Preface	xvii
1 G-IoT and ML for Smart Computing	1
<i>Karunendra Verma, Vineet Raj Singh Kushwah and Nilesh</i>	
1.1 Introduction	2
1.2 Machine Learning	2
1.2.1 Difference Between Artificial Intelligence and Machine Learning	2
1.2.2 Types of Machine Learning	2
1.2.2.1 Supervised Learning	3
1.2.2.2 Unsupervised Learning	5
1.2.2.3 Semi-Supervised Learning	5
1.2.2.4 Reinforcement Learning	6
1.3 Deep Learning	6
1.4 Correlation Between AI, ML, and DL	7
1.5 Machine Learning–Based Smart Applications	7
1.5.1 Supervised Learning–Based Applications	7
1.5.1.1 Email Spam Filtering	7
1.5.1.2 Face Recognition	7
1.5.1.3 Speech Recognition	7
1.5.1.4 Handwriting Recognition	8
1.5.1.5 Intrusion Detection	8
1.5.1.6 Data Center Optimization	8
1.5.2 Unsupervised Learning–Based Applications	8
1.5.2.1 Social Network Analysis	8
1.5.2.2 Medical Records	8
1.5.2.3 Speech Activity Detection	9
1.5.2.4 Analysis of Cancer Diagnosis	9
1.5.3 Semi-Supervised Learning–Based Applications	9
1.5.3.1 Mobile Learning Environments	9

	1.5.3.2	Computational Advertisement	9
	1.5.3.3	Sentiment Analysis	10
	1.5.4	Reinforcement Learning–Based Applications	10
	1.5.4.1	Traffic Forecasting Service	10
	1.5.4.2	Computer Games	10
	1.5.4.3	Machinery Applications	10
	1.5.4.4	Stock Market Analysis	11
1.6		IoT	11
1.7		Green IoT	12
1.8		Green IoT–Based Technologies	13
	1.8.1	Identification	13
	1.8.2	Sensing	13
	1.8.3	Communication Technologies	14
	1.8.4	Computation	14
	1.8.5	Services	14
	1.8.6	Semantic	15
1.9		Life Cycle of Green IoT	16
1.10		Applications	16
	1.10.1	Industrial Automation	16
	1.10.1.1	Machine to Machine Communications	16
	1.10.1.2	Plant Monitoring	16
	1.10.2	Healthcare	16
	1.10.2.1	Real-Time Tracking	16
	1.10.2.2	Identification	17
	1.10.2.3	Smart Data Collection	17
	1.10.2.4	Smart Sensing	18
	1.10.3	Environment Monitoring	18
	1.10.3.1	Agriculture	18
	1.10.3.2	Smog Control	18
	1.10.3.3	Waste Management	18
	1.10.3.4	Smart Water	19
	1.10.4	Suburban Sector	19
	1.10.4.1	Smart Buildings	19
	1.10.4.2	Garbage Collection	19
	1.10.4.3	Water Sensors	19
	1.10.4.4	Smart Metering	19
	1.10.5	People and Goods Transportation	20
	1.10.5.1	Smart Parking	20
	1.10.5.2	Smart Traffic Congestion Detection	20
	1.10.6	Marketing and Shipment Management	20
	1.10.6.1	Smart Logistics/Shipment	20

	1.10.6.2 Managing Quality	20
	1.10.7 Recycling	21
1.11	Challenges and Opportunities for Green IoT	21
	1.11.1 Architecture of Green IoT	21
	1.11.2 Green Infrastructure	21
	1.11.3 Green Spectrum Management	21
	1.11.4 Green Communication	22
	1.11.5 Green Security and Servicing Provisioning	22
1.12	Future of G-IoT	22
1.13	Conclusion	22
	References	23
2	Machine Learning-Enabled Techniques for Reducing Energy Consumption of IoT Devices	27
	<i>Yogini Dilip Borole, Jaya Dofe and C. G. Dethé</i>	
2.1	Introduction	28
	2.1.2 Motivation	29
	2.1.3 Methodology	32
2.2	Internet of Things (IoT)	33
2.3	Empowering Tools	35
	2.3.1 Sensor Devices	35
	2.3.2 Actuators	37
	2.3.3 Communication Technologies	40
	2.3.4 IoT Data and Computing	46
	2.3.4.1 Distributed Computing	46
	2.3.4.2 Fog Computing	47
2.4	IoT in the Energy Sector	48
	2.4.1 IoT and Energy Generation	48
	2.4.2 Smart Metropolises	51
	2.4.3 Smart Grid	56
	2.4.4 Smart Buildings Structures	58
	2.4.5 Powerful Use of Energy in Industry	59
	2.4.6 Insightful Transportation	60
2.5	Difficulties of Relating IoT	61
	2.5.1 Energy Consumption	61
	2.5.2 Synchronization of IoT With Subsystems	63
	2.5.3 Client Privacy	63
	2.5.4 Security Challenges	64
	2.5.5 IoT Standardization and Architectural Concept	65
2.6	Future Trends	66
	2.6.1 IoT and Blockchain	66

2.6.2	Artificial Intelligence and IoT	69
2.6.3	Green IoT	71
2.7	Conclusion	72
	References	73
3	Energy-Efficient Routing Infrastructure for Green IoT Network	87
	<i>Pradeep Bedi, S. B. Goyal, Jugnesh Kumar and Shailesh Kumar</i>	
3.1	Introduction	88
3.2	Overview of IoT	89
3.3	Perspectives of Green Computing: Green IoT	91
3.3.1	Green Radio-Frequency	92
3.3.2	Green Wireless Sensor Network	94
3.3.3	Green Data Centers	94
3.3.4	Green Cloud Computing	95
3.3.5	Green Edge Computing	96
3.3.6	Green M2M	96
3.3.7	Green Information and Communication Technology (ICT) Principles	97
3.4	Routing Protocols for Heterogeneous IoT	99
3.4.1	Energy-Harvesting-Aware Routing Algorithm	99
3.4.2	Priority-Based Routing Algorithm	101
3.4.3	Cluster-Based Routing Algorithm	102
3.4.4	Bioinspired Routing Protocols	103
3.5	Machine Learning Application in Green IoT	104
3.6	Conclusion	107
	References	107
4	Green IoT Towards Environmentally Friendly, Sustainable and Revolutionized Farming	113
	<i>Ravi Manne and Sneha Chowdary Kantheti</i>	
4.1	Introduction	114
4.1.1	Lifecycle of Agriculture	114
4.1.2	An Overview on How Machine Learning Works	115
4.2	How is Machine Learning Used in Agricultural Field?	119
4.2.1	Crop Management	119
4.2.2	Livestock Management	125
4.2.2.1	Animal Welfare	125
4.2.2.2	Livestock Production	126

4.2.3	Literature Review of Research Papers That Used Machine Learning in Agriculture	126
4.3	What is IoT? How Can IoT Be Applied in Agriculture?	127
4.3.1	Monitoring Climate Conditions	128
4.3.2	Greenhouse Automation	128
4.3.3	Crop Management	128
4.3.4	Cattle Monitoring and Management	128
4.3.5	Precision Farming and Agricultural Drones	129
4.3.6	Contract Farming	129
4.4	What is Green IoT and Use of Green IoT in Agriculture?	130
4.5	Conclusion: Risks of Using G-IoT in Agriculture	135
	References	138
5	CIoT: Internet of Green Things for Enhancement of Crop Data Using Analytics and Machine Learning	141
	<i>Sahana Shetty and Narayana Swamy Ramaiah</i>	
5.1	Introduction	142
5.2	Motivation	146
5.3	Review of Literature	147
5.4	Problem with Traditional Approach	154
5.5	Tool Requirement	155
5.5.1	Arduino UNO	155
5.5.2	Humidity Sensor	156
5.5.3	Relay	157
5.5.4	DC Motor	158
5.5.5	pH Sensor and CO ₂ Sensor	158
5.6	Methodology	159
5.7	Conclusion	160
	References	161
6	Smart Farming Through Deep Learning	163
	<i>Sandeep Mathur, Disha Vaid and Ajay Rana</i>	
6.1	Introduction	163
6.2	Literature Review	165
6.3	Deep Learning in Agriculture	169
6.3.1	Feedforward Neural Network	169
6.3.1.1	Single-Layer Perceptron	170
6.3.1.2	Multi-Layer Perceptron	170
6.3.2	Recurrent Neural Network	171
6.3.3	Radial Basis Function Neural Network	172
6.3.4	Kohonen Self Organizing Neural Network	172

6.3.5	Modular Neural Network	173
6.4	Smart Farming	174
6.5	Image Analysis of Agricultural Products	176
6.6	Land-Quality Check	178
6.6.1	Nitrogen Status	178
6.6.2	Moisture Content	179
6.7	Arduino-Based Soil Moisture Reading Kit	180
6.7.1	Wastage of Water	181
6.7.2	Plants Dying Due to Over Watering	182
6.7.3	Expensive Product	182
6.8	Conclusion	183
6.9	Future Work	184
	References	185
7	Green IoT and Machine Learning for Agricultural Applications	189

7.1	Introduction	190
7.2	Green IoT	192
7.2.1	Components of GAHA	194
7.2.2	Applications of Green IoT in Agriculture	197
7.2.2.1	Livestock Tracking and Geofencing	197
7.2.2.2	Fisheries	197
7.2.2.3	Smart Crops	198
7.2.2.4	G-Drones	198
7.2.2.5	Weeding Robots	198
7.2.2.6	Machine Navigation	199
7.2.2.7	Harvesting Robots	199
7.2.3	Green IoT Security Solutions for Agriculture	199
7.2.3.1	Precision Technology	199
7.2.3.2	Facility Agriculture	200
7.2.3.3	Contract Farming	200
7.3	Machine Learning	201
7.3.1	Applications of Machine Learning in Agriculture	202
7.3.1.1	Species Breeding and Species Selection	202
7.3.1.2	Species Recognition	203
7.3.1.3	Weed Detection	203
7.3.1.4	Crop Quality	205
7.3.1.5	Disease Detection	206
7.3.1.6	Yield Prediction	207
7.3.1.7	Field Conditions Management	208

	7.3.1.8	Plant Seedling Classification	209
	7.3.1.9	Greenhouse Simulation	209
7.4		Conclusion	210
		References	210
8		IoT-Enabled AI-Based Model to Assess Land Suitability for Crop Production	215
		<i>Aneesha Gudavalli, G. JayaLakshmi and Suneetha Manne</i>	
8.1		Introduction	216
8.2		Literature Survey	217
	8.2.1	Internet of Things in Field of Agriculture	217
	8.2.2	Machine Learning With Internet of Things in Agriculture	222
	8.2.3	Deep Learning With Internet of Things in Agriculture	230
8.3		Conclusion	235
		References	235
9		Green Internet of Things (GIoT): Agriculture and Healthcare Application System (GIoT-AHAS)	239
		<i>Anil L. Wanare and Sahebrao N. Patil</i>	
9.1		Introduction	240
9.2		Relevant Work and Research Motivation for GIoT-AHAS	243
	9.2.1	Ubiquitous Computing	243
	9.2.2	Ubiquitous Agriculture and Healthcare Application Requirement	245
	9.2.3	Green Cloud Computing	246
	9.2.4	Green IoT Agriculture and Healthcare Applications (GIoT-AHAS)	247
	9.2.4.1	GIoT-AHAS Architecture	247
	9.2.4.2	GIoT-AHAS Requirements	249
	9.2.4.3	Applying Green Internet of Things to Agriculture and Healthcare System	250
	9.2.5	Green IoT for AHAS (GIoT-AHAS)	254
	9.2.5.1	GIoT to AHAS Components	255
	9.2.6	Green Digital Wireless Sensor Networks	258
	9.2.7	Green Cloud Computing	260
	9.2.8	Green Machine-to-Machine	261
	9.2.9	Green Data Processing Center (GDPC)	262
9.3		Conclusion	263
		References	264

10 Green IoT for Smart Transportation: Challenges, Issues, and Case Study	269
<i>Pradnya Borkar, Vijaya Balpande, Ujjwala Aher, Roshani Raut and M. Sulas Borkar</i>	
10.1 Introduction	270
10.2 Challenges of IoT	270
10.2.1 Green IoT	271
10.2.1.1 Hardware-Based	272
10.2.1.2 Software-Based	272
10.2.1.3 Policy-Based	272
10.2.1.4 Awareness-Based	273
10.2.1.5 Habitual-Based	273
10.2.1.6 Recycling-Based	273
10.3 Green IoT Communication Components	274
10.3.1 Green Internet Technologies	274
10.3.2 Green RFID Tags	274
10.3.3 Green WSN	275
10.3.4 Green Cloud Computing	275
10.3.5 Green DC	275
10.3.6 Green M2M	275
10.4 Applications of IoT and Green IoT	275
10.4.1 Green IoT in Transportation	276
10.5 Issues of Concern	279
10.5.1 End User Viewpoints	279
10.5.2 Energy Conservation	279
10.5.3 Data Security and Privacy	279
10.5.4 Preserving Contextual Data	279
10.5.5 Bandwidth Availability and Connectivity	280
10.6 Challenges for Green IoT	280
10.6.1 Standard Green IoT Architecture	280
10.6.2 Security and Quality of Service	281
10.6.3 Data Mining and Optimization	281
10.6.4 Various Traffic Management and Scheduling-Based Smart Public Transport Solutions	281
10.6.5 Scheduling and Admission Control for Independent Vehicle Public Transportation System	282
10.6.6 Impacts on Public Transportation Management by Applying AVLs	283

10.6.7	Lisbon and Portugal's Bus Ride Study and Prediction of Transport Usage	283
10.6.8	Smart Assistance for Public Transport System	284
10.7	Green IoT in Smart Transportation: Case Studies	284
10.7.1	Smart Traffic Signal	284
	10.7.1.1 Description	285
	10.7.1.2 Application	286
	10.7.1.3 Advantages	286
	10.7.1.4 Disadvantages	286
10.7.2	Cloud-Based Smart Parking System	286
	10.7.2.1 Hardware—Car Parks CP1 and CP2	288
	10.7.2.2 Smart Airport Management System	288
	10.7.2.3 Intelligent Vehicle Parking System	290
	10.7.2.4 IoT-Based Smart Vehicle Monitoring System	291

11.1	Introduction	298
11.2	Research Objective	299
11.3	Methodology	299
11.4	Result and Discussion	299
	11.4.1 Internet of Thing (IoT) in the Banking Industry	300
	11.4.1.1 Internet of Things Facilitating Banking	301
	11.4.1.2 Benefits of Internet of Things (IoT) in Banking	301
	11.4.1.3 Other Benefits Benefits of the Internet of Thing (IoT) in Banking	302
	11.4.2 Artificial Intelligence and Machine Learning in Banking	304
	11.4.2.1 Significant Roles of Artificial Intelligence and Machine Learning in Banking and Finance	305
	11.4.2.2 Machine Learning for Safe Bank Transactions	307

11.4.3	Application of Machine Learning in Banking will Expand in 2021	308
11.4.4	Technologies that Can Be Adopted for Reducing Carbon Footprints	309
11.4.4.1	Green Internet of Things (Green IoT)	310
11.4.4.2	Green Cloud Computing Technology	311
11.4.4.3	Green Data Centre (GDC) Technology	312
11.5	Conclusion	313
