arbitrary function by multidimensional minimization 229
Solving simultaneous nonlinear equations by multidimensional minimization 233
12.5 Solving ordinary differential equations 235
Plotting a slope field 238
12.6 Eigenvalues and eigenvectors 239

13 Reading and Writing Files **242**
13.1 Saving and loading data in `.mat` files 242
13.2 Reading and writing spreadsheet files 244
13.3 Writing text files 245
The `writematrix` command 245
Writing formatted text files 246
Formatting a string using `sprintf` 249
13.4 Reading data from a text file 249
Reading into a cell array 250
Reading complicated text data files 250
13.5 A GUI interface to file names using uiputfile and uigetfile 252

Appendix Using LaTeX Commands **255**

Index **261**
