Blockchain and the Supply Chain

Concepts, strategies and practical applications

SECOND EDITION

Nick Vyas, Aljosja Beije and
Bhaskar Krishnamachari

CONTENTS

01 Evolution of the supply chain – how we got here 1

The power of unceasing curiosity 2
Information and innovation: the twin engines of evolution 3
Movement of people and goods: faster, higher, further 6
Japan's reconstruction and the gift of TQM 11
Cognitive computation: surpassing human capability 11
Disruptive forces 16
Follow the future – post-Covid-19 outlook 19
Notes 21

02 Supply chains post-Covid-19: costly, fragile and increasingly complex 23

The stakes are high 25
Supply chain disruption 26
An argument for blockchain 29
Limitations of blockchain 32
Blockchain in the supply chain – increased efficiency and effectiveness 34
Plan processes 40
References 124
Notes 125

03 Basics of blockchain I 127

Overview 127
Digital transactions – the problem of double spend 127
The Bitcoin protocol 128
Ethereum and smart contracts 137
Challenges and advances in permissionless blockchains 140
References 143

04 Basics of blockchain II 145

Overview 145
General capabilities of blockchain 145

Permissioned blockchains 147
Hyperledger Fabric 148
Other permissioned protocols 150
When to use blockchain 153
References 154

05 Internet of Things, data analytics and other information technologies 157

The Internet of Things 157
Cloud computing 165
Cloud service models 166
Big data: computation and storage 169
Distributed computing for big data 169
Database technologies 170
Data analytics and machine learning 171
Security, privacy and trust 177
Integration of IoT and other technologies for supply chain with blockchain 178
References 181

06 Deliver and the Deliver legacy 185

The case for the digital quayside 186
Lessons learned 187
Naviporta's whitepaper 190
Supported use cases 196
References 215
Notes 218

07 Blockchain use cases in the supply chain 221

Container shipping: IBM and Maersk 221
The palm oil supply chain 229
Leveraging blockchain for the tea supply chain 236
Blockchain for the automotive industry 236
Blockchain and other technologies in context: considerations and challenges 249
References 252

08 **Economic impact and future outlook** 253

The economics of blockchain 253
Globalization's backwash 255
Online marketplaces 257
Mega cities and the millennial consumer 257
The growing complexity of industries 260
Standardizing blockchain for ROI^2 260
Re-imagining the future with blockchain 263
Reflection 264
Notes 265

Index 267
