Preface xiv

1	Introduction to 3D Printing Technology 1
1.1	Introduction 1
1.2	Digital Manufacturing: From Rapid Prototyping to Rapid Manufacturing 3
1.3	Milestones in 3D Printing Technology 4
1.4	Different Historical Eras in 3D Printing 5
1.4.1	Ancient Age 5
1.4.2	Middle Age 5
1.4.3	Modern Age 5
1.5	Prospects of 3D Food Printing 6
1.6	Design Considerations of 3D Printer 7
1.6.1	Printer Configurations 7
1.6.2	Components of a Typical 3D Printer 10
1.6.2.1	Enclosure, Build Plate, and Guide Rails 10
1.6.2.2	Mechanical Drive Systems 12
1.6.2.3	Microprocessor Controlling System 12
1.7	Software Requirements and Hardware Integration 13
1.8	Designing, Digital Imaging, and Modelling 16
1.8.1	Image Acquisition, Processing, and Modelling 16
1.8.2	Repairing and Post-Processing 20
1.9	Food Printing Platforms 21
1.9.1	Universal Platform 21
1.9.2	User-Defined Platform 21
1.9.3	Applicability of User Interface Systems 23
1.10	Comparison Between Food 3D Printing and Robotic Food Manufacturing 23
1.11	Conclusion 24
	References 24
2	3D Printing Approaches 28
2.1	Introduction 29
2.2	Additive Manufacturing 30

vi	Content	s	
	2.3	3D Food Printing Technologies 33	
	2.4	Extrusion-Based Printing 35	
	2.4.1	Working Principle, System Components, and Process Variables	
	2.4.2	('lassification of the Extracion Dead and D	35
	2.4.2.1	Hot-Melt Extrusion 39	
	2.4.2.2	Cold Extrusion 41	
	2.4.2.3	Hydrogel-Forming Extrusion 42	
	2.5	Selective Sintering 44	
	2.5.1	Working Principle, System Components, and Process Variables	45
	2.5.2	Classification of Selective Sintering System 46	43
	2.5.2.1	Selective Laser Sintering 46	
	2.5.2.2	Selective Hot Air Sintering and Melting 47	
	2.6	Inkjet Printing 47	
	2.6.1	Working Principle, System Components, and Process Variables	48
	2.6.2	Classification of Inkjet Printing 49	70
	2.6.2.1	Drop-On-Demand Inkjet Printing 49	
	2.6.2.2	Continuous Inkjet Printing 50	
	2.7	Binder Jetting 50	
	2.7.1	Working Principle, System Components, and Process Variables	51
	2.7.2	Classification of Binder Jetting 52	
	2.8	Bio-Printing 53	
	2.8.1	Working Principle, System Components, and Process Variables	54
	2.8.2	Classification of Bioprinting 55	
	2.8.2.1	Extrusion-Based Bioprinting 55	
	2.8.2.2	Droplet-Based Bioprinting 56	
	2.8.2.3	Photocuring-Based Bioprinting 57	
	2.9	Future Prospects and Challenges 57	
	2.10	Conclusion 58	
		References 59	
	3	Food Components and Their Role in Printability 67	
	3.1	Recipes in 'Print and Eat Technology' 67	
	3.2	Role of Food Constituents 68	
	3.3	Panorama of Food Printing 68	
	3.4	Insights on the Printability of Different Food Constituents 69	
	3.4.1	Carbohydrates and Starch 69	
	3.4.2	Proteins and Amino Acids 71	
	3.4.3	Lipids and Fatty Acids 73	
	3.4.4	Dietary Fibre 75	
	3.4.5	Other Additives 77	
	3.5	Classification of Foods Based on Their Printability 79	
3		Conclusion 79	
		References 00	

4	Factors Affecting the Printability of Foods 83
4.1	Introduction 84
4.2	Factors That Affect Extrusion 3D Printing 85
4.3	Intrinsic Properties 85
4.3.1	Physical Properties 85
4.3.2	Rheological Properties 88
4.3.2.1	Steady Shear Rheology 89
4.3.2.2	Dynamic Shear Rheology 92
4.3.2.3	Yield Stress 95
4.3.2.4	Complex Viscosity 97
4.3.2.5	Thixotropy and Creep Recovery 98
4.3.2.6	Qualitative and Quantitative Assessment of Rheology 100
4.3.3	Mechanical Properties 101
4.3.3.1	Extrusion Assay 101
4.3.3.2	Textural Profile Analysis 102
4.3.4	Frictional Properties 105
4.3.5	Thermal Properties 107
4.3.6	Dielectric Properties 109
4.4	Extrinsic Properties 111
4.4.1	Optimization of Material Supply 111
4.4.2	Optimization of 3D Printing Process Variables 113
4.4.2.1	Nozzle Size and Nozzle Height 113
4.4.2.2	Printing Speed 115
4.4.2.3	Extrusion Rate 116
4.4.2.4	Printing Rate 118
4.4.2.5	Infill Percentage and Infill Pattern 121
4.4.2.6	Extruder Offset and Retraction Length 123
4.5	Factors Affecting Other 3D Printing Technologies 126
4.5.1	Selective Laser Sintering 126
4.5.2	Inkjet Printing and Binder Jetting 127
4.6	Conclusion 129
	References 130
5	Printability and Techniques 138
5.1	Introduction 139
5.2	Printability and Material Characteristics 140
5.3	Material Characterization Techniques 141
5.3.1	Structural Imaging 142
5.3.1.1	Scanning Electron Microscopy 142
5.3.1.2	X-ray Microtomography 145
5.3.1.3	Confocal Laser Scanning Microscopy 149
5.3.2	Crystal Morphology 153
5 3 2 1	Y-ray Diffraction 153

viii	Contents
- 1	

5.3.2.2	Small-Angle X-ray Scattering 156
5.3.3	Molecular and Chemical Analysis 159
5.3.3.1	Nuclear Magnetic Resonance Imaging 159
5.3.3.2	Fourier Transform Infrared Spectroscopy 162
5.3.4	Thermal Analysis 164
5.3.4.1	Differential Scanning Calorimetry 164
5.4	Assessment of Printability 166
5.4.1	Line Test 166
5.4.2	Lattice Test 168
5.4.3	Cylinder Test 168
5.4.4	Extrusion Test 168
5.4.5	Assessment of the Dimensional Stability 170
5.4.6	Assessment of the Handling Properties 176
5.5	Printability Evaluation of 3D Printed Constructs 176
5.5.1	Shape Resemblance 176
5.5.2	Printing Percentage 177
5.5.3	Dimensional Deviation and Appearance 177
5.5.4	Dimensional Stability 179
5.5.5	Ternary Representation of Printability 179
5.5.6	Correlation of Printability and Rheology 179
5.5.7	Rational Approach for Printability 181
5.6	Conclusion 182
