### Environmental sector

#### 1. Algal engineering for bioremediation, bioenergy production, and biomedical applications

Ashfaq Ahmad, Fawzi Banat, and Hanifa Taher

- 1 Introduction 3
- 2 Industrial wastewater treatment 5
- 3 Algae for CO<sub>2</sub> sequestration 11
- 4 Bioenergy from algae 14
- 5 Biomedical applications 20
- 6 Conclusion and future outlook 24
- References 25

#### 2. Microalgae biotechnology for bioremediation applications

Mohd Asyraf Kassim, Noor Haza Fazlin Hashim, Mohd Hafiz Jaafar, and Japareng Lalung

- 1 Introduction 33
- 2 Microalgae 35
- 3 Bioremediation using microalgae 35
- 4 Industrial wastewater 36
- 5 Antibiotic and hormone 37
- 6 Heavy metal 38
- 7 Pesticide 40
- 8 Integrated CO<sub>2</sub> biosequestration bioremediation and biorefinery 41
- 9 Conclusions and future perspective 42
- References 43

#### 3. Bioremediation of wastewater using algae for potential renewable bioenergy cogeneration

Teh Sabariah Binti Abd Manan, Taimur Khan, Wan Hanna Melini Wan Mohtar, Affiani Machmudah, Denys Dutykh, Sobia Qazi, Amirrudin Ahmad, and Nadiah Wan Rasdi

- 1 Introduction 48
- 2 Algae classification 48
- 3 Bioremediation of wastewater using algae 51
- 4 Bioenergy cogeneration using algal biomass 57
- 5 Algal practicality and limitations 58
- 6 Conclusions and future outlook 60
- Acknowledgments 60
- References 60

#### 4. Microalgae for bioremediation of pesticides: Overview, challenges, and future trends

Michele Greque de Moraes, Munise Zaporoli, Bárbara Franco Lucas, and Jorge Alberto Vieira Costa

- 1 Introduction 64
- 2 Contamination by pesticides 64
- 3 Environmental fate of pesticides 65
- 4 Bioremediation of pesticides by microalgae 66
- 5 Main factors involved in the bioremediation of pesticides by microalgae 69
- 6 Techniques used to increase pesticide removal from water 71
- 7 Challenges and future trends 73
- 8 Conclusions and future outlook 74
- Acknowledgments 75
- References 75

#### 5. Algae harvesting: Application of natural coagulants

Lais Galileu Speranza, Gustavo Henrique Ribeiro Silva, Ana Maria Pereira Neto, Rodolfo Sbrolini Tiburcio, and Rodrigo Braga Moruzzi

- 1 Introduction 79
- 2 Coagulation/flocculation mechanisms 81
- 3 Organic coagulants 83
- 4 Harvested biomass 87
- 5 Conclusions and future perspective 93
- Acknowledgments 93
- References 93

## 6. Microalgae cultivation in wastewater from agro-industries: An approach integrated for bioremediation and biomass production

Diva Souza Andrade, Hugo Forlan Amaral, Jerusa Souza Andrade, Luiz Rodrigo Ito Morioka, and Tiago Santos Telles

- 1 Introduction 102
- 2 Wastewater and nutrient's recovery 103
- 3 Potential microalgae to grow in effluents 109
- 4 Microalgae biomass from wastewater 112
- 5 Application of microalgal biomass in the agricultural activities 113
- 6 Challenges in reducing wastewater treatment costs 114
- 7 Conclusions and future outlook 115
- References 116

## 7. Microalgae-based systems applied to the dual purpose of waste bioremediation and bioenergy production

Rafaela Basso Sartori, Mariana Costa Deprá, Rosângela Rodrigues Dias, Paola Lasta, Leila Queiroz Zepka, and Eduardo Jacob-Lopes

- 1 Introduction 127
- 2 Sources of waste 128
- 3 Technologies for waste treatment 129
- 4 Bioremediation potential of microalgae 132
- 5 Bioenergy technologies and applications 134
- 6 Future perspectives and conclusion 141
- References 142

## II Bioenergy sector

## 8. Direct utilization of lipid and starch from wet microalgae (*Chlorella vulgaris*)

Yichao Ma, Shaoyang Liu, Yi Wang, and Yifen Wang

- 1 Introduction 150
- 2 Utilization of lipid 150
- 3 Utilization of carbohydrate 152
- 4 Comprehensive utilization of lipid and starch 153
- 5 Conclusions and future perspectives 161
- References 161

## 9. Algae: An emerging feedstock for biofuels production

Sahib Alam

- 1 Introduction 165
- 2 Types of algal biomass for biofuel production 167
- 3 Algal cultivation and biomass production 170
- 4 Biomass harvesting and dewatering 172
- 5 Lipid extraction and biofuel production 174
- 6 Techno-economic analysis of algal biofuel production 179
- 7 Prospects and challenges 180
- 8 Conclusion's and future outlook 181
- References 181

## 10. Microalgal biofuels: A sustainable pathway for renewable energy

Muhammad Afzaal, Saman Hameed, Rizwan Rasheed, and Waqas Ud Din Khan

- 1 Introduction 188
- 2 Biofuels 189
- 3 Technologies for microalgae cultivation 197
- 4 Harvesting methods for microalgae 199
- 5 Conversion technologies of biomass into biofuels 202
- 6 Potential bioenergy products of microalgae 209
- 7 Advantages of algal biofuels 212
- 8 Environment and sustainable perspective 213
- 9 Challenges of algal biofuels and future outlook 214
- 10 Conclusions 215
- References 215

## 11. Thermal treatment kinetics of microalgae for energy production

Muxuan Li, Abdul Raheem, Boyu Qu, and Guozhao Ji

- 1 Introduction 223
- 2 Chemical composition of microalgae 224
- 3 Thermo-chemical conversion 225
- 4 Basic formulas and models of kinetics 227
- 5 Isoconversional method 229
- 6 Model-fitting method 235
- 7 DAEM 239
- 8 Conclusion and future outlook 242
- Acknowledgment 243
- References 243

## 12. Microalgae: The challenges from harvest to the thermal gasification

Márcio Ferreira Martins, Renan Barroso Soares, and Ricardo Franci Gonçalves

- 1 Introduction 247
- 2 Microalgae thermochemical characteristics 250
- 3 Gasification of microalgae from WWTP 253
- 4 Conclusions and future outlook 256
- References 257

## 13. Harnessing the potential of microalgal species *Dunaliella*: A biofuel and biocommodities perspective

Rishu Kalra, Suchitra Gaur, and Mayurika Goel

- 1 Introduction 259
- 2 Selection of elite strain and improvement 261
- 3 Prerequisite: Optimal growth conditions 264
- 4 Downstream process 269
- 5 Metabolites production and their applications 270
- 6 Challenges and integrated biorefinery approach 273
- 7 Conclusion and future scope 274
- References 274

## III

### Biomedical sector

## 14. Algae cultivation for biomedical applications: Current scenario and future direction

Ashvinder Kaur, Gaganjot Kaur, Reetu, and Monika Prakash Rai

- 1 Introduction 284
- 2 Considerations for choosing an algal strain 286
- 3 Physicochemical conditions in algae growth 287
- 4 Culturing of algae 289
- 5 Algae harvesting 290
- 6 Extraction and purification of high-value based metabolites 291
- 7 Biomedical applications of algal extracts: An integrated approach 292
- 8 Future direction and challenges 298

## 9 Conclusion and future outlook 299

### Acknowledgment 300

### References 300

## 15. Biochemical profiling, transcriptomic analysis, and biotechnological potential of native microalgae from the Peruvian Amazon

Juan C. Castro and Mariânela Cobos

- 1 Introduction 306
- 2 Sampling, isolation, purification, and culture of native microalgae cells 306
- 3 Morphological and molecular identification 306
- 4 Biochemical profiling 307
- 5 De novo transcriptomic analysis 313
- 6 Biotechnological potential 316
- 7 Conclusions and future outlook 316
- Acknowledgment 317
- References 317

## 16. Algae in medicine and human health

Teh Sabariah Binti Abd Manan, Taimur Khan, Wan Hanna Melini Wan Mohtar, Zarimah Mohd Hanafiah, Amir Sharifuddin Ab Latip, Siti Fatimah Zaharah Mustafa, Siew Yoong Leong, Aida Soraya Shamsuddin, Mohamed Hasnain Isa, Abdul Karim Russ Hassan, Amirrudin Ahmad, Nadiah Wan Rasdi, and Habsah Mohamad

- 1 Introduction 324
- 2 Bioprocess of seaweed polysaccharides 325
- 3 Conclusions and future outlook 328
- Acknowledgments 333
- References 333

## 17. Microalgae biotechnology: Emerging biomedical applications

Nor Suhaila Yaacob, Hasdianty Abdullah, Mohd Fadzli Ahmad, Maegala Nallapan Maniyam, and Fridelina Sjahrir

- 1 Introduction 336
- 2 Research findings from great microalgae studies 340
- 3 How algae can help solve some of the world's most severe health problems 342
- 4 Conclusions and future outlook 342
- Acknowledgments 344
- References 344

18. Potential applications of the low-molecular-weight metabolome of *Synechocystis aquatilis* Sauvageau, 1892 (Cyanophyceae: Merismopediaceae)

Julia Krylova and Evgeny Kurashov

- 1 Introduction 348
- 2 Material and methods 350
- 3 Component composition of low-molecular-weight metabolome of *S. aquatilis* Sauvageau, 1892 351
- 4 Prospects for the use of metabolites of *S. aquatilis* 359
- 5 Conclusion and future outlook 367
- Conflict of interest 368
- Acknowledgments 368
- References 368

19. Microalgae potentials as bioactive phytochemicals for human's health: Novel highlights on their production, applications, and emerging analytical technologies

Mostafa M. Gouda and Musa A. Tadda

- 1 Introduction 378
- 2 General applications of microalgae in biotechnology field 379
- 3 Microalgae healthy macromolecules and phytochemicals 382
- 4 Microalgae as source of bioactive and novel macro- and micro-molecules 389
- 5 Methods for identification of microalgae macromolecules 392
- 6 Conclusion and future remarks 402
- Authors contributions 404

Declaration of competing interest 404

Acknowledgment 404

References 404

20. Microalgae carotenoids: An overview of biomedical applications

T.C. Nascimento, P.P. Nass, A.S. Fernandes, M.L. Nörnberg, Q.Z. Zepka, and Eduardo Jacob-Lopes

- 1 Introduction 409
- 2 Microalgae-based carotenoids production 410
- 3 Chemical structure and relationship of structure-biological activity 411
- 4 Biomedical application 415
- 5 Challenges and future research 419
- 6 Conclusions 419
- References 420

21. Diatomite-based nanoparticles: Fabrication strategies for medical applications

Chiara Tramontano, Luca De Stefano, Monica Terracciano, Giovanna Chianese, and Ilaria Rea

- 1 Introduction 427
- 2 Fabrication and surface modifications of DNPs 429
- 3 Biocompatibility and uptake of DNPs in vitro and in vivo systems 433
- 4 Drug loading and release from DNPs 437
- 5 Conclusions and future trends 441
- Acknowledgment 442
- References 442
