SUSTAINABLE ENERGY

Towards a Zero-Carbon Economy using Chemistry, Electrochemistry and Catalysis

JULIAN R.H. ROSS

Emeritus Professor, University of Limerick, Limerick, Ireland;
Member of the Royal Irish Academy (MRIA); Fellow of the
Royal Society of Chemistry (FRSC)

Contents

| | |
|---|------------|
| <i>Preface</i> | <i>vii</i> |
| <i>Acknowledgements</i> | <i>ix</i> |
| | |
| 1. Introduction | 1 |
| Energy production and the greenhouse effect | 1 |
| Greenhouse gases | 4 |
| Consequences of the greenhouse effect | 9 |
| The sources of greenhouse gas emissions | 11 |
| | |
| 2. Traditional methods of producing, transmitting and using energy | 21 |
| Introduction | 21 |
| Coal | 21 |
| Crude oil | 38 |
| Natural gas | 42 |
| Concluding remarks | 47 |
| | |
| 3. Less conventional energy sources | 49 |
| Introduction | 49 |
| Nuclear energy | 50 |
| Geothermal energy | 55 |
| Tidal energy | 59 |
| Wave power | 62 |
| Hydroelectric power | 63 |
| Wind power | 67 |
| Solar power | 69 |
| Concluding remarks | 75 |
| | |
| 4. The production and uses of hydrogen | 77 |
| Introduction | 77 |
| The production of hydrogen from natural gas by steam reforming | 77 |
| The production of hydrogen from natural gas by other methods | 89 |
| Methanol production | 96 |
| Production of fuels using the Fischer Tropsch process | 97 |
| Production of ammonia | 99 |
| Conclusions | 102 |

| | |
|---|------------|
| 5. Biomass as a source of energy and chemicals | 103 |
| Introduction | 103 |
| Wood as a source of energy and paper | 104 |
| Non-traditional uses of biomass: First and second generation bio-refinery processes | 112 |
| Concluding remarks | 129 |
| 6. Transport | 131 |
| Introduction | 131 |
| Historical development of mechanically driven transport | 131 |
| Exhaust emission control | 143 |
| Hybrid vehicles | 150 |
| Plug-in hybrid vehicles | 152 |
| Battery electrical vehicles | 154 |
| Fuel cell vehicles | 159 |
| Concluding remarks | 160 |
| 7. Batteries, fuel cells and electrolysis | 163 |
| Introduction | 163 |
| The Volta pile, Faraday and the electrochemical series | 163 |
| Half-cell EMF's and the electrochemical series | 167 |
| The kinetics of electrochemical processes | 170 |
| Electrochemical batteries | 175 |
| Flow batteries | 185 |
| Fuel cells | 186 |
| Electrolysis | 192 |
| 8. The way forward: Net Zero | 197 |
| Introduction | 197 |
| Hydrogen production using renewable energy | 199 |
| Fuel cells to be used for transportation purposes | 203 |
| Solid oxide hydrolysis cells (SOEC's) for hydrogen production and their use for the synthesis of green ammonia and methanol | 205 |
| <i>Tailpiece</i> | 221 |
| <i>Index</i> | 225 |
